"OUR VERY BEST" HIBBARD BICYCLES.

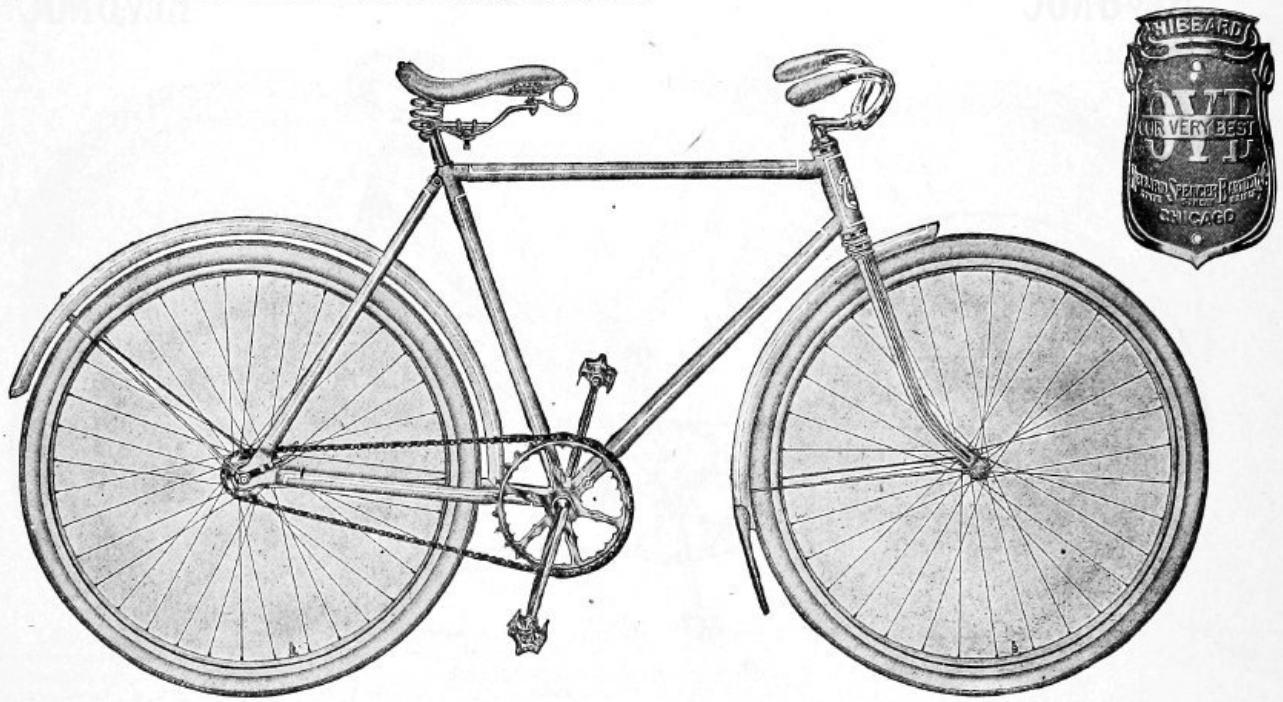
All bicycles look alike to some, but a bicycle should not be purchased entirely on its appearance. While good appearance is desired in a wheel, *durability* and *quality* count in the long run. Our wheels combine both *quality and appearence.* Service alone will prove the quality of any article that has the use and abuse a bicycle has. *Our line has stood the test.*

Considering the number of years we have been in the bicycle business, our experience is as valuable to the purchaser as it is to us.

Our reputation has been earned on the high quality of our wheels and we jealously guard it by the most careful inspection of every detail in the construction of our line.

Our wheels have proved their worth and are *backed by a guarantee that insures protection to dealer and rider.* The fact that we have largely increased our business in the past season indicates how our bicycles are being received by dealers all over the United States.

When we put the trade mark H W B on an article we know *positively* that it is the highest degree of perfection. We do not claim that this wheel is the cheapest on the market, but we do claim that it is absolutely our very best.



Specifications.

Frame—22-in. regular, option of 20-in. or 24-in., made from the finest quality Shelby seamless 20 gauge steel tubing, flush joints, fishmouth reinforcements which eliminate vibration and buckled joints, in addition to this reinforcement, the frame has heavy steel pins connecting all reinforcements which make it absolutely unbreakable, main tubes 1-in., head 1⅛-in., upper rear fork ⅞-in., oval pattern, rear lower fork ¾-in., slightly formed.

Fork—This important part has forged steel three plate crown and is reinforced down the entire length of the fork sides by an extra ribbed reinforcement, which insures strength and beauty.

Finish—Before this wheel is finished, it is given five coats of enamel, and the final coat is hand polished. Can be furnished in Royal blue with wide gold stripes *or* in Yale blue with wide gold stripes, rims in each instance being dark blue with light blue center.

Crank Hanger—One piece, fitted with Diamond pattern 7-in. cranks, made from high carbon spring steel. Guaranteed not to break or bend. The cones and cups on this hanger are fitted so that it is impossible for dirt to get in. It is unnecessary to have any oil holes as the bearings are packed in vaseline and will remain in good condition for a year or more. Can be easily taken apart and put together by any one.

Hubs—The famous New Departure Bell pattern, turned from solid bar of steel, fitted with the highest grade of cups, cones and bearings.

Tires—We can furnish our famous REVONOC Brand Tough Tread tires in either grey or red. These tires are thoroughly guaranteed.

Coaster Brakes—We can furnish the following well known makes of coaster brakes, at a slight addition in cost: Corbin, New Departure, Morrow, Eclipse or New Atherton.

Mud Guards—To match wheel; leather flap can also be furnished.

Chain—Highest quality, ⅜ in. B block pattern, blue sides, straw-colored polished center.

Gear—81, 9-tooth rear and 26-tooth front sprocket.

Seat Post—7/8 in. forward L with pinch bolt binder.

Handle Bar—No. X618 Kelly adjustable extension, 19 in. wide, with sewed leather grips, 7/8 in. internal expander. Option of Kelly handle bar.

Pedals—Standard Star Rat Trap, No. 35.

Saddle—No. 14 H W B with Universal nickel plated springs.

Tool Bag—Containing wrench, oil can and pump.

Colors.

Option in colors of Royal blue with wide gold stripes, rims dark blue with light blue center and gold stripes; *or* Yale blue with wide gold stripes, rims dark blue with light blue center and gold stripes.

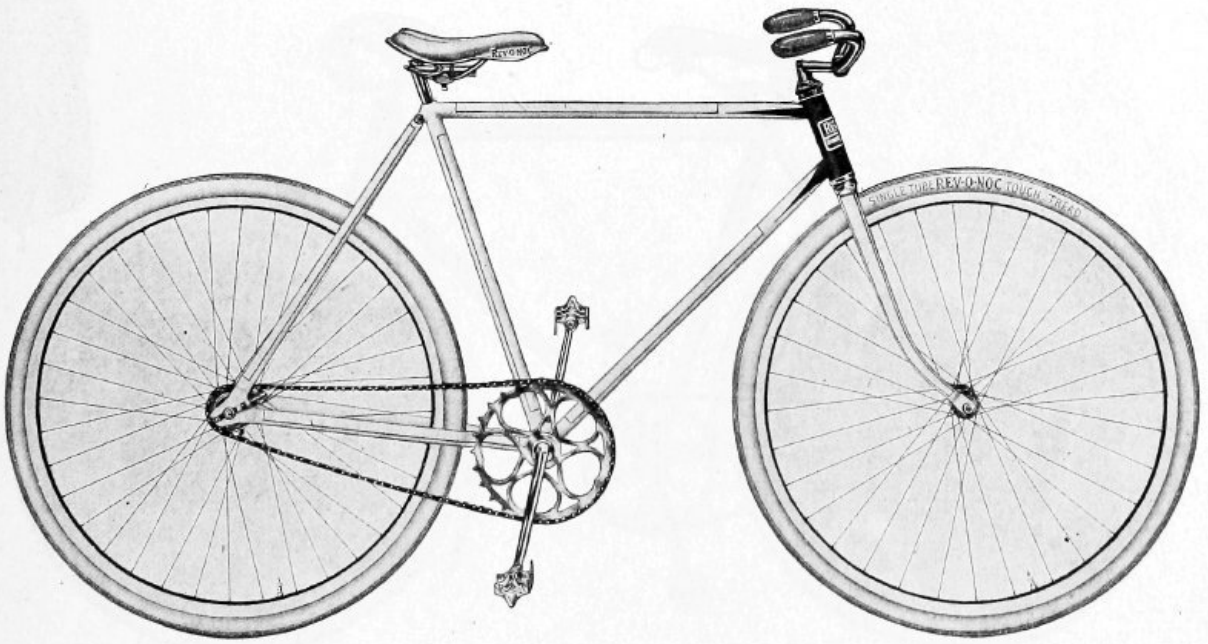
"OUR VERY BEST" HIBBARD BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE.

MEN'S "REV-O-NOC" BICYCLES.

A strictly high grade wheel at a popular price. There is no better wheel made for the price than our REV-O-NOC. The same absolute guarantee for mechanical perfection covers this wheel as that on our H.S.B. & CO. Hibbard. For those who want a wheel that will "stand up" on the roughest kind of a country road, a wheel "that will take you and bring you back," we believe that this wheel is equal to any of the high grade wheels on the market at the present time, with the exception of our H.S.B. & CO.

H.S.B. & CO. REV-O-NOC H.S.B. & CO. REV-O-NOC



Specifications.

Frame—22-in., regular, option of 20-in. or 24-in, made from the finest grade 20 gauge Shelby seamless (not welded) tubing, fishmouth reinforcements with steel pins, flush joints. Main tubes, 1 in.; head, 1½-in., upper rear fork ⅝-in., oval pattern, lower rear fork, ¾-in., slightly formed.

Fork—Forged steel Diamond pattern crown, nickel plated, heavily reinforced fork sides, ⅞×18 in., seamless tubing.

Finish—Stearns' yellow with black sunburst head, black hair-line stripes, rims Stearns' yellow with black center, edged with red; *or* Tribune blue, crimson sunburst head, black hairline stripes, rims Tribune blue with black hairline stripes; *or* black with gold stripes, rims to match.

Crank Hanger—One piece, oval pattern, 7-in. cranks, made from high carbon spring steel, sprockets, boiler plate steel, milled true to pitch.

Hubs—Bell pattern, finely finished and fitted with best quality cones, cups and bearings.

Saddle—Our REV-O-NOC 24C. Highest quality leather with coil spring. An unusually comfortable saddle.

Chain—High quality, ⅜ in. B block pattern, blue sides, straw colored center.

Gear—81, sprocket 9-tooth rear, and 26-tooth front.

Seat Post—⅞ in. forward L. with pinch bolt binder.

THE "REV-O-NOC" BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE.

LADIES' "REV-O-NOC" BICYCLES.

REV-O-NOC REV-O-NOC

The Lady REV-O-NOC is made of the same high grade material and in the same careful manner as the men's REV-O-NOC bicycle. The construction insures the greatest rigidity that is possible in a lady's bicycle.
The double truss frame makes it a very strong wheel and greatly adds to its appearance.
Easy to mount and dismount and balanced so as to make it an extremely easy running bicycle.
Has steel dress and mud guards, fully protecting the rider.

Specifications.

Frame—22 in. regular, option of 20 in., Shelby seamless tubing, main tubes 1 in., head 1½ in., upper rear fork ⅝ in., oval pattern, lower rear fork ¾ in., slightly formed.
Fork—Diamond shape, ⅞ in., forged crown, nickel plated, reinforced.
Finish—Tribune blue with crimson sunburst head, rims to match; or black, rims to match.
Cranks—1 piece Diamond pattern, 6½ in.
Chain—High quality, 3/16 in. B block pattern, blue sides, straw colored center.
Hubs—Bell pattern, finely finished and fitted with best steel bearings.
Gear—74, sprocket 9-tooth rear, 24-tooth front.
Seat Post—⅞ in. forward L, with pinch bolt binder.
Handle Bar—No. X458 upturned, adjustable, or No. X658 extension, 20 in. wide, with wound leather grips, ⅞ in. expander stem.
Pedals—Bridgeport combination No. B2½.
Saddle—No. 6 REV-O-NOC coil spring.
Tool Bag—Containing wrench, oil can and pump.
Guards—Steel enameled guards to match frame.

Colors.

Option in colors of Tribune blue with crimson sunburst head, rims to match; *or* black, rims to match.

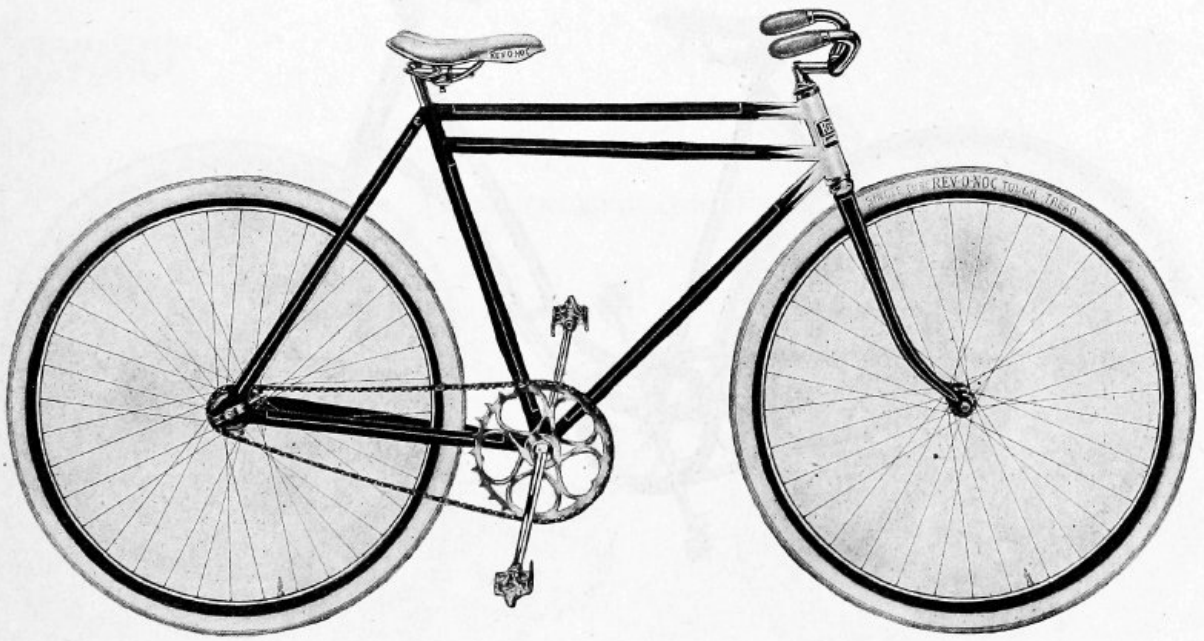
THE "REV-O-NOC" BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE.

"REV-O-NOC" TRUSS FRAME BICYCLES.

We have added this model to our line on account of the demand for a truss frame bicycle. We know that any of our wheels are strong enough to stand all the abuse that a bicycle is given, but in order to meet the demand of those who feel that their weight requires an especially strong frame, we have added this style. It is made on strictly scientific principles and is thoroughly guaranteed in every particular.



Specifications.

Frame—22-in. regular, option of 20-in. or 24-in., made from 1-in. 20 gauge Shelby seamless tubing throughout, fishmouth reinforcements, pinned at all vital points, insuring great strength and rigidity.

Fork—Special drop-forged, nickel plated crown, $\frac{7}{8}\times 18$ in. gauge fork sides, fitted with our famous REVONOC Diamond Fork Crown.

Finish—Tastefully enameled in Brewster green with red sunburst head on both main and center bars, making a very attractive wheel. Rims green with red center edged with gold.

Crank Hanger—One piece, 7-in. oval pattern crank, same as used on our REVONOC model.

Hubs—Bell pattern, finely finished and fitted with best steel bearings.

Chain—High quality, $\frac{3}{16}$ in. B block pattern, blue sides, straw colored center.

Gear—81, sprocket 9-tooth rear, and 26-tooth front.

Seat Post—$\frac{7}{8}$ in. forward L, with pinch bolt binder.

Handle Bar—No. X458, adjustable, or No. X658 extension, 20 in. wide, wound leather grips, $\frac{7}{8}$ in. expander stem.

Pedals—Standard No. 1 Rat Trap.

Saddle—No. 24 REVONOC coil spring.

Tool Bag—Containing wrench, oil can and pump.

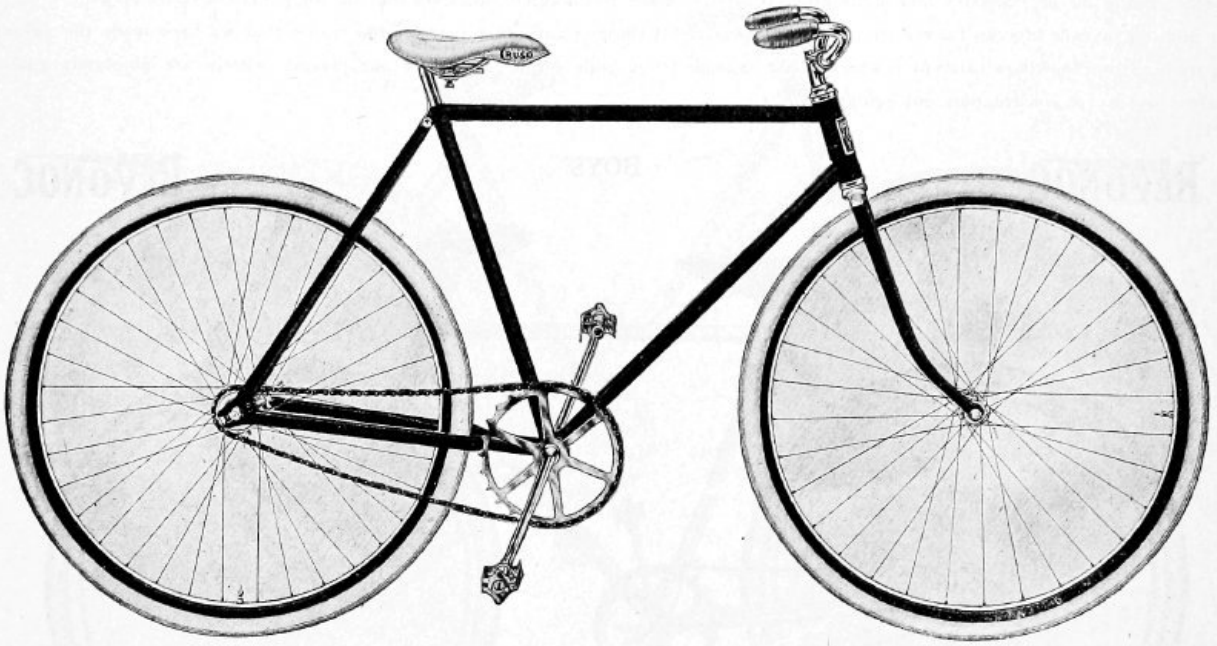
"REV-O-NOC" TRUSS FRAME BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH PURCHASE IS MADE.

CRUSO BICYCLES.

When you know our price on this wheel, you may think it is cheaply constructed, but it is cheap in price only. While it is sold at a very low figure, it is guaranteed throughout and is recommended where a wheel is wanted for general utility. This wheel is especially made to meet the demand for a good, first-class wheel at a low price.

The Ladies' "Cruso" is made of the same high grade material and with the same degree of care as the men's.

The ladies' bicycle is geared lower than the men's. It has the double truss frame which makes it strong and rigid. The dress and mud guards are made of steel and are so constructed as to fully protect the skirts of the rider from accident and dirt.



Specifications.

Frame—22-in. regular, option of 20-in. or 24-in, made from 20 gauge Shelby seamless tubing (not welded) throughout. Flush joints; fishmouth reinforcements, pinned throughout.

Fork—Oval pattern, drop forged crown, nickel plated. Reinforced sides.

Finish—Black, rims black with red centers; nickel plated fork crown; *or* vermilion with black rims with red centers.

Crank Hanger—One piece; oval pattern 7-in. cranks.

Chain—$\frac{3}{16}$ in. B block pattern.

Hubs—Tubular, bell shaped, with selected steel bearings.

Gear—81, sprocket 9-tooth rear, 26 tooth front.

Seat Post—$\frac{7}{8}$ in. forward L, pinch bolt binder.

Handle Bar—No. X458 adjustable, wound leather grips No. 24.

Pedals—Pirate Rat Trap.

Saddle—No. 15 Cruso.

Tool Bag—Containing wrench, oil can and pump.

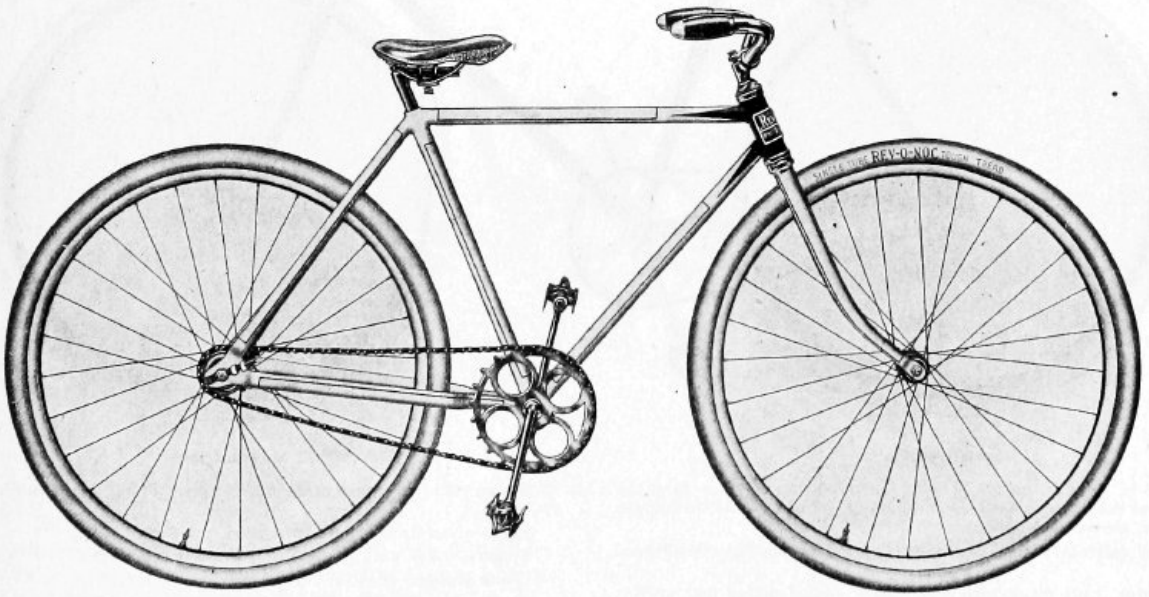
THE CRUSO BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE

"REV-O-NOC" JUVENILE BICYCLES.

Great care is used in the construction of this wheel as the juvenile wheels are the most important of any line. No wheel made is given more abuse than those ridden by the younger generation. The adult would not think of taking the risks on a bicycle that the juvenile rider does. Riding over obstacles, riding off of sidewalks, lack of attention generally, make it absolutely necessary that the finest material only be used.

Our sales on juvenile bicycles for the past season have exceeded those of any other year for the reason that we have made the juvenile wheel question a study, as we know how carefully a wheel should be made for juvenile purposes. All of our juvenile wheels are absolutely guaranteed to be the highest quality of construction and equipment.

REV-O-NOC BOYS' REV-O-NOC



Specifications.

Frame—16-in., equipped with 24-in. wheels; 18-in., equipped with 26-in. wheels; made of 20 gauge Shelby seamless tubing.

Fork—The most important detail of a juvenile wheel is the fork, on account of the great strain that is given the front wheel. Fork crown made from a drop forging with semi-arch, nickel plated crown, ⅞-in. fork sides, reinforced.

Finish—We believe that the youth is entitled to bright finishes same as the adult rider, and have made our wheels very attractive by finishing with Stearns' yellow with black sunburst head, black hairline stripes; rims yellow with black center, edged with red.

Crank Hanger—We use the one-piece crank hanger made in the same manner as the balance of our crank hangers, with 5½-in. oval cranks; the balance of the equipment is made especially for us and designed on juvenile lines throughout.

Chain—⅜ in., B block pattern, blue sides, straw colored center.

Hubs—New type Bell pattern, finely finished and fitted with selected bearings.

Gear—59, sprocket 8-tooth rear, 20-tooth front.

Seat Post—⅞ in., pinch bolt binder.

Handle Bar—No. X758 Adjustable Juvenile, with wound leather grips.

Pedals—Standard No. 2J.

Saddle—No. 72 REV-O-NOC.

Coaster Brakes—Should be fitted to every juvenile wheel on account of the additional pleasure and the protection against accidents.

Boys' REV-O-NOC 16 in. frame, equipped with Royal unguaranteed 24 in. tires	each	$28.00

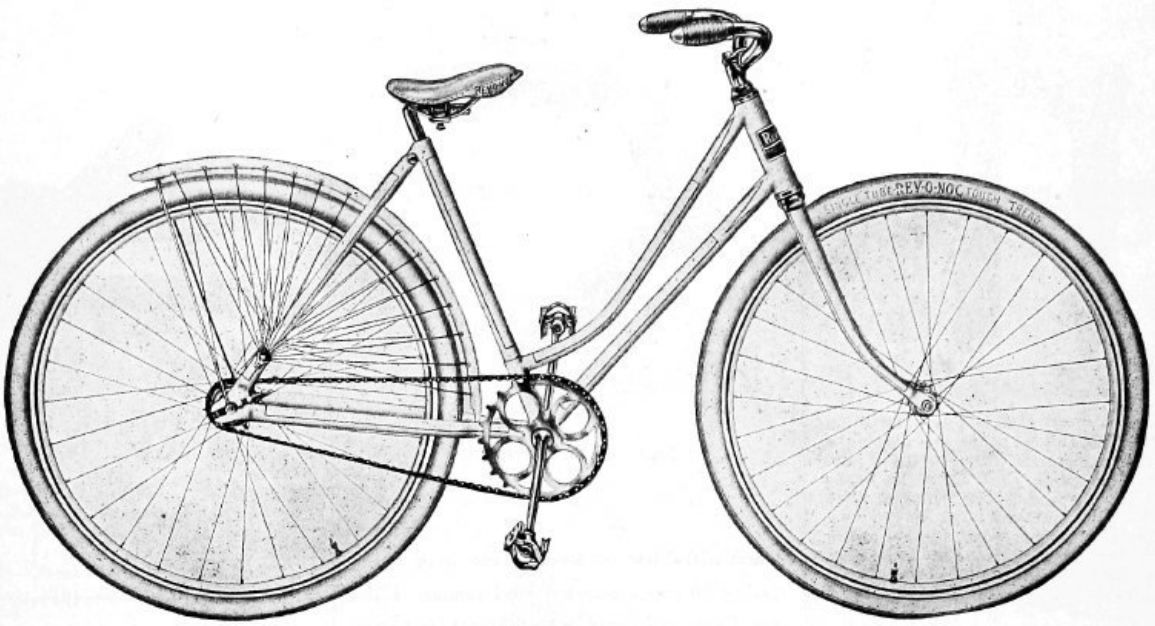
THE "REV-O-NOC" BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE.

"REV-O-NOC" JUVENILE BICYCLES.

H.S.B. & CO. REV-O-NOC GIRLS'. H.S.B. & CO. REV-O-NOC



Specifications.

This model is made in the same careful manner that our Boys' Juvenile is, and is constructed on scientific lines so as to properly balance. There is no easier riding juvenile wheel on the market.

Frame—16 in., equipped with 24-in. wheels; 18-in., equipped with 26-in. wheels, made of Shelby seamless tubing, main tubes 1 in., head 1½ in., upper rear fork ⅝-in., lower rear fork ¾-in., slightly formed.

Fork—The most important detail of a juvenile wheel is the fork, on account of the great strain that is given the front wheel. This is made of a drop-forging with semi-arch nickel plated crown, ⅞-in. fork sides, reinforced.

Finish—Tribune blue with crimson sunburst head, black hairline stripe, rims Tribune blue, black hairline stripe.

Crank Hanger—5½ in. cranks, one piece oval pattern.

Chain—3/16 in., B block pattern, blue sides, straw colored center.

Hubs—New type, Bell pattern, finely finished and fitted with selected bearings.

Gear—59, sprocket 8-tooth rear, 20-tooth front.

Seat Post—⅞ in., pinch bolt binder.

Handle Bar—No. X758, Adjustable Juvenile, with wound leather grips.

Pedals—Standard No. 2 J. C. combination.

Saddle—No. 72 REV-O-NOC.

Coaster Brakes—Should be fitted to every juvenile wheel on account of the additional pleasure and the protection against accidents.

Mud Guards—For those who wish mud guards on this wheel we can furnish at a small extra charge. The wheel is not furnished with mud guards unless so ordered.

THE "REV-O-NOC" JUVENILE BICYCLE IS FULLY GUARANTEED FOR THE YEAR IN WHICH THE PURCHASE IS MADE.

GUARANTY.

WE AGREE WITH THE PURCHASER OF EACH "O.V.B. HIBBARD," "REV-O-NOC" OR CRUSO BICYCLE TO MAKE GOOD BY REPAIR OR REPLACEMENT ANY DEFECTS IN MATERIAL OR WORKMANSHIP, PROVIDED THE DEFECTIVE PART IS DELIVERED TO US TRANSPORTATION CHARGES PREPAID.

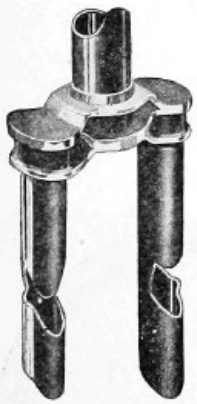
THIS GUARANTY DOES NOT COVER COST OF REPAIRING BICYCLES DAMAGED BY ACCIDENT, MISUSE, OR NEGLECT AND EXPIRES DEC. 31ST OF THE YEAR IN WHICH PURCHASE IS MADE.

IN RETURNING DEFECTIVE PARTS, DO NOT FAIL TO PUT YOUR OWN NAME AND ADDRESS ON THE TAG, AND TO WRITE A LETTER GIVING FULL PARTICULARS. FAILURE TO DO THIS MAY BE THE CAUSE OF MUCH UNNECESSARY DELAY.

BICYCLES.

THE WAY OURS ARE MADE.

The construction details shown on this page are from actual photographs. While we have tried to make our illustrations as clear as possible and have made our claims as strong as we can, we cannot do them justice and would much prefer that you see the wheels and test them yourself. We can substantiate all the claims we have made for them.

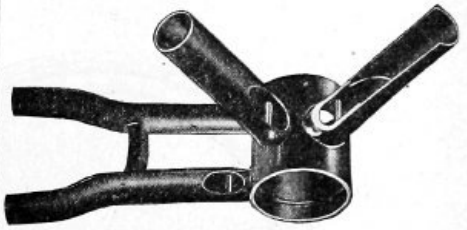


Front Fork Construction.

Hibbard, Front Fork.—The illustration shown will give you an idea of the great strength and handsome appearance of our Front Forks. The three plate Fork Crown is made from a drop forging and is the strongest that can be used. The illustration shows you the extra ribbed reinforcements which run the entire length of the fork sides, making it absolutely unbreakable. This outside rib is nickel plated which adds greatly to the beauty of the fork.

Sectional View of Head.

Sectional View of Head—Made from finest quality 20 gauge seamless steel tubing. Fish-mouth reinforcements and additional steel pins. All brazed joints in our frames are dipped in a solution of copper and zinc. This manner of brazing reaches both inside and outside of all reinforcements. Some frames are merely brazed in the fire and are brazed on the ouside only.

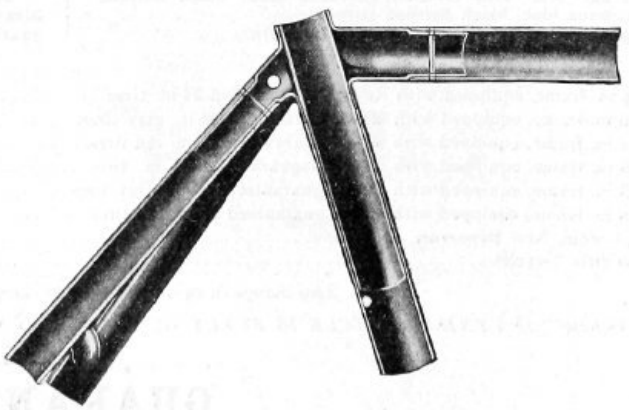


Hanger Bracket.

Hanger Bracket.—Note the reinforcements and manner of putting the extra steel pins in all parts that are subject to strain. Note the evenness of wall, which is not possible in welded tubing. The bracket construction consists of seamless tubing throughout. The tool steel cups are pressed, not screwed, into the bracket.

Crank Hanger.

Crank Hanger.—Illustration shows our Hibbard one-piece crank hanger. The cranks and crank shaft are made in one piece and are of the finest quality carbon spring steel, expressly made for this purpose. Cranks are diamond shape and heavily nickel plated. The sprockets used are made from boiler plate steel. Each sprocket is milled and machined accurately to gauge. Cups and cones used are turned from tool steel and are perfectly ground. This is the simplest hanger made and it does not require any experience to take it apart and put it together again.



Seat Post Mast Construction.

Seat Post Mast Construction.—Enamel will cover a great many defects, but we could not guarantee our wheels as we do, unless we knew the construction. This important part of the whee has extra long, heavy reinforcement and steel pins throughout, and has an arched seamless brace between the rear stays. All parts made from seamless steel tubing.

The different illustrations merely call attention to a few of the many good points of our line.

NATIONAL ASSOCIATION TIRE GUARANTEE.

All guaranteed tires are so mentioned in our catalogue. The makers of guaranteed tires agree to repair or replace without charge tires which in their judgment are defective in material or workmanship.

All guarantees, unless otherwise mentioned, expire on Dec. 31st of the year in which the tires are sold.

All tires for replacement must be sent to the maker whose name appears on the tire.

Express charges on tires must be prepaid in every instance, or packages will not be accepted from the transportation company. If return by registered mail is desired, postage at the rate of 1 cent per ounce must accompany the request for repairs, and 8 cents additional for registry.

Rim cut, punctured, or tires abused, misused or worn out in service will not be replaced.

Always write a separate letter and send by mail your instructions, as all packages are held awaiting this advice.

See that every package sent has your full address (name, town, street number or county and state) securely fastened to it.

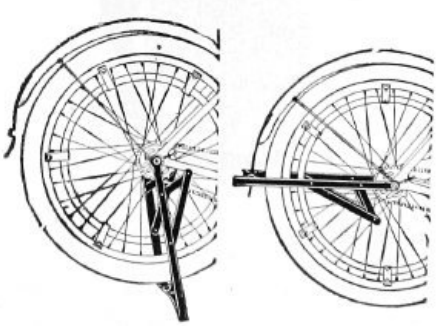
MOTORCYCLE STANDS.



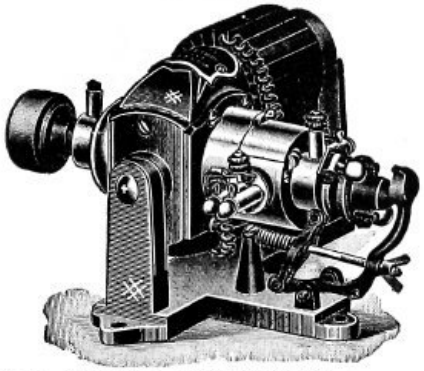
In use. Folded.

No. 300—QUICK ACTION, made of steel, firmly riveted, height 17 in., fits any motorcycle, when folded is attached to bracket on the end of mud guard, w't 3¼ lbs.....each $3.00

This stand is ideal for show room or demonstrating purposes, protects the machine in rear from collision and is entirely out of the way when folded.

SPARKERS AND SPARK COILS.

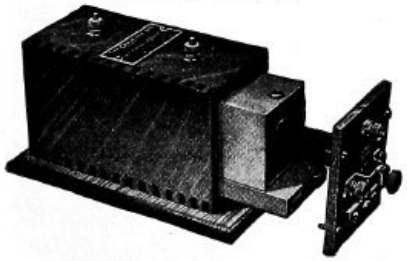
AUTO SPARKERS.



No. 1—MOTSINGER, $10\frac{1}{2}\times10\times6\frac{1}{2}$ in., each..... $25.00

No batteries, belts or switches are required to operate this sparker. It is wound for a very slow starting speed, making it possible to start without batteries by turning the fly wheel of engine by hand. When the engine is under motion, the governor on the end of shaft of the sparker prevents it from running too fast. A perfect sparker in every particular.

SPARK COILS.



Chicago.

No. C1—1 cylinder	each	$ 6.00
No. C2—2 cylinder	"	13.00
No. C3—3 cylinder	"	19.00
No. C4—4 cylinder	"	25.00

The material used in the construction of a spark coil is most important, and in the manufacture of the Chicago no expense has been spared and only the best used throughout.

Every coil is tested with twice its working voltage before leaving the factory. The windings are of non-absorbent enameled wire. This coil is made on the interchangeable plan, so that parts that are lost or broken can be replaced by new ones.

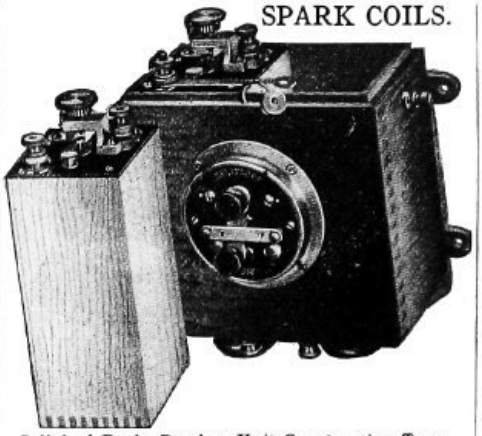
Extra Parts for Chicago Spark Coils.

No. 10—Condenser cartridge	each	$1.00
No. 12—Secondary cartridge	"	2.50
No. 14—Adjustment screw, with iridium platinum contact	each	.80
No. 16—Vibrator spring with iridium platinum contact	each	.90

Splitdorf, Standard Vibrating, 8 in. Long, 4 in. Deep.

No. 641—1 cylinder, $3\frac{3}{4}$ in. wide	each	$10.00
No. 642—2 cylinder, $6\frac{3}{4}$ in. wide	"	20.00
No. 643—3 cylinder, 9 in. wide	"	30.00
No. 644—4 cylinder, 12 in. wide	"	40.00

SPARK COILS.



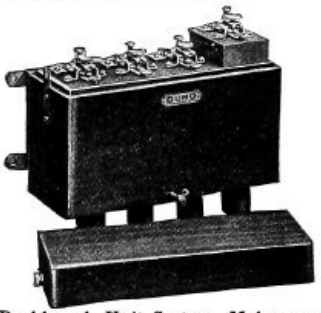
Splitdorf Dash, Peerless Unit Construction Type.

No. 645—1 cylinder	each	$15.00
No. 646—2 cylinder	"	30.00
No. 647—3 cylinder	"	45.00
No. 648—4 cylinder	"	60.00

Unit can be removed instantaneously.

Cut-out switches furnished on all the above coils.

We can furnish all parts for coils.



Duro Dashboard, Unit System, Mahogany Case.

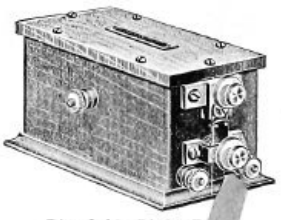
No. D11—For one cylinder engine	each	$11.00
No. D22—For two cylinder engine	"	14.00
No. D44—For four cylinder engine	"	28.00
No. D66—For six cylinder engine	"	42.00

No. D66 made to order only.

This is the first season we have offered the Duro spark coils to our customers, and we feel that they should prove very good sellers.

The design is entirely new and is the result of costly experiments. It utilizes all the lines of magnetic force, and reduces the battery consumption to a minimum.

All that is necessary to remove a unit is to simply slide it out, there are no nuts or connections to remove or disconnect.



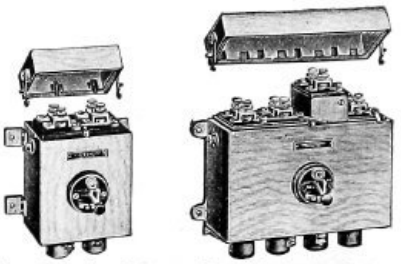
Pittsfield, Plain B

No. 661—1 cylinder	each	$ 9.50
No. 662—2 cylinder	"	19.00
No. 663—3 cylinder	"	28.50
No. 664—4 cylinder	"	38.00
Motorcycle, $2\frac{1}{2}\times8\frac{1}{4}$ in.	"	8.00

The core is made of the best grade of soft iron, carefully annealed.

The vibrator is acknowledged the fastest on the market, and is absolutely positive in its action, making a good electrical connection at every impulse. It is impossible for it to stick and the breadth of adjustment is far ahead of any other. Extra heavy iridio-platinum rivets are used at the break of the condenser circuit.

SPARK COILS.



Two Cylinder Coil. Four Cylinder Coil.

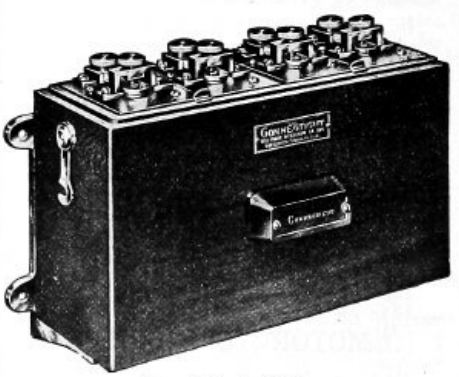
Pittsfield Dash, with Switch.

No. 651—1 cylinder	each	$14.50
No. 652—2 cylinder	"	25.00
No. 654—4 cylinder	"	48.00
No. 656—6 cylinder	"	72.00
Units, extra	"	11.00

Two Cylinder Coil.

Connecticut Dash.

No. 627—1 cylinder	each	$13.50
No. 628—2 cylinder	"	25.00
No. 629—3 cylinder	"	37.50



Four Cylinder Coil.

Connecticut Dash.

No. 630—4 cylinder	each	$50.00
No. 631—6 cylinder	"	75.00
Units, extra	"	12.00

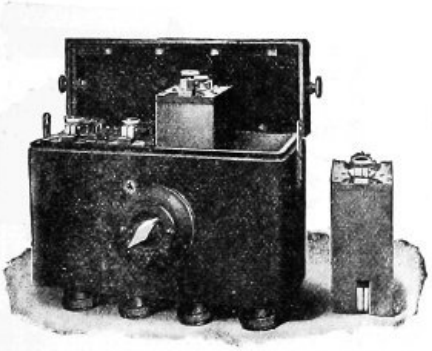
Are constructed upon the unit system, viz., each coil is individual and in no way connected with its neighbor. They are placed in cases, one unit for each cylinder of your engine.

In case of trouble the defective unit can be replaced in 20 seconds and without stopping your engine.

Vibrator is of the simplest form known and is constructed so as to give the most rapid vibrations which in turn produce the hottest spark. The contact points are made of the finest grade of iridio platinum, the best and most expensive material obtainable for this purpose, and are sufficiently large to last for at least five years without renewal, provided the coil has proper care.

SPARK COILS, IGNITERS, DRY BATTERIES, ETC.

SPARK COILS.



Heinze Dash, Interchangeable Unit, Rosette Switches.

No. 40—1 cylinder	each	$12.00
No. 36—2 cylinder	"	18.00
No. 35—4 cylinder	"	36.00
No. 34—6 cylinder	"	52.00
No. 57—Units	"	7.00

Extensive experiments have demonstrated that at the highest point of compression in the cylinder a great number of sparks should be produced by the coil instantly in order to insure complete ignition resulting by the intense heat which would be produced by a great many sparks in rapid succession, the object being to give the piston no possible chance whatever to move forward, and thereby letting down the compression and with the possibility of producing ignition after the compression has been somewhat reduced and thereby reducing the efficiency of the engine.

In order to produce such a hot spark of great frequency, it was necessary to have the vibrating arm at all times make a firm contact and at the same time the vibrating arm should be very light or of a very small mass and its fulcrum of vibration should be very short in order to produce speed in the vibrating arm.

In order to produce a coil which should give a great many vibrations per second, it was necessary to intensify the magnetic field. This was accomplished by means of the radiating magnetic arms, which produce about five times as much magnetism as is generally produced by the magnetic core alone, and by this addition of the radiating arms, the vibrating arm or armature was attached to a very stiff spring enabling it to vibrate at such a high speed so that the coil will produce a hotter spark than any other coil on the market.

MOTORCYCLE COILS.

Splitdorf.

Long,	10 ×2½ in	each	$9.00
Short,	6½×3 in	"	9.00

These coils are encased in fiber and hard rubber, and are pronounced by experts the most economical coils made.

All the leading manufacturers year after year use these coils, and they are looked upon by a great many people as the trade mark of quality of a motorcycle when intending to purchase.

IGNITERS.

No. C10—CHICAGO IRON CLAD, made in one size only as it will ignite any engine large or small.....each $3.00

This class of coil is often used where the engine is exposed to the weather and where dampness is likely to be encountered. This style of coil will stand the roughest handling and cannot be damaged by being submerged in water, as the coil is entirely surrounded by a water-proof compound, but not so as to prevent it being removed from its iron armor should it ever be necessary to replace a coil.

The Combat.

No. M625—6 volts, 25 amp. hours, size 9½×4¾×6⅜ in.....each $14.00
No. S660—6 volts, 60 amp. hours, size 9½×4¾×7¾ in.....each 17.50
No. P680—6 volts, 80 amp. hours, size 9½×4¾×9 in.....each 22.50

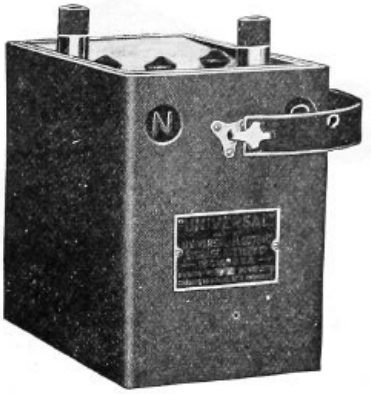
The Combat igniter shows by actual test 25% to 75% more power than other ignition or sparking batteries. Marking a battery 6 volt 60 ampere hours does not make it so.

The handle is heavy japanned steel, detachable, lasts longer and withstands action of the electrolyte.

The terminal connection is the most ingenious and strongest, and corrosion at binding posts is impossible. (See cut.)

The grease cup attachment absolutely prevents electrolysis. This non-corrosive connection alone marks the greatest advancement made in the manufacture of portable storage batteries for the past ten years.

IGNITION BATTERIES.



Universal.

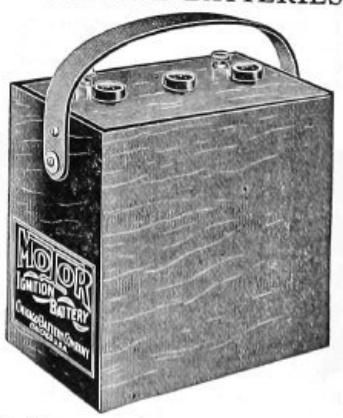
No. 064—6 volts, 40 amp. hours, size 5¾×8×7¾ in.....each $18.00
No. 066—6 volts, 60 amp. hours, size 5¾×9⅝×8¼ in.....each 21.00

These batteries are especially designed to meet the increasing demand for a substantial and powerful source of ignition.

	SIZE.	VOLTAGE.	CAPACITY.	EACH.
No. 812	9½×3⅞×9 in.	4	60 A. H.	$14.00
No. 813	9½×5⅜×9 in.	6	60 A. H.	21.00
No. 814	9½×7 ×9 in.	8	60 A. H.	28.00

This battery is made with great care, securely packed in hard wood. There is no free acid to run out or spill.

STORAGE BATTERIES.



No. D—MOTOR, hardwood case, with handle, cheaper than any other reliable dry battery made, 6 volts, size 9¼×5⅝×9⅜ in.....each $18.00

BATTERIES, MAGNETOS AND SPARK PLUGS.

STORAGE BATTERIES.

Duro, for Ignition and Lighting of Motor Cars and Boats.

1909 Standard Sizes.

	SIZE.	VOLTAGE.	CAPACITY.	EACH.
No. 46	9⅛×5⅞×8¼ in.	6	40 A. H.	$23.00
No. 66	9⅛×5⅛×9⅜ in.	6	60 A. H.	27.00
No. 86	10½×5⅞×9⅜ in.	6	80 A. H.	30.00
No. 106	12½×5⅞×9⅜ in.	6	100 A. H.	40.00
No. 68	11⅝×5⅛×9⅜ in.	8	60 A. H.	35.00

Special sizes made to order only.

For single cylinder motors (jump spark), use No. 46; four-cylinder engines, Nos. 66 or 86. For lighting use No. 106. Make and break—No. 68 with primary coil. For magneto results and high speed motors install No. 68 and adjust coil springs loosely.

Charging Outfit.

No. B—110 volts .....each $4.50

On the average coil, automobiles will obtain the following mileage per charge of battery:

Size of Battery:	One Cylinder Miles	Two Cylinder Miles	Four Cylinder Miles
40 Ampere hour.	2,000	1,500	1,000
70 Ampere hour.	2,600	2,000	1,800

These are not guesses or estimates, but actual results obtained from the use of Duro Batteries for three years.

Mileage will vary with coil, timer, roads, speed etc.

DRY BATTERIES.

No. 700G "Rev-o-noc"—1½ volts, 2½×6 in., 15 to 18 amperes, for use with telephones, gas engines, automobiles and wherever intermittent service of the highest efficiency is needed, w't 2 lbs.....each $0.50

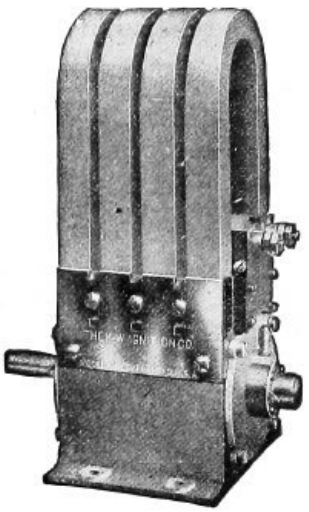
ONE HUNDRED AND TWENTY-FIVE IN A BARREL.

No. 160JG—EVER READY, style "J," 2½×6 in., 1⅙ volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motor cycles, telephone work, etc., w't 2½ lbs.....each $0.60

No. 170KG—EVER READY, style "K," 3×7 in., 1⅙ volts, 27 to 30 amperes, for use on automobiles, gas and gasoline engines, motor cycles, etc. w't 3¾ lbs., each 1.20

NO. 160JG, ONE HUNDRED AND TWENTY-FIVE; NO. 170KG, SEVENTY-FIVE IN A BARREL.

K-W MAGNETOS.

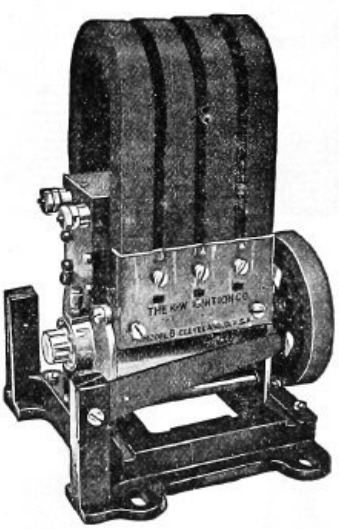


Belt or Gear Drive.

No. A —For jump spark, with 2½, 3½, or 4½ in. diameter belt pulley, base 4×5 in., around magnets, 4×3½ in., height 10½ in., shaft ½ in., from bottom of base to center of shaft 1⅞ in.....each $35.00

No. A M—For "Make and break," must be gear driven at engine speed and no coil is needed, sizes and dimensions same as No. A. except with ⅝ in. shaft. each..... 35.00

The oil cups can be mounted for running in an inverted position, if so ordered.



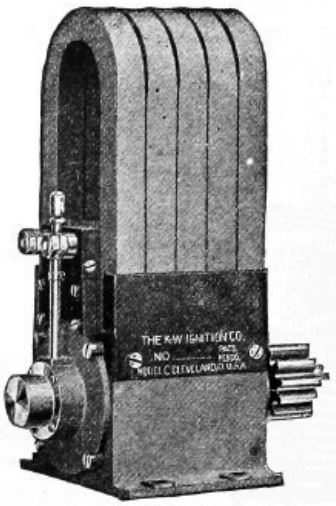
Friction Drive.

No. B—For jump spark only, with 3, 4 or 5 in. friction wheel, base 6½×7 in., around magnets 4×3½ in., height 11 in.....each $35.00

This is the magneto that made the name K-W famous and a standard for good ignition. Has wide friction wheel of first-class sole leather and will not slip. Will start the engine easily without batteries.

Mount the Magneto so that the flat spring presses the friction wheel of the Magneto securely against the fly wheel of the engine. The flat spring can be mounted on either standard so that it can be applied on either side of the flywheel. It will run equally well in either direction.

K-W MAGNETOS.



For Belt or Gear Drive.

No. C—For jump spark, speed 2½ or 3 times as fast as the engine, base 4×5 in., around magnets 4×3½ in., height 10½ in., shaft ⅝ in., from bottom of base to center of shaft 1⅞ in....each $45.00

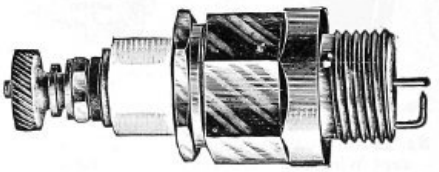
No. C M—For "Make and break," must be gear driven at engine speed and no coil is needed, sizes and dimensions same as No. C.....each 45.00

No. C is intended for heavy duty and will start the largest engines easily without batteries.

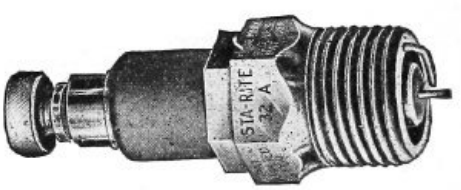
This is a five-magnet machine and can be run at a much lower speed than No. A. It has amply large ball bearings and convenient oilers. Its construction and general principles are the same as No. A.

No. C-M must be gear driven at engine speed and no coil is needed. Starts the heaviest engine easily, and gives more power with less fuel because it gives a hotter spark. The best thing made for make and break spark. Construction and dimensions same as No. C, except that a different winding is used.

SPARK PLUGS.



No. 5—Lower threaded part polished steel, other metal parts polished brass, porcelain, ½ in. gas pipe thread..each $0.90



No. 32A—STA-RITE, mica, lower threaded part polished steel, balance polished brass, 2 point, ½ in. gas pipe thread.....each $1.50

SPARK PLUGS.

No. 55.

No. 4A.

No. 55—STA-RITE, Gotham, ½ in..each $1.00
No. 4A—STA-RITE, Separable, ½ in.. " 1.25

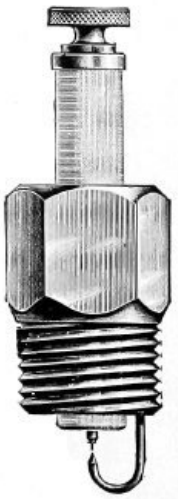
No. 21.

Nos. 23 and 24.

No. 21—DEMUN'S, solid mica, ½ in. standard.....each $1.50
No. 23—MEZGER, soot-proof, all sizes except Winton.....each 1.00
No. 24—MEZGER, soot-proof, Winton extension.....each 1.50
Porcelains for No. 24, extra..... " .30
Sparking Rods for Nos.23 and 24, extra " .10

Never-Miss.

No. 8N—Porcelain ½ in. standard..each $1.00
No. 8A—Mica Metric..... " 1.00
No. 8B—⅞-18 thread..... " 1.00
Porcelains for No. 2, extra..... " .30

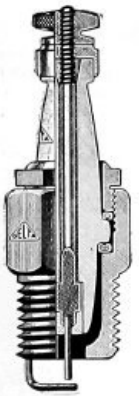


No. 35.

No. 31.

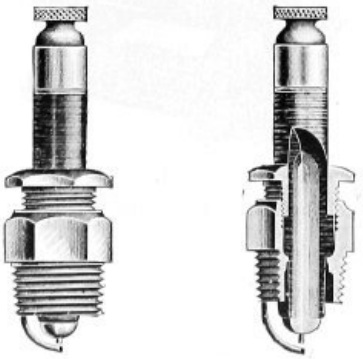
No. 35 —A. B. C. porcelain, ½ in. standard.....each $1.00
No. 31 —TIP TOP, robust style, full brass, porcelain, ½ in. standard, each 1.00
No. 31½—TIP TOP, Metric, porcelain, robust style, full brass.....each 1.00

No. 33.



No. 34.

No. 33—STERLING, porcelain, ½ in. standard.....each $1.50
No. 34—DELTA, porcelain, ½ in. standard.....each 1.50

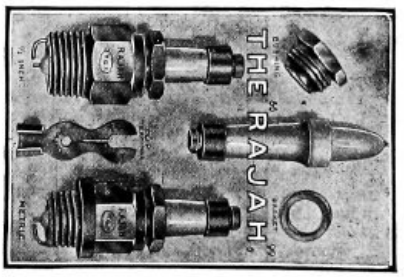


Dow, Mica, Double Insulation.

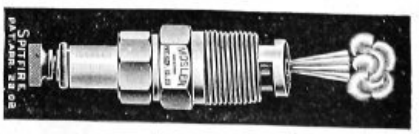
No. 7 —½ in. Metric and autocar...each $1.50
No. 2D—WINTON..... " 2.00
Insulators for Nos. 7 and 8, extra.... " .75

No. 16. No. 16½.

No. 16 —SOOTLESS, open end.....each $1.75
No. 16½—SOOTLESS, closed end..... " 1.75
This plug is especially adapted for use in air-cooled marine and automobile engines that use a large amount of lubricating oil.



No. 17—RAJAH, highest grade, imported hard fire porcelain, ½ in. standard, ½ in. long, ½ in. Columbia, Autocar, Metric.....each $2.00
Porcelains for No. 17, extra..... " .50
Gaskets, extra..... " .10
Bushings, extra..... " .20
Rajah Clip Terminal with post for use with any spark plug, extra.....each .15
Highest grade imported hard fire porcelain of special pattern, securely packed, which ensures against firing through.
Rajah clip terminals are furnished separately with post for attaching to spark plugs of any design or make.
When ordering, state clearly the name of your car and the thread required on spark plug.



Mosler Spit Fire.

No. 9—⅜ in. pipe thread.....each $1.50
No. 10—½ in. pipe thread, short.... " 1.50
No. 11—½ in. pipe thread, long..... " 1.50
No. 12—Metric, 18 mm..... " 1.50

No. 14—Autocar..... " 2.00
No. 15—Knox..... " 2.00

SPARK PLUGS AND CARBURETERS.

SPARK PLUGS.

A plug that will spark in water will spark under any conditions found in a gasoline engine cylinder, for soot, oil, carbon or their combination, cannot be compared with water as a short circuiting medium. Facts and actual tests prove this.

Do not have to be removed from the cylinder, as they positively require no cleaning.

Are adapted for use in both air and water cooled motors.

A reliance clip terminal is furnished with each plug.

Reliance, "Sparks in Water," Porcelain.

No. 1—½ in. standard .....each $1.50
No. 3—Metric ..... " 1.50
No. 6—⅞ in., 18 thread..... ..... " 1.50
⅞ in. 18 thread is also known as A. L. A. M.

SPARK PLUG BUSHINGS.

No. 25—Threaded with metric thread inside, standard ½ in. outside....each $0.15
This little appliance makes it possible to use any high grade French spark plug on any machines.

CADILLAC CORES.

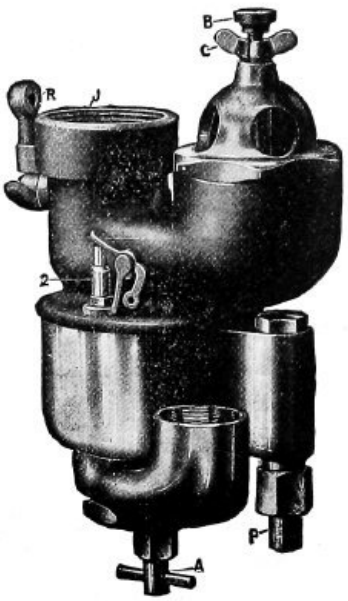
No. 26.....each $0.75

SPARK PLUG BRUSHES.

No. 5G—Presco, wire bristles, hair tuft, 2 tempered thin flat steels.....each $0.25

A very handy article to clean your spark plugs. Has strong wire for grease and dirt, bristle hair for finer parts and two tempered thin flat steels with which to reach inaccessible parts.

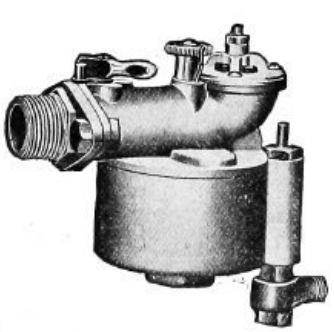
CARBURETERS.



Showing Horizontal Type.
Kingston.

		REGULAR.	WITH WARM AIR CONNECTION.
No. 50—	¾ in. motor cycle size, each.....	$12.50	
No. 51—	¾ in. pipe size...each	12.50	15.00
No. 52—	1 in. pipe size .. "	15.00	17.50
No. 53—	1¼ in. pipe size... "	16.25	18.75
No. 54—	1½ in. pipe size... "	17.50	20.00
No. 55—	2 in. pipe size... "	25.00	30.00
No. 56—	2½ in. pipe size... "	37.50	42.50
No. 57—	3 in. pipe size... "	50.00	55.00

This carbureter may be furnished with either horizontal or vertical outlets in all sizes, except the 2½ and 3-inch, which are made horizontal only.

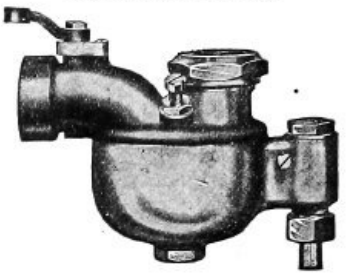


Breeze Automatic.

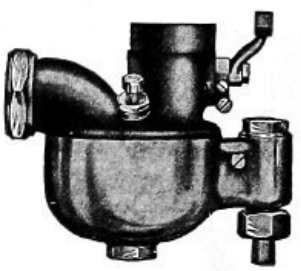
No. 67— ¾ in. pipe size.....each $12.00
No. 68—1 in. pipe size..... " 18.00
No. 69—1¼ in. pipe size..... " 20.00
No. 70—1½ in. pipe size..... " 30.00
No. 71—2 in. pipe size..... " 40.00

Two important features, the non-fluttering auxiliary air valve and the starting device are both new. These are exclusive advantages only found on these carbureters. The No. 67 is especially adapted for motor cycle use.

CARBURETERS.



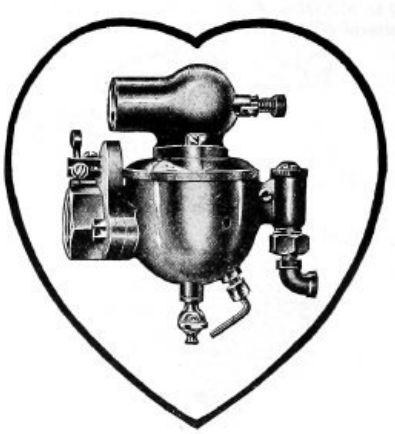
Side Outlet.



Top Outlet.
The Holley.

No. 63—3½ in. to 3¾ in. bore motor, use ¾ in. carbureter.....each $11.00
No. 64—3¾ in. to 4¼ in. bore motor, use 1 in. carbureter.....each 12.00
No. 65—4½ in. to 5 in. bore motor, use 1¼ in. carbureter.....each 13.00
No. 66—5 in. to 5½ in. bore motor, use 1½ in. carbureter.....each 16.00

Points of superiority as follows: No moving parts in the mixing chamber. Therefore, impossible to get out of adjustment. Absolute uniformity. Much lower speeds than any other type Greater flexibility. No flooding. No resistance in mixing chamber. More horsepower.



Schebler, Model "D" Standard, for Automobiles.

No. 80—1 in. pipe size.....each $16.00
No. 81—1¼ in. pipe size..... " 17.00
No. 82—1½ in. pipe size..... " 22.00
No. 83—2 in. pipe size..... ... " 44.00

Model "H", for Motor Cycles.

No. 91— ¾ in. pipe size.....each $15.00
No. 92—1 in. pipe size..... " 16.00

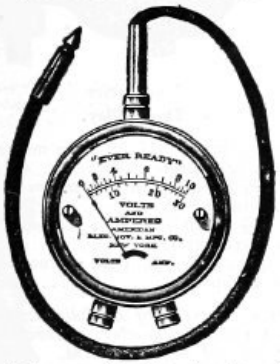
Made of brass. The bowl design combines compactness with practicability. The float is made of cork, heavily shellaced.

AMMETERS, SWITCHES AND TIMERS.

AMMETERS.

No. 1G—2½ in., nickel plated.....each $4.00
The most accurate pocket size instrument on the market. It is a practically dead-beat meter, as there is very little oscillation, and the reading is shown almost instantly. Can be applied to either binding post of the battery, as it indicates in either direction of current.

VOLT-AMMETERS.



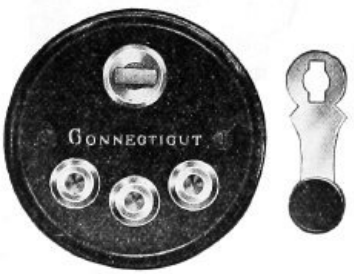
No. 8G—2 in., combination, hand calibrated, accurate.....each $5.00
This is the most efficient and convenient meter on the market. Has two scales, the top reading in volts 0 to 10, and the lower reading in amperes, 0 to 30. Has flexible contact for reading across several cells. Nickel plated vest pocket size.

Connecticut.

No. 11—Combination volt ammeter, 30 amps., 6 volts.....each $5.00
No. 12—Combination volt ammeter, 30 amps., 15 volts.....each 6.00
No. 13—Ammeter, 30 amps.....“ 3.50
No. 14—Voltmeter, 3 volts, 1-10 divisions.....each 3.50
No. 16—Voltmeter, 8 volts.....“ 3.50
No. 17—Voltmeter, 15 volts.....“ 4.00
This instrument is designed to show the exact conditions of your batteries, accurate and handy to carry, furnished with a snap lock hand sewed leather case.

SWITCHES.

No. 27—SPLITDORF.....each $0.90
Plug only, for the above.....“ .10
One of the best switches made, perfect in every detail, removable plug.



Removable Lever.

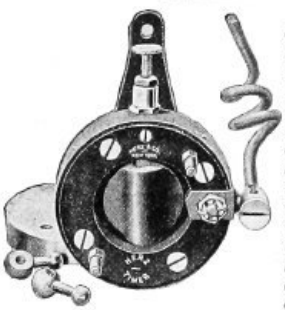
No. 25—CONNECTICUT, type L.....each $1.00
The above switches are of the lock type with a removable lever, and are made of a special grade of spring bronze, ensuring positive contacts.
The back edge is fitted with a soft rubber gasket so that water cannot run down in back and cause a partial short circuit. Arranged to throw in either set of batteries.

This switch is of the combination lever and plug type and is constructed for two batteries or for one battery and magneto or dynamo, either of which may be used singly but not together, removable plug.

No. 26—KINGSTON, with insulated lever knob, each.....$1.20

No. 30—CONNECTICUT, type P, removable plug switch.....each $1.00
This switch is the acme of perfection in plug switches and is made so that rain water cannot run or drive into the sockets. A soft rubber gasket mounted in the back makes it absolutely watertight. In our regular stock type the center hole is used as a holder for the plug when not in use.

TIMERS.



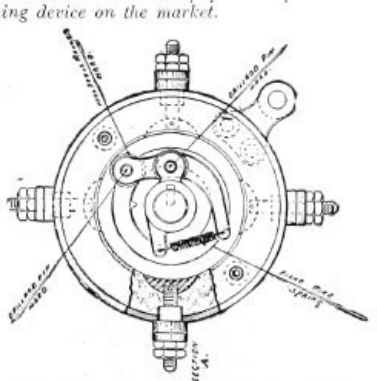
The contacts of the Herz timer are forged out of Sheffield tool steel, there is no vibration at high speed causing irregularity of ignition. Works with any coil, with or without a vibrator and has an air tight dust proof cover. Made to fit any motor.

The Herz.

1 cylinder.....each $ 9.00
2 cylinder, 180° or 90°.....“ 11.00
4 cylinder.....“ 15.00
6 cylinder.....“ 18.00
Ford-Timer.....“ 14.50

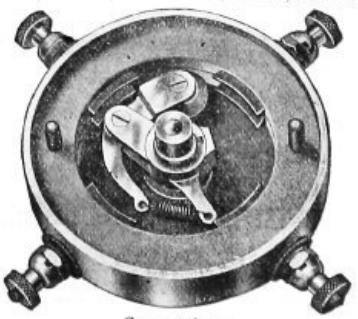
The Guenet.

1 cylinder.....each $ 9.00
2 cylinder.....“ 10.00
4 cylinder.....“ 12.00
The Guenet is the most popular imported French timing device on the market.



“The Milwaukee,” Self-Adjusting Roller.

1 cylinder.....each $ 7.00
2 cylinder.....“ 7.50
4 cylinder.....“ 8.00
6 cylinder.....“ 10.00
This timer is self-adjustable, dustproof and lathe finished throughout.
The main case and cover are cast in nickel aluminum. The waterproof fibre ring is pressed into the case chamber and fastened in place. It has half round pockets milled in it for the pressed-in contact inlets. The stud of each contact inlet is insulated from the case with a fibre ring, fastened in position with a round, slotted, lock nut.



Connecticut.

1 cylinder.....each $7.00
2 cylinder.....“ 7.50
4 cylinder.....“ 8.50
6 cylinder.....“ 9.50
The Connecticut timer is in dust-proof casing, the shaft carrying the contact wheel holder is ball bearing and adjustable from the outside. When ordering, mention size of shaft, whether ½ or ⅝ inch.

CABLES, CONNECTIONS, TERMINALS, ETC.

PIRELLI IGNITION CABLE.

Rubber Covered, Primary.

No. 154—5 mm	per ft.	$0.10

No. 234—12 mm	"	.25

Canvas Covered, Secondary.

No. 154 bis— 7 mm	per ft.	$0.12
No. 194 bis—11 mm	"	.25
No. 214 bis—11 mm	"	.25
No. 234 bis—15 mm	"	.30

Pirelli ignition cable is made by one of the largest and oldest rubber companies in the world, Pirelli & Co., Milan, Italy. Several thousand workmen are employed in the manufacture of ignition wire for submarine use, automobile work and electrical purposes. It is impossible to procure higher grade materials. The quantity and different grades of rubber used together with the fine drawn tinned copper wire makes it an ideal conductor of electrical energy. The rubber cable is so flexible that it can be wound around the finger without breaking either the wires or the rubber insulation. Used by all the prominent manufacturers in Europe and America.

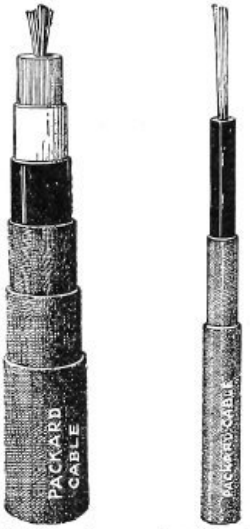
ONE ASSORTMENT IN A BOX.

PACKARD AUTOMOBILE COMBINATION CABLE.



High Tension. Low Tension.

Packard High Tension, forty strands, 3 insulations of high grade ribbon, protected by three guards and four coats of special enamel.

No. 4 ..... per foot $0.25

Is very flexible and almost impossible to short circuit.

Packard Low Tension; core same as the high tension; one covering of rubber and two braids; and coat of enamel.

No. 5—Single strand	per foot	$0.12
No. 6—Two strands	"	.25
No. 7—Four strands	"	.50

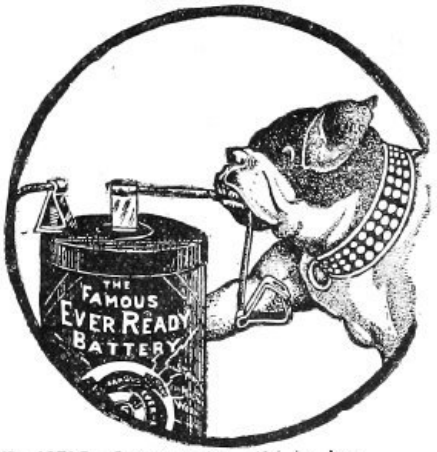
SIMPLEX AUTOMOBILE CABLE.

Rubber covered, water proof insulation, saturated, cambric tapes over rubber, making it impervious to oil varnished braids, insuring a tough and lasting exterior high voltage resistance.

No. 8—Primary	per foot	$0.10
No. 9—Secondary	"	.20
No. 1—Primary wire (14 strands), black, per foot		.05
No. 2—Secondary wire (27 strands), black, per foot		.08
No. 3—Secondary wire (high tension 39 strands), black	per foot	.12

There is nothing better on the market for automobile use or stationary work.

BULLDOG BATTERY CONNECTORS.



No. 1071G—Copper grips, 4½ in. long, per dozen $0.90

Is easily attached and will not come loose.

TERMINAL CONNECTIONS.

	PER DOZEN.	PER 100.
No. 1072G—Length 5 in	$0.30	2.50

These are very useful and handy; they consist of two wire terminals attached to either end of a plaited silk covered wire cable; soldered at both ends.

CABLE TERMINALS.

No. 1073G—HERZ'S, detachable, per dozen $1.20

This device, which has scored an unprecedented success both here and abroad, does away with all the trouble resulting from improper wiring, and at the same time affords the enormous advantage of making the best possible contact, or making disconnection in one second.

No soldering. Quick detachment.

VALVE GRINDING SETS.

No. 10—BROWN, a compact, light, mechanical valve grinder and lifter, a valuable tool for every factory, garage and private owner, complete. ...per set $6.50

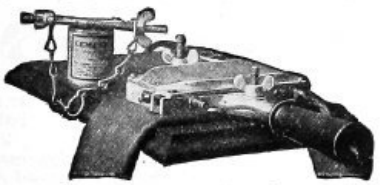
For seating valves.

VALVE GRINDING MATERIAL.

No. 35G—RAPIDCUT, used in connection with valve grinding machines. per can $0.25

VULCANIZERS, GAS TANKS, FLASHLIGHTS, ETC.

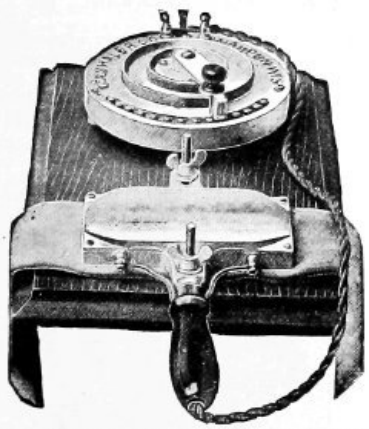
ELECTRIC VULCANIZERS.



Shaler, Portable, Type D.

No. 81—Iron model .....each $12.50
No. 82—Aluminum model ..... " 15.00

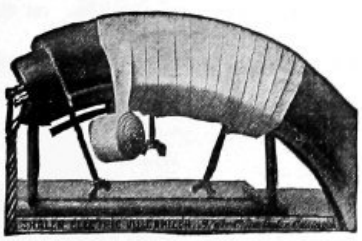
Works on alternating current only, is designed to supply a machine at a price less than Type B and retains its general shape and characteristics with the exception that thermostatic heat control is substituted for the rheostat.



Shaler, Portable, for Repairing Inner Tubes, Type B.

No. 51—Iron model .....each $20.00
No. 61—Aluminum model ..... " 25.00

Works on alternating or direct current, and has a rheostat which gives absolute heat control. It will repair in 15 minutes a cut of any size on a tube, making tube as good as new; it will repair a cut in casing without removing tire from wheel or wheel from car, thus preventing "Sand pockets" and "Blow-outs." Costs one-half cent per hour to operate and requires no experience.



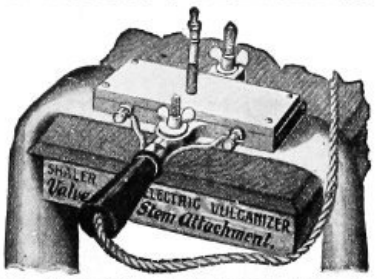
Shaler, Exclusively for Outer Casings, Type C.

No. 71—Iron model .....each $20.00

Works on alternating current only and has thermostatic heat control.

Will mend any blow-out or tear in outer casing that is practical to mend on any size tire 2½ to 5 inches. Vulcanizer is 14 inches long and applies the heat directly to inside of tire where repair should be made; will strengthen all weak spots in the canvas, renew the canvas, or reline entire tire. Type B or D should be used with type C to cut down time of operation one-half. Indispensable for a garage.

ELECTRIC VULCANIZERS.



Shaler, Valve Stem Attachment, Type B. V. for Repairing Valve Stems.

No. 52—Iron model .....each $ 8.50
No. 62—Aluminum model ..... " 10.00

Type BV, as special form iron for vulcanizing valve stems on inner tubes which is interchangeable with regular form iron supplied with Type B machine.

VULCANIZING SUBSTITUTES.

M. and M. Acid Cure Solution, for Repair Tubes, Tires and Any Article Made of Rubber.

No. 10—Containing ½ pint each of cement and acid cure.....per can $1.00
No. 11—Containing 1 pint each of cement and acid cure.....per can 1.50
No. 12—Containing 1 quart each of cement and acid cure.....per can 2.75

This combination is used for repairing automobile tubes and tires and any article made of rubber. It makes the repair permanent, as it produces the same effect as vulcanization instantly. The acid cures the cement to the rubber or part to be repaired, which makes it one solid piece of rubber and impossible to separate without tearing.

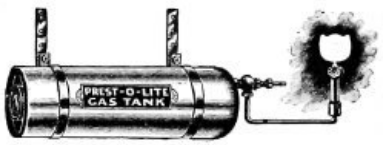
M. and M. Automobile Repair Kit, for Repairing Tire Tubes, etc.

No. 20—Outfit consists of ¼ pt. m. & m. cement, ¼ pt. acid cure solution, 1 cement brush, 1 acid brush and emery cloth, neatly packed in slide cover box, complete outfit.....each $1.00

VULCANIZING OUTFITS.

No. 15—Consisting of ¼ pt. cement, ¼ pt. vulcanizing solution, 2 brushes, in neat box, complete outfit.....each $1.00
For repairing inner tubes.

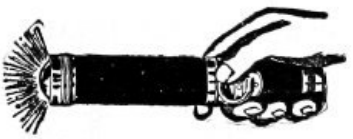
AUTOMOBILE GAS TANKS.



Prest-O-Lite, Seamless Steel, Copper Plated, with Bands or Straps to Fasten to Car.

No. 1—6×20 in., small, capacity 40 cubic feet of gas.....each $25.00
No. 2—22×7¼ in., large, capacity 70 cubic feet of gas.....each 35.00

"EVER READY" ELECTRIC FLASHLIGHTS.



No. 1G—8½×1½ in., leatherette cover, nickel trimmings, w't 20 oz.....each $1.50

No. 14½G—8½×1½ in., fibre cover, nickel trimmings, large lens, highly polished reflector, w't 22 oz.....each $2.75

No. 25G—3½×2¾×1 in. fibre case, nickel trimmings, w't 8 oz. each..... $1.25

REGULAR BULBS.

No. 118G.

No. 110G.

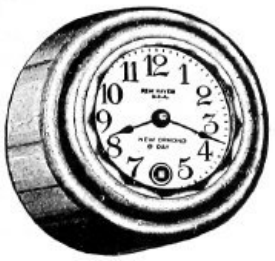
No. 118G—3½ volts, for No. 25G flashlights.....each $0.35
No. 110G—3½ volts, for Nos. 1G and 14½G flashlights.....each .35

FLASHLIGHT BATTERIES.

No. 10G—7×1⅜ in., tubular, for Nos. 1G, and 14½G flashlights, w't 10 oz..each $0.30
No. 180G—3¼ ×2½ in., rectangular, for No. 25G flashlights.....each .30

AUTOMOBILE SUNDRIES.

AUTO CLOCKS.



No. 12G—NEW ORMAND, 3 in. porcelain dial, heavy brass dust proof case, large black distinct numerals, runs 8 days with one winding, height 4 in., width 4 in., w't 2 lbs. ..... each $8.00

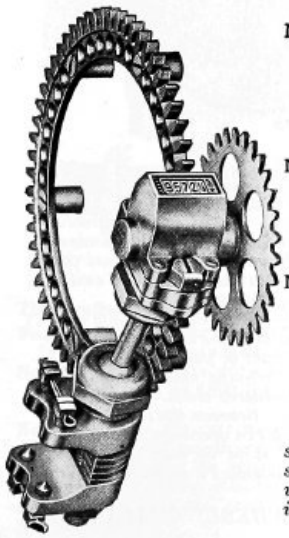
No. 11G—SAVANNAH, 3 in. porcelain dial, heavy brass case, so constructed that no keys or levers are on any part of the front or side of the case, large black distinct figures, runs 8 days with one winding, height 4½ in., width 4⅛ in., w't 2¼ lbs. ..... each $9.00

To wind the above clocks, the water-tight bezel is unscrewed and when replaced the case is free from keys or levers, giving the clock an absolutely plain, smooth surface.

When a car is in motion, it will not affect these clocks, as they are made to withstand the shocks and jars to which they are subjected.

ONE IN A BOX.

ODOMETERS.



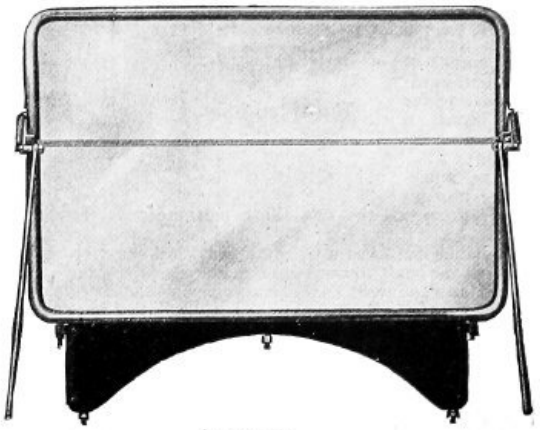
No. 17 —VEEDER, regular for horse drawn vehicles, and very light automobile runabouts, w't 7½ oz., each $3.50

No. 18A—VEEDER, with star wheel and striker instead of spur gear, w't 10 oz., each $7.00

No. 18B —VEEDER, with spur gear, absolutely dust and waterproof, for high speed automobiles, w't 10 oz. each $10.00

When ordering, be sure to specify the size of wheel for which the odometer is wanted.

FOLDING WIND SHIELDS.



Automatic.

No. 10—40 in. wide ..... each $35.00
No. 11—44 in. wide ..... " 37.50

Filling in pieces extra according to model of the car.

This Wind Shield is now the most popular in the market. It is the only folding wind shield that is automatically opened or closed, or that can be operated by the driver with one hand without stopping the car.

There are no bolts or nuts to adjust—taking down or putting up is all done by a double spring action—patented.

This is a tempered phosphor bronze spring which absolutely prevents the rattling of the glass. No other wind shield has this "anti-rattle" device.

The Automatic Wind Shield is made entirely of brass and plate glass, and makes a very attractive addition to any car. The frame is special shape brass tubing thereby reducing weight to the minimum. The supporting bars telescope into each other, making it possible to lengthen or shorten them without sawing off the ends.

Perfect.

No. 5—For runabouts, 39 in. wide, 31 in. high ..... each $25.00
No. 6—For touring cars, 43 in. wide, 35 in. high ..... each 25.00

Solid mahogany frame, brass bound edges, cherry finish, two pieces. French plate glass, polished brass trimmings throughout.

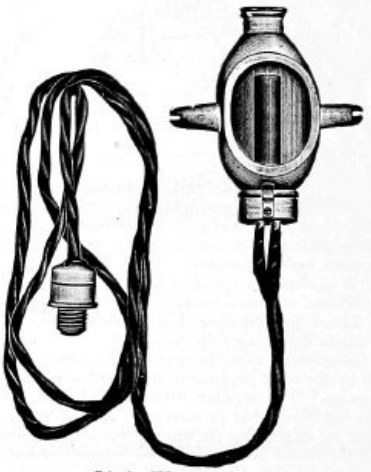
The catch is novel and positive, shield can be lowered or raised by the driver while the car is in motion. Simple in construction, and will not rattle.

TOP RESTS.

No. 25—HENDERSON, 10 in. long, made of ⅛ in. cold rolled steel, heavily enameled in black, lined with high grade soft black felt ..... per pair $2.50

Appliable to either carriages or automobiles, will catch the top when in a folded position. Prevents the bows of the top when folded up from bending or breaking, also from jarring and rocking sidewise.

VULCANIZERS.



Little Wonder.

No. 1—Regular iron outfit, any size, complete ..... each $ 6.00
No. 2—Regular aluminum outfit, any size, complete ..... each 7.00
No. 3—Electric heater outfit, iron, complete ..... each 11.00
No. 4—Electric heater outfit, aluminum, complete ..... each 12.00

Gives no smoke, no trouble, but does give perfect control. Can be used on any 110 volt lamp socket, direct or alternating current. Complete with attaching plug, and equipped with the Hubbell detachable plug and new code lamp cord.

INNER TUBE BRACKETS.

Little Wonder.

No. 5—Inner tube bracket and flat surface plate, iron ..... each $2.00
No. 6—Inner tube bracket and flat surface plate, aluminum ..... each 2.50

Parts For the Above.

Little Wonder Cement ..... per can $0.25
Para Rubber, 80 gauge ..... per foot 2.00
Para Rubber, 40 gauge ..... " 1.25
Vapor Lamp Heaters ..... each .50
Thermometers ..... " 1.00
Electric Heater, complete ..... " 5.00
Single Friction Canvas ..... per foot .50
Double Friction Canvas ..... " .75

STEWART SPEEDOMETERS.

Stewart Speedometers are recognized the world over as the standard in speedometer construction. They combine features of workmanship, material, construction, equipment and performnace that have never been equaled by any speed indicator at any price.

Other features that make Stewart speedometers superior to all others are indisputable accuracy, the non-vibrating, non-fluctuating pointer, the evenly spaced scale, instantaneous indication of every change of speed.

Equipment.—All models, irrespective of price, have the same high quality equipment of flexible shaft, swivel joint and gears, features responsible for the elimination of all shaft troubles.

The Swivel Joint.

The core in the Stewart Flexible Shaft consists of a number of file-hard units, hooked together into a chain which revolves in a tube formed by coiling a flat, hard-ened and tempered steel ribbon, the inside surface of which presents a hard, smooth, cylindrical bearing for the core, the whole enclosed with a protecting and orna-mental casing of brass. This construction insures a shaft that has sufficient stiffness to absolutely prevent short bends—by far the costliest construction used by any speedometer manufacturer, but absolutely certain to give the longest service and the least trouble.

The Stewart Swivel Joint.—Of all the refine-ments and improvements in speedometer construction, there is probably no one feature that has brought speedometers nearer the ideal than the unique Stewart swivel joint, conceded to be the greatest advancement—the one thing most needed. It makes perfect what was granted to be the weakest point in the equipment of a speed indicator.

Before the advent of this swivel, the flexible shaft was usually carried down the dash and then bent at a right angle, passing through the springs to the front right wheel. The sharp bend caused the shaft to crystallize and break, or the car, jolting over rough ground, would compress the springs and crush the shaft. The Stewart swivel joint obviates the right angle bend, allowing the shaft to be carried directly from steering arm clamp to the dash along the frame of the car without passing through the springs—a method still followed in some other constructions.

This small, compact, internally locked swivel is not to be confounded with the bulky, clumsy and complicated non-swivel devices now being used to meet the demand that this unique swivel has created and which protect users of speedometers against the shaft breakages and annoyances caused under the old method of installation.

No. 12.

No. 11.

No. 12—3 in. 50-mile dial, enclosed season odometer .....each $15.00

This model is exactly the same instrument sold last season as the American at $25, excepting that it is made with a 3 in. dial. There is no cheapening in any feature; the workmanship and quality are the same; the construction has even been improved.

Will indicate speed as high as fifty miles per hour, and is equipped with an enclosed season odometer with capacity of 10,000 miles and repeat.

No. 11—4 in. 60-mile dial, enclosed season odometer and auto-matic resetting trip register.....each $25.00

Something entirely new in speedometer construction; an instrument that is to be the most popular of the 1909 season. It will indicate speed from 0 to 60 miles. The regular Stewart models do not indicate speed less than five miles per hour, but to meet any demand they have provided in this model a means of indicating the slowest turn of the wheel. The needle, or hand, acts from the center of the dial, which arrangement permits the use of a scale three times as long as used on ordinary speedometers, making it the most easily read indicator on the market.

No. 4.

No. 5.

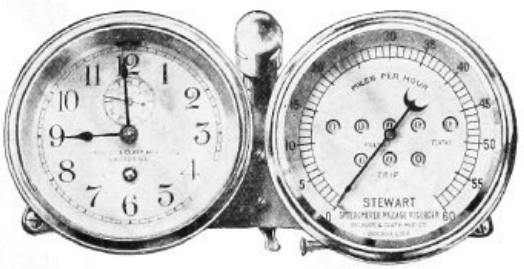
No. 4—4 in. 60-mile dial, enclosed season odometer and auto-matic resetting trip register, and maximum speed hand ....each $40.00

This speedometer indicates speed up to 60 miles. The scale is evenly spaced, making it possible to read the speed without confusion, and is equipped with enclosed season odometer and trip register, which records the mileage up to 10,000 miles and repeats.

The maximum speed hand is carried forward by the speed indicator hand and may be reset by means of a push button, with no possibility of derangement, nor placing additional strain on the indicating mechanism.

No. 5—4 in. 90-mile dial, enclosed season odometer and auto-matic resetting trip register, and maximum speed hand ....each $50.00

In every feature a duplicate of the No. 4, as described above, except that it is made to indicate speed as high as 90 miles. This is an exceptionally handsome instrument and is very popular for use on high powered cars.



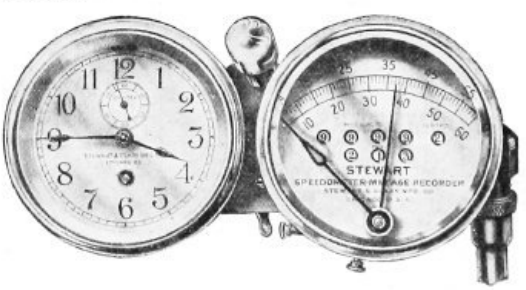
No. 10—Clock combination, with 60-mile speedometer and 8-day Chelsea clock.....each $60.00

This combination is equipped with the regular No. 11 Speedometer, and the 4 in. dial, 8-day Chelsea clock, mounted on a heavy handsomely finished brass base, with an electric light arrangement.

The speedometer will indicate speed from 0 to 60 miles, and will register even the slowest turn of the wheel. The indicating hand or needle acts from the center of the dial and permits the use of a scale three times as long as used on ordinary speedometers. A season and trip odometer including the new trip resetting feature are other very important improvements of the Stewart speedometers.

The clock is the best on the market for use on automobiles, as it is built to withstand the jolting and jarring to which it is subjected.

The combination also includes an electric light arrangement encased in a brass tube or port in the center of the instrument, so as to throw equal light on both the clock and the speedometer at the same time, and is complete with wires and switch.



No. 9—Clock combination, 60-mile speedometer, and 8-day Chelsea clock.....each $75.00

The most attractive automobile accessory ever offered the motoring public. Comprising a 4-in. seven-jewel Chelsea clock and No. 4 Stewart speedom-eter, mounted on a beautifully finished brass base equipped with a brass post containing an electric light. The outfit is complete with electric wire and switch, by means of which the light may be turned on or off as required.

The name "Chelsea" speaks for quality of the clock portion of this com-bination; Chelsea clocks are the very best the market affords for automobile use—the severest test to which a clock mechanism could be put.

The speedometer used is the regular Stewart 60-mile model, exactly the same instrument as supplied if speedometer were ordered alone. The base is of brass, finished to match clock and speedometer. Between the two a post is stepped, somewhat higher than the instrument, with two openings, so arranged that the light from a concealed electric globe will shine on both speedometer and clock. Under the base of the combination is installed a switch completely wired, ready to attach to dry batteries.

WHEN ORDERING, STATE NAME AND MODEL OF CAR, ALSO DIAMETER OF TIRE ON FRONT WHEEL. GUARANTEED ABSOLUTELY FOR FIVE YEARS.

SHOCK ABSORBERS, RECOIL CHECKS, ETC.

SHOCK ABSORBERS.

The Sager equalizing spring is of the barrel spring pattern which has one decided advantage over other types of coil springs, namely, that it admits of easy action within a certain limit, or at the point where circle of spring is largest. The small coils at each end are much stiffer and come into play only when needed, at a time when an overload is applied or a violent rebound occurs.

The Sager Equalizing Spring.

No. 50—Consisting of *four* springs with the necessary parts for attaching, per set..... $30.00

No. 5—Consisting of *two* springs, with the necessary parts for attaching, per set..... 15.00

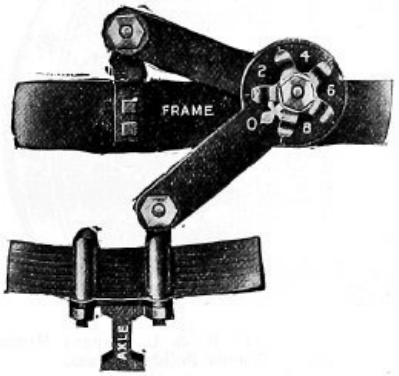
Contrary to the purpose of the Equalizing springs the Flexibles are to be used in connection with springs somewhat stiff. They carry the initial weight of the car, and are brought into action before the flat springs are disturbed in the least, thus taking up all the inequalities of the road before being transmitted to the body of the car and its occupants.

Like the Sager equalizing spring, there are no parts to work loose and they are constructed without any complications whatever.

The Sager Flexible Spring.

No. 60—Consisting of two springs, and the necessary attachment parts, per set $17.50

When ordering, always state name, model, and year of car, to avoid unnecessary delay.



The Truffault Hartford, Made of Heavy Steel.

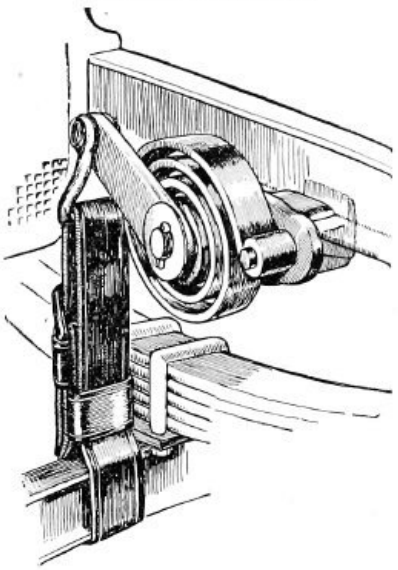
No. 70—Standard, for cars weighing *over* 1800 lbs. (four suspensions)...per set $60.00

No. 80—Intermediate, for cars weighing *from* 1200 lbs. to 1800 lbs., (four suspensions).....per set 40.00

No. 90—Junior, for cars weighing *up to* 1200 lbs. (four suspensions)...per set 25.00

Proper control of the springs prevents excessive oscillation and thereby insures less wear and tear, longer life of tires and greater speed and comfort for passengers.

RECOIL CHECKS.



Heavy Spring Steel Coil with Leather Strap for Holding the Spring to the Axle.

No. 90—Light, for light weight cars, per set (4)..... $20.00

No. 9—Light, for light weight cars, per pair..... 12.00

No. 100—Medium, for medium weight cars.....per set (4) 25.00

No. 10—Medium, for medium weight cars.....per pair 15.00

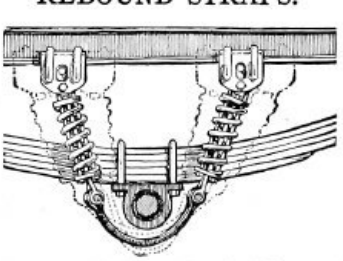
No. 110—Heavy, for heavy weight cars, per set (4)..... 25.00

No. 11—Heavy, for heavy weight cars, per pair..... 15.00

This check can be attached in less than a minute; drawing up the strap allows for any tension desired, does not act on the downward motion, but stops easily, and without jerk, any recoil due to reaction of springs.

The cut shows the method of attaching to either front or rear of car.

REBOUND STRAPS.



Two Heavy Steel Springs, Two Bolt Eyes, to Connect or Fasten to Frame, and Heavy Leather Strap Passing Under Axle.

No. 120—For light weight cars, per set (4)..... $15.00

No. 12—For light weight cars, per pair 8.00

No. 130—Medium, for medium weight cars.....per set (4) 20.00

No. 13—Medium, for medium weight cars.....per pair 12.00

No. 140—Heavy, for heavy weight cars, per set (4)..... 25.00

No. 14—Heavy, for heavy weight cars, per pair..... 15.00

Our patented clamp can be permanently fastened to any pressed steel frame by tightening one nut. Can be instantly adjusted for any tension. Absolutely prevents broken springs. In ordering state make and model of car.

AUTOMOBILE BUMPERS.

"Defender," Heavy Steel Bumper Bar and Brackets, Trimmings Heavily Brass Plated and Polished.

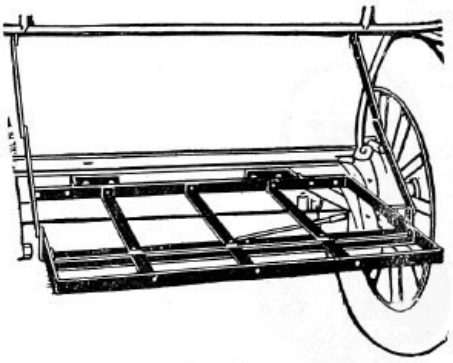
No. 2—Full polished brass finish..each $25.00

No. 3—Oven-baked black enameled bumper bar, otherwise same as No. 2, each..... 18.00

By the use of automobile bumpers all possibility of damaging the lamps or fore part of the car is entirely eliminated. They are adapted to any style car and can be put on in a few minutes, by adjusting the side-bar brackets.

Always give the diameter and length of springs bolts and name and model of car, when ordering.

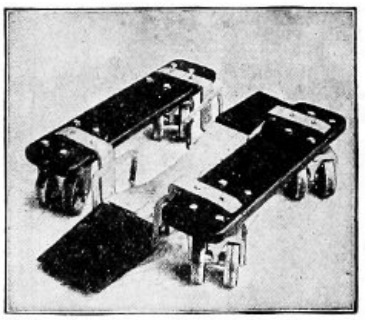
TRUNK RACKS.



No. 10—CRADLE, all steel construction, no castings, the lightest, strongest, simplest and neatest luggage carrier on the market, easily attached to any car, finish in black enamel baked on, easily adjusted.....each $8.00

No tourist has his car quite complete without a luggage carrier, its convenience appeals to every owner who takes country runs; a couple of suit cases, a small trunk or bundles, can be strapped on in a moment.

AUTOMOBILE TURNTABLES.



The Standard.

No. 22—With wooden runways, per pair $15.00

No. 23—With steel runways... " 18.00

The Standard is capable of carrying 2½ tons each, or 5 tons to the pair. Car can be put on from either side. Will not run away from the car, nor will it tip. A child can handle a car on these turntables. The boards and runaways have three coats of paint and the steel parts three coats of aluminum enamel.

AUTOMOBILE OIL AND GAS LAMPS.

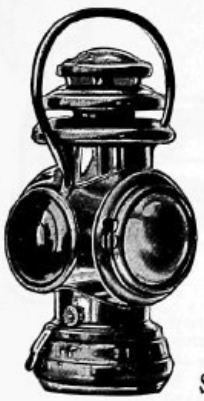
TAIL OIL.

The best tail lamp ever offered to the public for the money.

The patent locking device prevents oil fat from dripping out.

Polished Brass.

No. 1—4 in. face, 8½ in. high, *without* bail.....each $2.50
No. 2—3 in. face, 9¾ in. high, *without* bail.....each 3.00
No. 3—3 in. face, 12½ in. high, *with* bail.....each 3.50



Has a standard 3 in. ruby semaphore rear lens and is suitable for all types of cars.

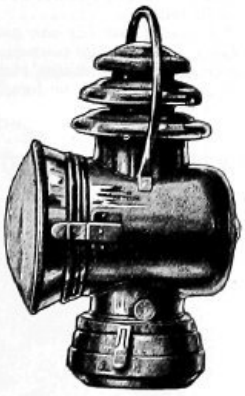
The "Dainty" Tail Lamp gives a light of 10 candle power, and will not blow out under the most trying conditions.

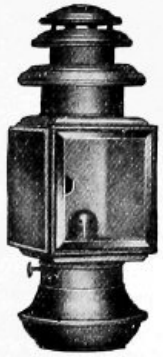
No. 403—DIETZ DAINTY, Tail Lamp, oil, height 11½ in., polished brass, 3 in. ruby semaphore rear lens.....each $4.00

SIDE OIL.

The Dietz "Dainty" Motor Car Lamp in appearance well befits its name, "Dainty." It is the ideal runabout lamp and gives a light of 13 candle power.

No. 402—DIETZ DAINTY, oil, height 11¾ in., polished brass..each $3.75



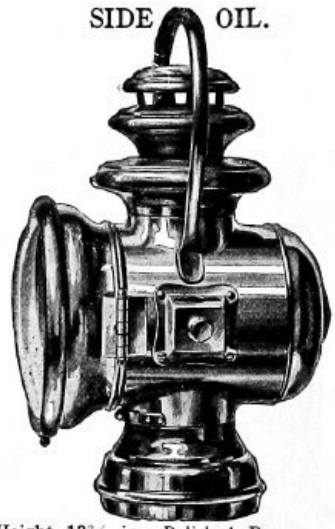


The frames of these lamps are very strong. The glass is heavy bevel plate, silver lined. The oil fount is held by a specially constructed fastener.

Polished Brass, Plate Glass Lights.

No. 11—Height 12 in., glass 4×4¼ in., each..... $ 4.00
No. 22—Height 13 in., glass 5×5 in., each..... 5.00

SIDE OIL.

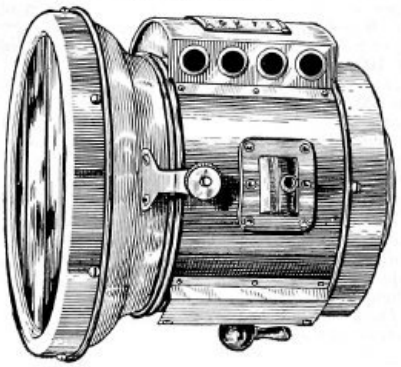


Height 13¾ in., Polished Brass.

No. 400—DIETZ ROYAL, oil.....each $9.00
No. 401—DIETZ ROYAL JUNIOR, oil.. " 7.00

The No. 400 gives a light of 65 candle power; the No. 401, 45 candle power. Both Nos. contain a highly polished silvered reflector.

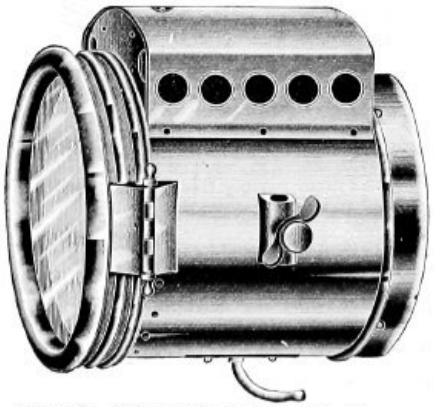
SIDE GAS.



20th Century, Flare Front, Polished Brass, Mangin Mirror Lens, Sectional Front Lens.

No. 106—6 in. diam. of body....each $10.00
No. 107—7 in. diam. of body.... " 12.00
No. 108—8 in. diam. of body.... " 15.00

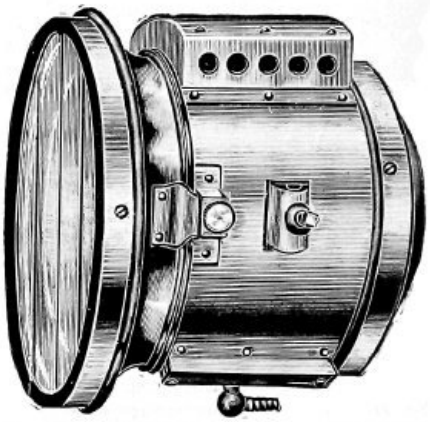
The brass is of heavy gauge, and will meet all requirements for a high grade lamp.



Columbia, Polished Brass, Adjustable Burner Mirror Lens.

No. 516—6 in. lens, w't 5 lbs.....each $14.00
No. 517—7 in. lens, w't 7 lbs..... " 16.00
No. 518—8 in. lens, w't 9 lbs..... " 22.00

SIDE GAS.



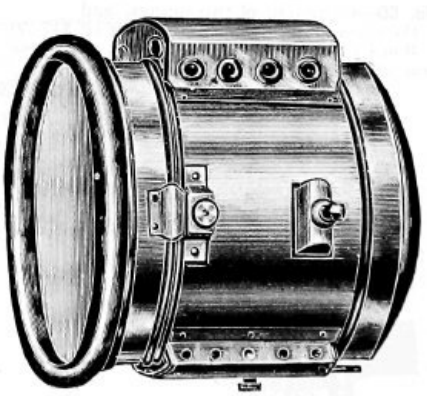
Flare Front, Crescent Lens Mirror, Adjustable Burner, Heavy Gauge Brass, Highly Polished.

No. 06—Height 7½ in., depth 8 in., front 7½ in.....each $10.50
No. 07—Height 8½ in., depth 8½ in., front 8½ in.....each 11.50
No. 08—Height 9¾ in., depth 9½ in., front 9½ in.....each 14.00
No. 09—Height 10½ in., depth 9½ in., front 10½ in.....each 18.00

Popular acetylene gas head light equipped with B. and L. mangin mirror; reflector and sectional front lens projecting a very powerful light. This lamp is made with adjustable burner, which enables one to focus the light to any desired point. Made of heavy gauge brass and highly polished.

No. 656—Height 7½ in., depth 8 in., front 7½ in.....each $5.00
No. 757—Height 8½ in., depth 8½ in., front 8½ in.....each 6.00

The above lamps are the same in size and appearance as Nos. 06 and 07 respectively, except that they have plain lenses and French glass mirrors. Solid lenses not sectional.



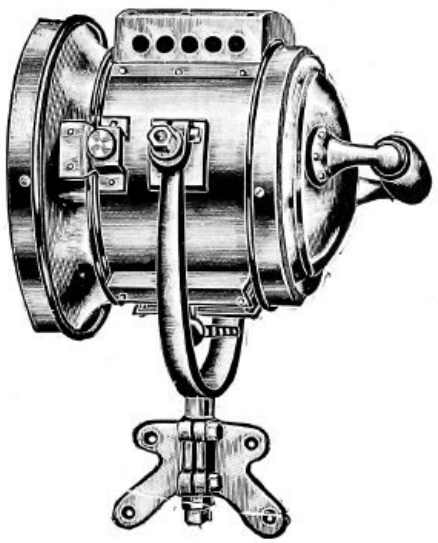
Barrel, Rolled Front, B. & L. Mangin Mirror Reflector, Highly Polished Brass.

No. 55—Height 9½ in., depth 7¼ in., front 6 in.....each $ 9.00
No. 56—Height 10½ in., depth 7½ in., front 7 in.....each 10.25
No. 57—Height 11½ in., depth 8¾ in., front 8 in.....each 12.00
No. 58—Height 12½ in., depth 9½ in., front 9 in.....each 13.50

The most popular searchlight type of acetylene gas headlight made. Equipped with B. and L. mangin mirror reflector, which projects a very powerful light.

SEARCHLIGHTS AND GENERATORS.

SEARCHLIGHTS.



Flare Front, Crescent Lens Mirror, Swinging Swivel Brackets, Polished Brass.

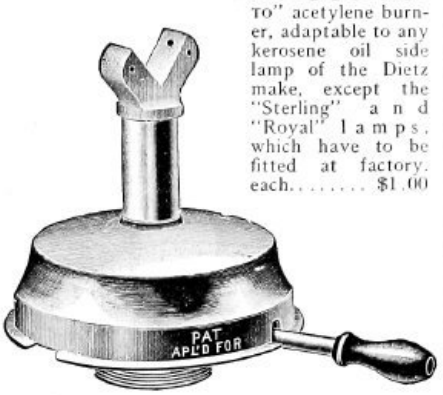
ACETYLENE LAMP BURNERS.

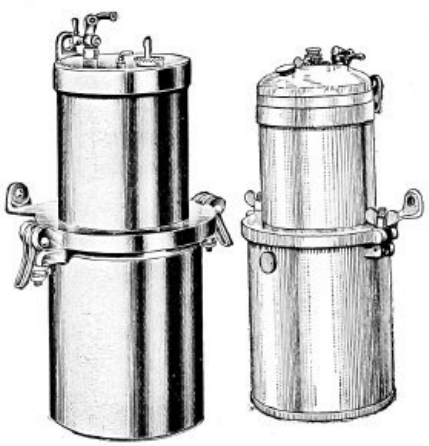


No. 10—DIETZ "PRESTO" acetylene burner, adaptable to any kerosene oil side lamp of the Dietz make, except the "Sterling" and "Royal" lamps, which have to be fitted at factory, each..... $1.00

BRASS AND RUBBER GAS TUBING.

¼ in. Flexible Brass Tubing..... per foot $0.12
Red Rubber Gas Tubing, A grade, " .10
Red Rubber Gas Tubing, B grade, " .08
Made of especially prepared stock.

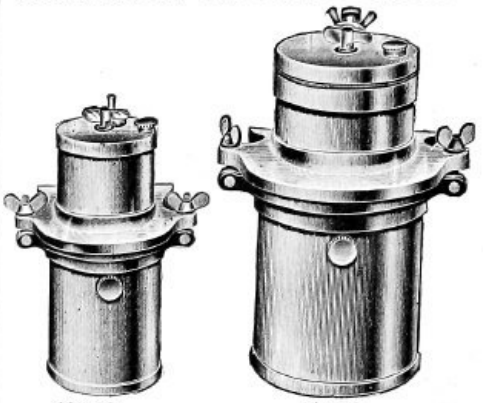
ACETYLENE GAS GENERATORS.



No. 5. No. 19.

No. 5—COLUMBIA, polished brass 15 in. high, 8 in. in diam., lower bracket holes, 5 in. center to center, with upper adjustable bracket, 2½ to 5 in. from lower, carbide capacity 3½ lbs., for two lamps..... each $15.00
No. 19—20TH CENTURY, polished brass 12 in. high, carbide holder 5 in. in diam., capacity 1½ lbs..... each 10.00

ACETYLENE GAS GENERATORS.

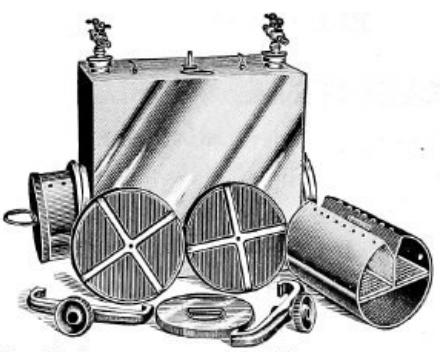


No. 30. No. 40.

1909 Crescent, Gas, Extra Heavy Gauge Brass, Automatic.

No. 30—Capacity 1¼ lbs. carbide, height 11 in., width 7 in. ..... each $6.80
No. 50—Capacity 1¼ lbs. carbide, height 12 in., width 5½ in. ..... each 6.50
No. 40—Capacity 2¾ lbs. carbide, height 12 in., width 8½ in. ..... each 8.40
No. 60—Capacity 3½ lbs. carbide, height 15 in., width 8 in. ..... each 7.50
Made of extra heavy gauge brass and are the very latest type of modern generator. Easy and simple to operate, automatic in action; by one turn of the valve the water and gas may be turned on or off instantaneously. Has water jacket surrounding the carbide chamber, keeping gas constantly cool and thereby producing a white flame.

No. 1—COLUMBIA, operates one burner, capacity 20 oz. carbide, diameter 4 in., height 10 in., w't 3½ lbs. ..... each $ 9.00



No. 3—COLUMBIA, two carbide cups, two separate water valves, capacity 56 oz. carbide, height 11 in., length 12½ in., w't 14 lbs. ..... each $15.00

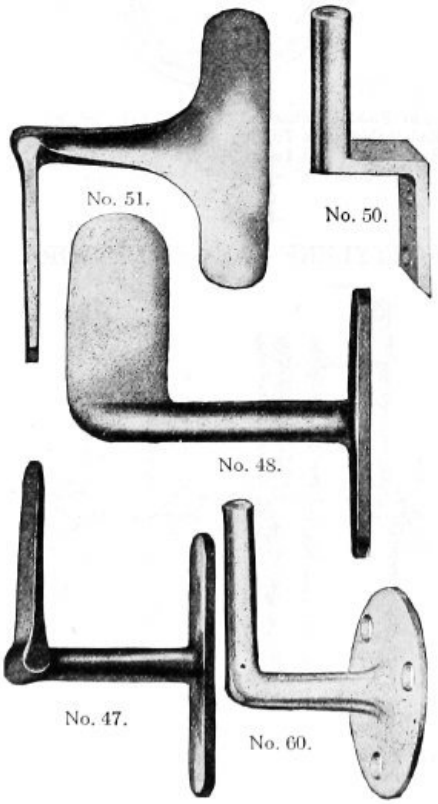
No. 4803.

No. 4804.

No. 4803—Polished brass, for cars of Cadillac A type, where brackets fasten on side of board, and for tail lamps having socket for flat lip brackets, per pair $1.90
No. 4804—Polished brass, for tail lamps, per pair..... 1.85

SIX BOLTS WITH EACH PAIR.

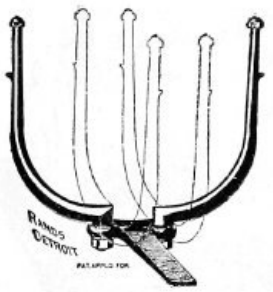


No. 51. No. 50. No. 48. No. 47. No. 60.

Polished Brass for Side and Tail Lamps.

No. 47—Side.....per pair $1.25
No. 48—Side..... " 1.25
No. 51—Side..... " 1.25
No. 50—Tail.....each .40
No. 60—Tail..... " .40

AUTOMOBILE LAMP BRACKETS.



Adjustable.

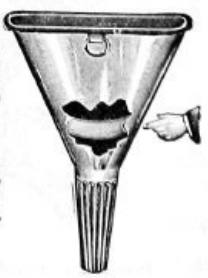
No. 4805—RAND'S, brass plated and polished, drop forged adjustable props, very strong and practical.....per pair $4.25

GASOLINE FUNNELS.

Movable Hoop for Chamois Strainer.

No. 20G—2 qt., 8½ in. diam. top, 9½ in. high, coppered.....each $0.75
No. 40G—4 qt., 9¾ in. diam. top, 11 in. high, coppered.....each 1.00
No. 80G—8 qt. barrel size, 12½ in. diam. top, 12 in. high, coppered. .each 1.25

These funnels are especially designed for filling auto gasoline tanks and barrels. They have hoop around top to prevent slopping, and besides having a fine brass wire strainer there is also an extra outside hoop for holding a chamois strainer. They also have large fluted tubes so that the gasoline will run through fast and not become air-bound.



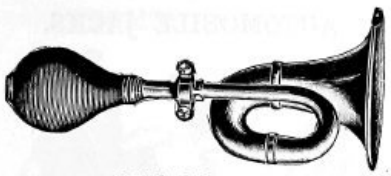
No. 02G—Light weight, 1 qt., 3½ ×8 in., coppered..... each $0.50

Extra Heavy Weight.

No. 1G—1 pt., 2½×7 in., coppered...each $0.75
No. 2G—1 pt., 3½ × 8¼ in., coppered each $0.85

These funnels are made especially to carry on auto; oval shape, occupy small space, have an extra large spout so that while the body is small the gasoline will run through the funnel very fast—an important feature. The tube on funnel is fluted, so that it will not get air-bound while pouring.

AUTOMOBILE HORNS AND PARTS.



Polished Brass.

No. 4—3½ in. bell, length 9¾ in...each $1.60
No. 6—4⅜ in. bell, length 12 in.... " 2.00

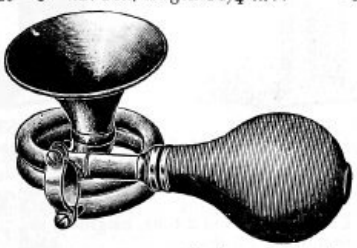
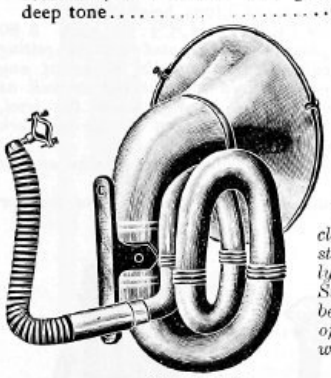
No. 10—6 in. bell, length 14¾ in.. " 3.00



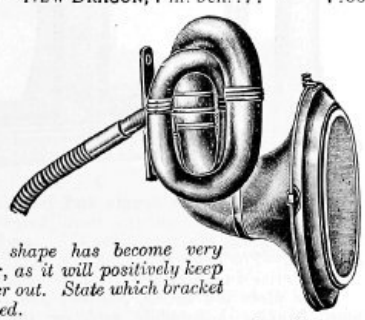
No. 726—Bull Frog, 4¼ in. polished brass bell, with double coil, giving a deep tone.....each $3.00



With a close bent coil, straight or lyre bracket. State size of bell and style of bracket wanted.

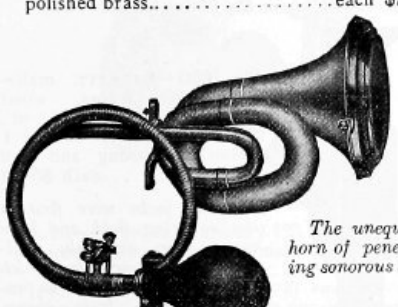
Polished Brass.

No. 707—New Dragon, 6¼ in. bell..each $6.75
No. 708—New Dragon, 7 in. bell.... " 7.00



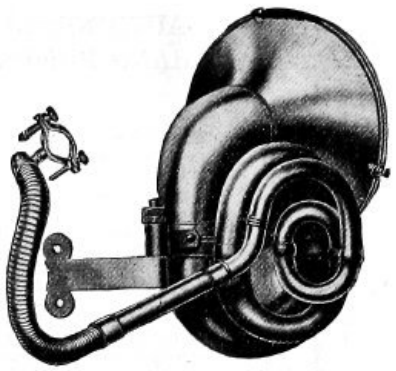
This shape has become very popular, as it will positively keep the water out. State which bracket is wanted.

No. 709—7 in. oval bell, reversed coil with bell down, straight or lyre bracket, polished brass.....each **$7.25**



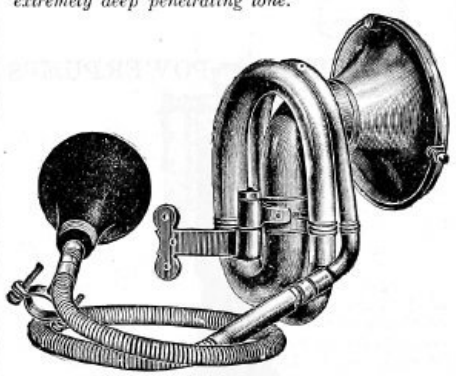
The unequaled horn of penetrating sonorous tone.

No. 703—Sonoro, 7 in. bell, polished brass.....each $8.00



No. 705—Large Dragon, 8¼ in. bell, screen, 50 in. flexible tubing, swivel bracket, polished brass, each $9.00

The above horn can be adjusted to any side and can be attached to any car, and is noted for its extremely deep penetrating tone.



No. 704—Bull Frog, 7 in. bell, screen, 50 in. tube, swivel bracket, polished brass, each.....$9.25

The new fad in automobile horns, which has met with the favor of all the touring car manufacturers, when a long powerful blast is required. This horn can be heard at a distance of half a mile.

Polished Brass.

No. 701—Consone, small size, 6¼ in. bell.....each $6.50
No. 702—Consone, large size, 8 in. bell, each.....8.00

The most powerful toned horn. The only successful high class horn made in America.

Bulbs, chemically cured, soft, pliable and tough. Non-corrosive vibratory metal composition, reeds which are not affected by the weather.

RUBBER HORN BULBS.

Polished Brass.

No. 706—8 in. oval bell, triple twisted, straight or lyre bracket, very deep penetrating tone.....each $ 9.00

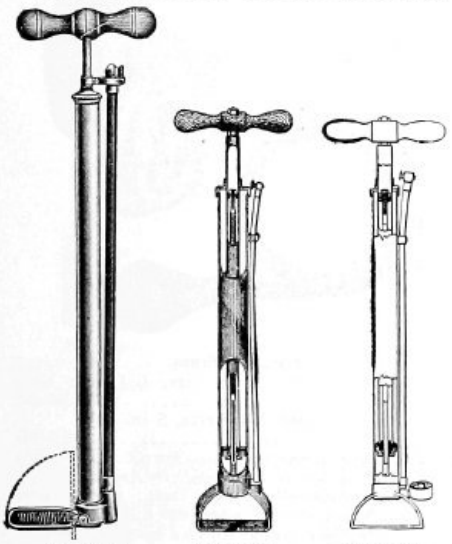
This horn leads all others and is the Champion in the market.

No. 710—Extra large 8 in. oval bell.....each 10.50
No. 711—7 in. oval bell..... " 7.25

No. 711—Same style as No. 710, but smaller in proportion. Straight or lyre bracket. State which bracket is wanted when ordering

AUTOMOBILE PUMPS AND JACKS.

AUTOMOBILE HAND PUMPS.



No. 100G. No. 113G. No. 112G.

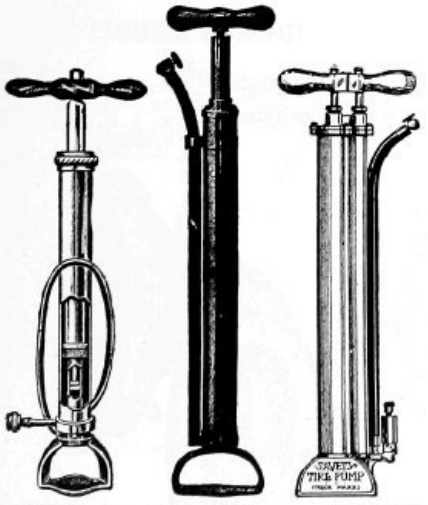
Polished Brass, Best Quality Rubber Hose.

No. 100G—1½×22 in., with flat folding base.....per dozen $36.00

No. 113G—1½×18 in., with stirrup base, and air-tight nipple..per dozen 54.00

No. 112G—1½×18 in., with air-tight nipple and gauge.....per dozen 72.00

On Nos. 112G and 113G the air in large cylinder is compressed into small cylinder on the down stroke, and on the down stroke also this compressed air is forced from the small cylinder through a stationary piston and rubber base to tire.



No. 107G. No. 110G. No. 116G.

Polished Brass, Best Quality Rubber Hose.

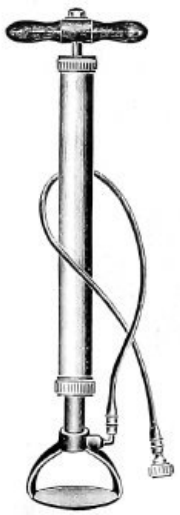
No 107G—Triplex, consisting of 3 cylinders of the following sizes, 1¾×18 in., ¼×18 in., ¾×18 in. The small cylinder stands rigid and is screwed to the base as well as the outer one. The center tube works as a plunger as well as the plunger rod.....per dozen $60.00

No. 110G—Imperial Wixon, 1½×17¾ in., heavy brass, double cylinder; the up-stroke puts light pressure on the air in small cylinder, the down-stroke forces the air into the tire..per dozen 60.00

No. 116G—18×1¼ in., air tight nipple, with gauge which perfectly registers the air pressure on tire....per dozen 72.00

No. 115G—Without gauge, otherwise same as No. 116G..... ....per dozen 48.00

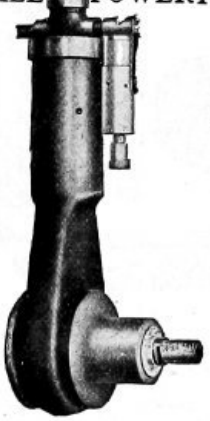
AUTOMOBILE HAND PUMPS.



No. 101G—Columbia, 1½×16 in. polished brass, best quality rubber hose, two cylinders, triplex pattern, works asy and gives entire satisfaction everywhere, per dozen $42.00

One of our best selling auto pumps and should merit the attention of every buyer.

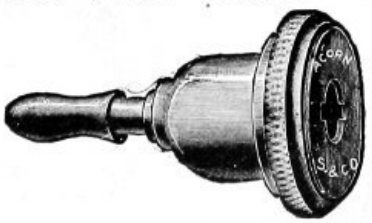
AUTOMOBILE POWER PUMPS



No. 200G—The A. B. C., length 9½ in., engine driven, casing and cylinder of iron, with a three ring piston, shaft of best tool steel, mounted on ball bearings, complete with tire connection, hose and safety relief valve.....each $15.00

Easily and quickly attached to end of engine shaft of any automobile engine; it lasts indefinitely, always giving accurately any air pressure asked, up to two hundred pounds.

ACORN PUMP CONNECTIONS.



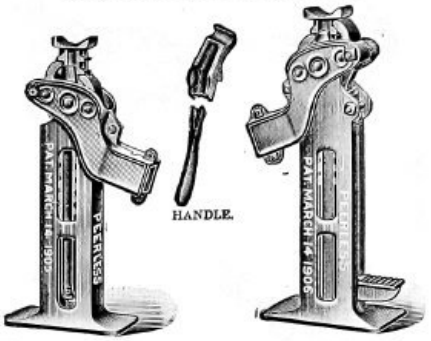
Absolutely Air-Tight, Quickest, Most Practical, Cheapest and Handiest.

Acorn, complete.....each $0.30

Acorn, rubber only..... " .06

The Acorn connection is attached to tire valve by simply pressing it on, and removed just as simply—by pulling it off. No screwing to be done. It might be supposed that this rubber washer would readily wear out and lose its functions, but on the contrary, its life is practically indefinite. Varied and exhaustive tests show that one washer will stand between 4,000 and 5,000 inflations and when necessary a new washer can be inserted in less than a minute.

AUTOMOBILE JACKS.



Nos. 50G & 51G. Nos. 52G & 53G.

Improved Peerless, Malleable Iron Frame and Handle, Neatly Painted.

No. 50G—For cars of 2 tons, height 10 in., rise 7 in., w't 4½ lbs.....each $2.50

No. 51G—For cars of 2 tons, height 12 in., rise 9 in., w't 5 lbs.....each 2.50

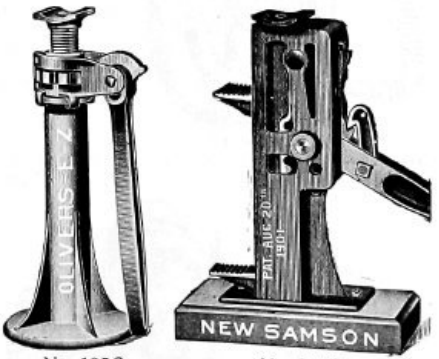
No. 52G—For cars of 2 tons, height 11 in., rise 6 in., w't 5 lbs.....each 3.00

No. 53G—For cars of 2 tons, height 13 in., rise 8 in., w't 6 lbs.....each 3.00

Can be placed and operated without getting under the car. It is automatic, works at any angle and can be used for pushing as well as lifting. Working the handle, below the level, raises. To lower simply turn it over and work above the level.

One of the most popular auto jacks on the market.

The handle can be used for a tire tool or hammer.



No. 135G. No. 144G

Malleable Iron Frame and Handle.

No. 135G—For cars of ten tons, height 13 in., rise 10 in., w't 12 lbs.....each $5.00

No. 144G—For general garage use, height 12 in., rise 4 to 10 in., w't 12 lbs...each 5.00

These jacks are strong, compact and light, the most popular automobile jack on the market. Work at any angle, can be used for pushing as well as lifting. Working the handle below the center raises, above the center lowers.

No. 05G—Barrett, malleable iron frame, wood handle, height 11 in., rise 6 in., for cars of 1 ton, a strong and well made jack.....each $5.00

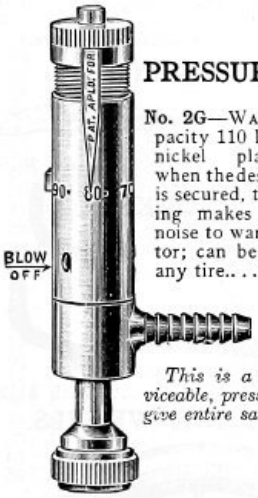
These jacks were first in the motoring field and have never been seriously challenged for superiority, which is pointed out merely to protect motorists from cheap, undependable imitations.

AUTOMOBILE JACKS, OIL GUNS, CHAMOIS SKINS, ETC.

AUTOMOBILE JACKS.

No. 300G—ASHMORE HYDRAULIC, malleable iron base, brass cylinder, iron lever handle with wood grip, will lift a car of 1½ tons, has a 5 in. rise, height 11¾ in., w't 6 lbs. ..... each $6.00

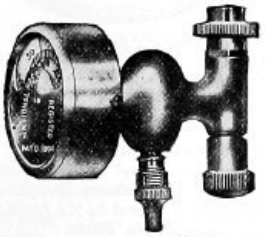
PRESSURE GAUGES.



No. 2G—WASHBURN, capacity 110 lbs., made of nickel plated steel; when the desired pressure is secured, the air escaping makes a sufficient noise to warn the operator; can be attached to any tire..... ..each $2.50

This is a neat, compact, serviceable, pressure gauge, and will give entire satisfaction.

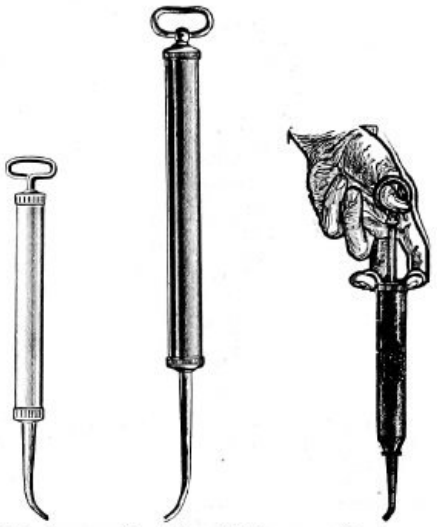
No. 3G—MILLER'S, capacity 200 lbs., made of nickel plated steel, will register the slightest pressure of the pump, each..... $3.50



No. 1G—NATIONAL, capacity 120 lbs., case constructed of heavy nickel plated steel..... each $5.00

For properly inflated tires of equal capacity, the use of a pressure gauge or register is very essential, and we recommend the National as a very satisfactory-giving pressure gauge. Adapted to any automobile or bicycle tire valve.

AUTO OIL GUNS.

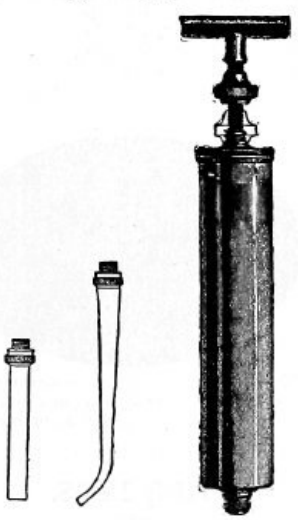


No. 4. Nos. 00 and 000. No. 5.

Steel Piston Rod.

No. 4 —10 in. barrel, 4 in. nozzle, nickel plated steel..... each $0.50
No. 00 —8 in. barrel, 5 in. nozzle, polished brass..... each .60
No. 000—10 in. barrel, 5 in. nozzle, polished brass..... each .60
No. 5 —N. F. O., 7½ in. barrel, 4½ in. nozzle, with cross bar at top, which allows the gun to be used with one hand, polished brass..... each 1.50

The piston rod of the No. 5 gun is fitted with an improved piston, which produces an almost perfect vacuum, and will force fluid oil, non-fluid oil or grease into any bearing of an automobile.



No. 8.

Delta, Polished Brass Barrel and Spout, Coppered T Handled Piston Rod.

No. 8—8 in. barrel, combination, capacity 8 oz., piston rod threaded and fitted with lock nut that engages thread on head so piston can be driven down by screw motion when used with heavy grease, or can be used in usual manner for oil; with two spouts, the straight one 2¼ in., the bent one 4¼ in...each $5.50
No. 7—8 in. barrel, capacity 7 oz., with two spouts, the straight one 2¼ in., the bent one 4¼ in..... each 3.50

Only the best materials are used in the manufacture of Delta oil guns. The pistons are solid brass and run snugly in the barrel of the gun.

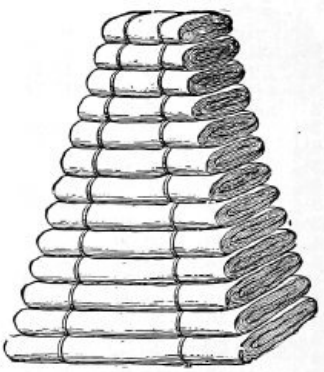
GREASE PUMPS.

Brass.

No. 105 —4 in. body ..... each $1.20
No. 105A—6 in. body ..... " 1.50

This device is for forcing dope into transmission gears—differential gears. When dope is used it makes gears almost noiseless.

CHAMOIS SKINS.



No. 22½	—10×13 in.....	per dozen	$ 2.20

760 m m×90 m m tires take 30×3½ treads.

A protector for automobile tires made of leather studded with steel rivets. The leather is tanned especially for this purpose and is absolutely uninjured by water. The part that runs on the ground has three-ply of leather in which are set rivets with heads about $\frac{3}{16}$ of an inch thick. The cover is made trough-shape, coming well up on the sides of the tire, and has loops along each side through which passes a steel wire ring adjusted by four small nuts.

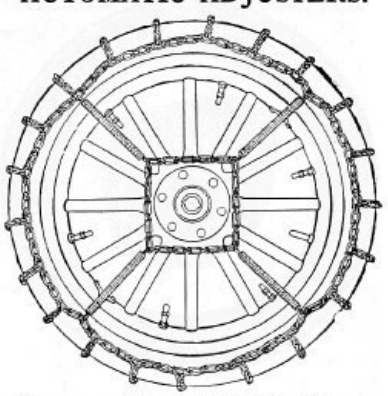
AUTOMATIC ADJUSTERS.



For use on Weed's Chain Tire Grips.

No. 15—.....per pair $1.00

This adjuster is simple in construction and is easily attached. Prevents the grips from striking the platform, and also from rubbing against the mud guards.

Although the adjuster holds the grips fairly taut, it allows enough freedom for progressive action.

TIRE BANDS.

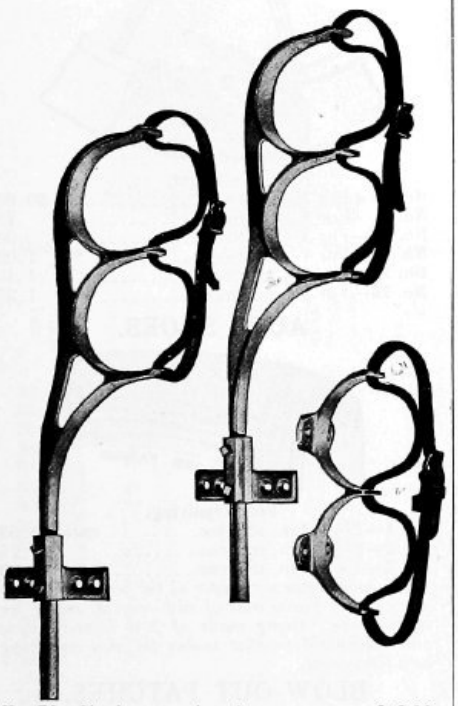
TIRE BRACKETS, TIRE COVERS, ETC.

TIRE BRACKETS.



No. 70—Single extension, brass,..per set $ 8.00
No. 80—Double extension, brass.. " 10.00

Nos. 70 and 80, for holding one or two tires respectively, outside clutch levers or driver's side; they are adjustable for different cars and have, at great expense, been made in full brass only.

Single extension holders, come three pieces to set, two for sides and one for running board.

Double extension come four pieces to set, two for sides and two for running board.

No. 61.

No. 62.

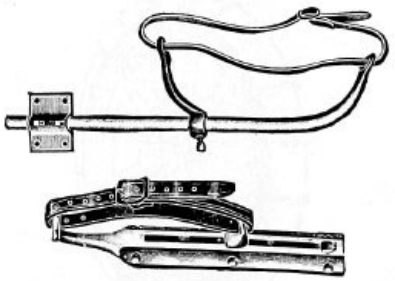
No. 63.

All Brass, with Straps.

No. 60—Set of 3, one each 3, 6 and 9 in. extension.....per set $2.25
No. 61—3 in. extension.....each .35
No. 62—6 in. extension..... " .50
No. 63—9 in. extension..... " .75

These brackets can be easily attached to any part of an automobile.

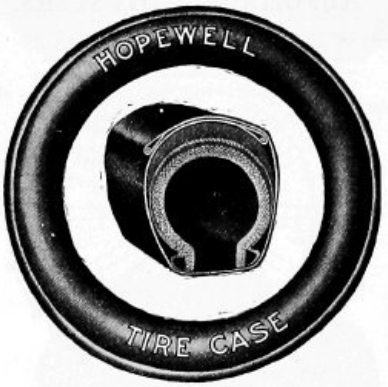
TIRE HOLDERS.



No. 90—SIMPLEX, adjustable, complete, per set..... $8.00

Consists of a set of three pieces—two side-pieces for attaching to the body of the car and one bottom bracket to be attached to running board. Can be adjusted to hold from one to three tires. Made of extra heavy, non-breakable steel, with highly polished brass finish and equipped with strong straps for holding tires.

TIRE CASES.



Hopewell, Perfect Fitting, Easy of Application Neat Appearance.

No. 1H—Enamel black drill, regular sizes, with tube case.....each $4.00

No. 11H—Button pattern, black, regular size.....each 3.00

The Hopewell tire case is a continuous casing, which wraps about the spare tire and is held in position by two endless spiral springs. The use of these spiral wound japanned piano wire springs eliminates all fastening devices. The inherent adjustability of these springs allows the case to fit all treads as well as new and worn tires. This construction prevents wrinkling, and gives a absolutely water-tight and perfect-fitting tire case.

When not in use case can be folded in a very small package.

The tire case is sent enclosed in an enamel drill bag suitable for an inner tube bag, and packed in a cardboard box.

In ordering, state size and make of tire for which the case is wanted, and which of following types:

Clincher detachable, Fisk demountable rim.

NOTE.—For all Goodyear, and 36 inch Diamond clincher, order detachable case. For compressed round or flat tread Michelin, or Dunlop case, order detachable case.

TIRE COVERS.

Laced.

No. 11—Black enameled duck, all sizes, each..... $2.25
No. 12—Maroon, blue, red, green and white enameled duck, all sizes.....each 3.50

A perfect fitting cover for the extra tire when touring. Preserves it from damage by dust, oil or water. Made of best quality Enameled Duck.

Glove-Buttoned.

No. 21—Black enameled duck, all sizes, each..... $3.00
No. 22—Maroon, blue, red, green and white enameled duck, all sizes....each 3.50
No. 23—All colors fabric leather, all sizes, each..... 4.50

A perfect fitting tire cover that will shed water. Made in one piece of best quality enameled duck; water, dust and oil proof.

A neat bag for holding extra inner tube with each tire cover. When ordering, state size, make and style of tire the cover is intended for.

TIRE TRUNKS.

	BLACK.	COLORS.
No. 1N—For 30 and 32 in. tires, 6 in. deep.....each	$11.00	$12.00
No. 2N—For 34 and 36 in. tires, 6 in. deep.....each	11.00	12.00
No. 3N—For 30 and 32 in. tires, 9 in. deep.....each	12.00	14.00
No. 4N—For 34 and 36 in. tires, 9 in. deep.....each	12.00	14.00

These trunks can be furnished in maroon, blue, red, green, white, yellow and French gray.

They are made to fit inside the extra tire that is carried on cars, and arranged with lock, so as to lock cover of trunk and also lock trunk to tire, making a safe place to carry inner tubes and many other articles indispensable while touring. Handsomely bound in leather and well made in every respect. Can also be carried on top of cars with stationary tops.

ONE IN A BOX.

PAINTS, OILS VARNISHES

AND

PAINTERS' SUPPLIES

Our "Inspected House Paints" mark the beginning of a new era in paint making and selling. Satisfied that the public wants just as high a standard maintained in the making of paint as in preparation of foods and meats, we have spared nothing to procure the best house paint formulas of known value, to place the making of the paints in the hands of master paint makers, and to establish our own Bureau of Inspection to insure by careful chemical analysis that every gallon of Inspected "Our Very Best" or "Rev-o-noc" House Paint is strictly pure and according to formula.

Remember, too, that mere "Purity" in a house paint does not insure the good wearing and protective qualities for which paint is desired. The poorest paint made can easily be made from "pure" materials. Only by knowing that the formula is good as well as the materials pure, can one be sure of good paint.

So sure are we of the exceptionally good value of "Our Very Best" and "Rev-o-noc" formulas, that we print them upon every can and package, together with our guaranty.

Under these conditions and with our large line of all kinds of painting materials, we are in an unparalleled position to take care of the paint dealer.

HIBBARD, SPENCER, BARTLETT & CO.

STATE STREET BRIDGE

CHICAGO.

"OUR VERY BEST" MIXED HOUSE PAINTS.

PURE OUR VERY BEST PAINT

GUARANTY.

WE GUARANTEE "OUR VERY BEST" MIXED PAINT TO BE STRICTLY PURE, CONSISTING OF

Pigment Base.

STRICTLY PURE RAW LINSEED OIL - - - - - - - 91%
STRICTLY PURE SPIRITS OF TURPENTINE AND DRIER - - 9%

"OUR VERY BEST" MIXED PAINT IS SOLD SUBJECT TO CHEMICAL ANALYSIS AND IS GUARANTEED BY HIBBARD, SPENCER, BARTLETT & CO., ESTABLISHED IN 1855.

Hibbard Spencer Bartlett & Co.

"OUR VERY BEST" paint is good because it is a conscientious paint and only the best materials are used in its manufacture.

The formula is just what would be selected by an expert house painter who desired to secure the best appearance and most durable surface.

It will cover as much surface and wear as long as any paint manufactured.

It is better than any paint which a painter could make.

It is better because we have means of testing the materials and guarantee their absolute purity.

It is better because it is prepared with mathematical accuracy.

It is better because the proper amount of each ingredient, without regard to cost, is used to produce the best results.

It is better because no painter has the heavy machinery necessary for properly grinding and mixing.

It is BEST because we can make it no better.

To Ascertain the Amount of Paint Needed for a Job.

EXAMPLE.

Front - - - - - -	40 feet
Rear - - - - - -	40 "
Side - - - - - -	50 "
Side - - - - - -	50 "
	180
Multiply by average height	20
Divide by 300) 3600 (	12 gals.

Figure one gallon of "OUR VERY BEST" paint will cover 300 square feet two coats on an average good surface; if it is rough and uneven more paint will be needed.

For priming coat do not use a cheap primer. Use "OUR VERY BEST" paint, reduced according to directions. The finishing coat is to be applied as received in the package after being thoroughly stirred.

Use only strictly pure boiled linseed oil for thinning.

DIRECTIONS.

Stir thoroughly before using. Putty all nail holes, and shellac all knots, pitchy or sappy parts. The surface to be painted should be dry and free from dust, dirt or grease. If paint is too thick, thin with boiled linseed oil for outside; for inside, small quantity of turpentine may be used. Let first coat dry hard before applying second.

How Mixed Paints are Packed.

6 one gallon cans in a case.
12 half gallon cans in a case.
24 quart cans in a case.
48 pint cans in a case.
96 half pint cans in a case.

½ gal. Cans,	"	1.85
1 qt. Cans,	"	2.10
1 pt. Cans,	"	2.40

Made for re-painting lumber wagons, sleighs and farm implements. It readily flows from the brush, is of good body, and dries hard. It will not blister. This paint is made of most durable pigments, ground in a good coach varnish. It will resist the wear and tear to which a lumber wagon is subjected, besides remaining bright. A coat of this paint on a farm wagon, dray, truck or express wagon will make it look like new and lengthen its life of usefulness. It's ready for the brush.

½ gal. Cans,	"	1.80
1 qt. Cans,	"	1.87
1 pt. Cans,	per dozen	3.00
½ pt. Cans,	"	2.40

Pure linseed oil combined with fine copal varnish produces durability in stains for all woodwork. The linseed oil binds it firmly to the wood, while the varnish gives it the luster. To these are added durable, non-fading pigment colors.

This stain is made to fill the demand for either varnish stain or oil stain and will be found just as represented.

For imitating these natural woods, and as a "reviver" of old furniture, it cannot be excelled.

GROUND COLOR. CHERRY.

LIGHT OAK. DARK OAK.

WEATHERED OAK. WALNUT.

MAHOGANY. ROSEWOOD.

"OUR VERY BEST" FLOOR AND FURNITURE STAIN.

1 qt. Cans,	"	3.15
1 pt. Cans,	per dozen	5.04
½ pt. Cans,	"	2.70

Colors used in "Our Very Best" floor stain will not fade.

They have a brilliancy and luster—different from many so called stains. This stain is made of highest grade floor varnish and coloring matter that make an ideal floor finish.

"Our Very Best" floor stain renews a natural wood finish to old or new pine, or hardwood. It brings out the markings of the grain, resulting in many handsome effects.

"Our Very Best" is ready for use and applied in the same manner as varnish. As an all-around varnish stain it is hard to beat.

NATURAL WOOD. FLAT WHITE.

LIGHT OAK. GLOSS WHITE.

CHERRY. GROUND COLOR.

WALNUT. GREEN.

MAHOGANY. FLAT BLACK.

"OUR VERY BEST" PAINTS AND WOOD FILLER.

"OUR VERY BEST" FLAT WHITE PAINT.

White, for Interior Use.

Barrels and Half Barrels,	per gallon	$2.10
5 gal. Kits,	"	2.18
1 gal. Cans,	"	2.25

As an undercoating for enamel it is unsurpassed, drying with a perfectly dead finish, and being possessed of the greatest opacity or body of any paint known. There is nothing that can be made by hand from zinc or lead in oil which will furnish the same body surface with the same number of coats. The absolutely dead finish obtained takes enamel coatings much better.

"OUR VERY BEST" GRAPHITE PAINT.

Ready Mixed.

Barrels and Half Barrels,	per gallon	$1.13
5 gal. Kits,	"	1.20
1 gal. Cans,	"	1.28

The demand for graphite paints has rapidly increased during the last two or three years, from the fact that graphite is practically indestructible and makes such a good preservative coating for iron and steel surfaces. Its covering properties are enormous, and no danger of rusting attends its use if surface is free from rust when the paint is applied.

The graphite used in this paint is a natural product, and for purity and ease of spreading is not excelled by any.

GRAPHITE IN OIL.

Barrels, Half Barrels and 100 lb. Kegs,	per pound	$0.09
25 lb. Cans,	"	.14
12½ lb. Cans,	"	.12

This is the best grade of graphite, ground to a stiff paste in linseed oil. It should be thinned for use, the same as ordinary white lead or paste paint.

"OUR VERY BEST" VESSEL AND YACHT PAINT.

In Liquid Form Ready for Use.
White and Regular Tints.

Barrels and Half Barrels,	per gallon	$2.70
5 gal. Kits,	"	2.77
1 gal. Cans,	"	2.85

Ground in strictly pure bleached linseed oil for all inside and outside work where a fine lasting white is desired. Will stand the action of gases arising from foul rivers.

Green, No. 914.

Barrels and Half Barrels,	per gallon	$2.70
5 gal. Kits,	"	2.77
1 gal. Cans,	"	2.85

"OUR VERY BEST" LIQUID WOOD FILLER.

Especially Made for Filling Pine and Any Other Close-Grained Wood.

Barrels,	per gallon	$1.65
Half Barrels,	"	1.65
5 gal. Kits,	"	1.72
1 gal. Cans,	"	1.80
½ gal. Cans,	"	1.87
1 qt. Cans,	"	1.95

Produces a smooth and hard surface, and is superior to shellac in every respect. It dries hard and does not discolor the lightest wood. One coat of LIQUID WOOD FILLER and one coat of varnish are equal to three coats of varnish on new work. Guaranteed to give satisfaction. Mixed ready for use.

OUR "REV O-NOC" MIXED PAINT IS SOLD SUBJECT TO CHEMICAL ANALYSIS AND IS GUARANTEED BY HIBBARD SPENCER, BARTLETT & CO., ESTABLISHED 1855.

Hibbard Spencer Bartlett & Co.

"REV O-NOC" house paint is good as well as pure. Notice the wide distinction between mere purity in paint as compared with good quality.

You do not care to buy paint merely because you believe it to be pure; you require of it the qualities which make it a perfect preservative as well as a beautifier.

"REV-O-NOC" house paint is such a paint. It has been proved by actual test to wear well, and to fulfill its mission as a preservative; it is composed of pigments of recognized paint value, not merely of pure materials valueless when used as paint ingredients.

"REV-O-NOC" house paint is composed only of materials recognized as having true paint value when in proper combination.

A good formula needs scientific combination. Slap dash methods of mixing paint lessen its value. "Rev-o-noc" house paint is scientifically ground in triple cylinder mills under the care of a master paint grinder and is certain to give better satisfaction than any mixture made with a paddle.

White, Black and All Shades Not Starred.

Capacity	1 pt.	1 qt.	½ gal.	1 gal.	5 gal.	Bbl. and ½ bbl.
Per gallon	$2.10	2.12	1.95	1.87	1.80	1.72

Capacity	1 pt.	1 qt.	½ gal.	1 gal.	5 gal.	Bbl. and ½ bbl.
Per gallon	$2.47	2.40	2.32	2.25	2.17	2.10

To Ascertain the Amount of Paint Needed for a Job.

EXAMPLE.

Front	40 feet
Rear	40 "
Side	50 "
Side	50 "
	180
Multiply by average height	20
Divide by 300) 3600 (	12 gals.

Figure one gallon of "REV-O-NOC" paint will cover 300 square feet two coats on an average good surface; if it is rough and uneven more paint will be needed.

For priming coat do not use a cheap primer. Use "REV-O-NOC" paint, reduced according to directions. The finishing coat is to be applied as received in the package after being thoroughly stirred.

Use only strictly pure boiled linseed oil and turpentine for thinning.

DIRECTIONS.

Stir thoroughly before using. Putty all nail holes, and shellac all knots, pitchy or sappy parts. The surface to be painted should be dry and free from dust, dirt or grease. If paint is too thick, thin with boiled linseed oil for outside; for inside, small quantity of turpentine may be used. Let first coat dry hard before applying second.

How Mixed Paints are Packed.

6 one gallon cans in a case.
12 half gallon cans in a case.
24 quart cans in a case.
48 pint cans in a case.
96 half pint cans in a case.

	12	22	6

No. 200 Assortment, as above, - per assortment $15.00

"REV-O-NOC" VARNISH STAIN.

Ready for Use.

Barrels,	per gallon	$1.57
5 gal. Jacket Cans,	"	1.65
1 gal. Cans,	"	1.72
½ gal. Cans,	"	1.80
1 qt. Cans,	"	1.85
1 pt. Cans,	per dozen	3.00
½ pt. Cans,	"	2.40

"Rev-o-noc" stains accomplish the double purpose of staining and varnishing in one application. Pure linseed oil combined with fine copal varnish produces durability in stains for all wood work. The linseed oil binds it firmly to the wood, while the varnish gives it the lustre. To these are added durable, non-fading pigment color.

Made in eight colors as follows:

Ground Color	Weathered Oak
Cherry	Walnut
Light Oak	Mahogany
Dark Oak	Rosewood

FOR COLORS SEE "OUR VERY BEST" VARNISH STAIN, PAGE 2406.

"REV-O-NOC" SCREEN DOOR PAINTS.

Ready for Use for Painting Window Screens and Screen Doors.

1 qt. Cans,	per dozen	$4.50
1 pt. Cans,	"	2.70
½ pt. Cans,	"	1.62

"Rev-o-noc" screen paint is intended for painting both the frame and the wire, and is made expressly for the purpose.

Made in three colors as follows:

Bottle Green Lawn Green Black

SEE "OUR VERY BEST" SCREEN PAINTS FOR COLORS, PAGE 2406.

"REV-O-NOC" PAINTS AND ENAMELS.

"REV-O-NOC" WHITE ENAMEL.

Superior Quality, Ground Exceedingly Fine, Very Durable.

1 gal. Cans,	per gallon	$3.75
½ gal. Cans,	"	3.82
1 qt. Cans,	"	3.90
1 pt. Cans,	"	4.05
½ pt. Cans,	"	4.35

For finishing fine interior wood work and furniture and artistic decoration.

It dries absolutely hard and can be rubbed and polished in the same manner as rubbing varnish.

"REV-O-NOC" LIQUID ENAMEL.

Ready for Use.
For Decorative Work of Every Description

1 gal. Cans,	per gallon	$2.34
½ gal. Cans,	"	2.42
1 qt. Cans,	"	2.70
1 pt. Cans,	per dozen	3.24
½ pt. Cans,	"	2.19
¼ pt. Cans,	"	1.62

Made in sixteen shades, including white and black, as follows:

Light Blue	Turquoise	Peach
Ivory	Old Rose	Olive
Dark Blue	Shell Pink	Pink
Flesh	Sea Green	Canary
Scarlet	Lavender	Black
White		

FOR SHADES SEE "OUR VERY BEST" ENAMEL, PAGE 2407.

Dries with a gloss like porcelain. Can be used on bicycles, bird cages, chairs, mirrors, picture frames, vases, jardinieres and furniture of every description. Can be washed with soap and water.

"REV-O-NOC" BATH TUB ENAMEL.

GUARANTY.

WE GUARANTEE "REV-O-NOC" BARN PAINT TO WEAR AT LEAST FIVE YEARS WHEN PROPERLY APPLIED ON A GOOD SURFACE. IF IT DOES NOT PROVE TO BE EXACTLY AS REPRESENTED, WE AGREE TO FURNISH PAINT TO RE-PAINT FREE OF CHARGE.

HIBBARD, SPENCER, BARTLETT & CO.

The "Rev-o-noc" Barn Paint is a perfect harmony of ingredients, accurately proportioned by expert makers, and ground and mixed by the best modern machinery.

We all want the "Extra"—the something out of the ordinary. The Extra quality of goods bring "Extra" profitable returns to the dealer. The price may be a little higher, but the quality creates in the buyer that satisfied feeling of money well spent.

"Rev-o-noc" Barn Paint is made to supply the necessary every dealer wishes for, namely, goods of quality that will not only hold trade, but also increase trade.

The "Rev-o-noc" Barn Paint is made of the best red oxide and far excels ordinary venetian red. Ordinary venetian red will soon fade and streak white. "Rev-o-noc" Barn Paint is a very bright, unfading red and will stand the racket of any and all atmospheric changes, its durability being unequaled, making it the best paint for barns, tin roofs, grain elevators, fences, depots, freight cars, etc. It will cover 250 square feet two coats to the gallon, on new wood with ordinary surface; on old wood or rough surface, less; on tin roofs or iron work, more.

Especially Adapted for Painting Barns, Roofs, Bridges, Fences, Etc.

Barrels,	per gallon	$0.82

"REV-O-NOC" IRON PAINT.

MOSS GREEN.

RED

STEEL GRAY. BROWN OXIDE.

Owing to the repeated calls we received for paint that would adhere to iron and tin work, and wear and last long, we investigated the matter thoroughly and have produced our "Rev-o-noc" Iron Paint, which has a peculiarity of sinking into and becoming a part, as it were, of the iron and tin work. Its ingredients are accurately proportioned and blended so that they produce the best paint for the purpose. "Rev-o-noc" Iron Paint will stand the contraction and expansion of cold and heat without cracking or chipping off. It has great elasticity and toughness which is a guarantee of good wear. Subjected to the heat of sun, steam, and fire. "Rev-o-noc" Iron Paint is especially durable for all metals.

Especially Adapted for Painting Tin and Iron Roofs, Iron Fences, Gutters, Cornices, Structural Iron Work, Etc.

Barrels,	per gallon	$0.82
Half Barrels,	"	.82
5-Gal. Kits,	"	.90
1-Gal. Cans,	"	.87

REV-O-NOC LEADS AND ZINCS.

REV-O-NOC ZINC PASTE.

Put up in Steel Kegs.

12½, 25, 50 and 100 lb. Steel Kegs, - - per pound $0.10

Manufactured by a special process, and will do a half more work than "Dutch Process" lead. In addition to having 50 per cent. more pigment body, it is whiter and produces clearer and sharper tints. No danger of poison attends its use, and it is not acted upon by foul gases. It is positively the most permanent white made, and can be used wherever ordinary white lead can.

REV-O-NOC COMBINATION LEAD AND ZINC.

Put up in Steel Kegs.

Unsurpassed for Fineness, Whiteness and Durability.

12½, 25, 50 and 100 lb. Steel Kegs, - - per pound $0.10

This combination will do one-half more work than ordinary Trust lead. It wears longer and does not discolor when exposed to the action of sulphur gases. Work done with it retains its gloss longer than work done with ordinary lead.

WHITE CITY HOUSE PAINTS.

WHITE CITY PAINT

Is a combination of White Lead, Zinc and Linseed Oil mixed with the most durable of coloring matter and properly thinned

White City Ready Mixed Paint will compare in quality with the general run of paints on the market

The results obtained by using White City Ready Mixed Paints will be found far more satisfactory than white lead mixed and tinted in the usual manner by hand.

WHITE CITY READY MIXED PAINT

Is unexcelled for painting houses, interior wood work, fences, brick and stone work, not affected by water, heat, cold, frost or dampness

Will not peel, blister chalk off, or lose any of its original color

To Ascertain the Amount of Paint Needed for a Job.

EXAMPLE

Front - - - - -	40 feet
Rear - - - - -	40 "
Side - - - - -	50 "
Side - - - - -	50 "
	180
Multiply by average height - -	20

Divide by 200) 3600 (18 gals.

Figure one gallon of White City Paint will cover 200 square feet two coats on an average good surface; if it is rough and uneven more paint will be needed.

For priming coat do not use a cheap primer. Use White City Paint reduced according to directions. The finishing coat is to be applied as received in the package after being thoroughly stirred.

Use only strictly pure boiled linseed oil and turpentine for thinning.

DIRECTIONS FOR USING.

Outside Work.

Cut the top of the can with an ordinary knife, and stir thoroughly from the bottom before applying

If in buckets the head must be taken out so that the paint can be thoroughly stirred

The surface to be painted should be perfectly dry and well seasoned, not pitchy, and should contain no sappy streaks

Shellac all knots with alcohol shellac varnish before any paint is applied All loose matter and paint scales should be removed with a wire brush and should then be well dusted

Do not paint over a damp surface or immediately after a rain or frost

Thin with pure boiled linseed oil for priming coat. The paint is the proper consistency for the second coat

Rub out well under the brush

The first coat should be dry and hard before the second coat is applied

Inside Work.

The surface should be sand-papered smooth; old surfaces that are greasy, smoky or worn should be scraped and sand-papered, and then wiped clean, otherwise the paint will not dry hard as desirable.

Windows and doors should be opened after the paint has set. Light and air are absolutely necessary for the proper drying of paint.

When the weather is excessively humid or hot, paint is liable to remain tacky; to remedy this we recommend that turpentine be used.

Thin with pure spirits of turpentine for priming coat. The paint is the proper consistency for the second coat.

The first coat should be dry and hard before second coat is applied.

GUARANTY.

WE GUARANTEE "WHITE CITY" BARN PAINT TO WEAR AT LEAST FIVE YEARS WHEN PROPERLY APPLIED ON A GOOD SURFACE. IF IT DOES NOT PROVE TO BE EXACTLY AS REPRESENTED, WE AGREE TO FURNISH PAINT TO REPAINT FREE OF CHARGE.

HIBBARD, SPENCER, BARTLETT & CO.

Venetian Red mixed with oil by hand does not always produce a uniform paint for the reason that it is not generally possible for the oil and dry paint to become thoroughly incorporated with each other. It takes powerful machinery to accomplish this result.

Our "White City" Barn Paint is made in the right proportions and thoroughly ground and mixed by up-to-date machinery, every particle of the dry paint becoming saturated with oil to its fullest absorbing capacity.

It will be found considerably cheaper and will produce a better surface than Venetian Red mixed with oil by hand

Its excellent durability and power of resisting the elements make it a very valuable covering for barns, fences, sheds, roofs, etc.

For the price we do not believe there is a better barn paint on the market, and it will cover 200 square feet, two coats to the gallon, if properly applied on a good surface. On tin or iron work it will spread further.

Especially Adapted for Painting Barns, Roofs, Bridges, Fences, Etc.

Wood and Iron Preservative.

Barrels (50 gals.)	per gallon	$1.00
Half barrels (30 gals.)	"	1.05
5 gal. kits	"	1.15
1 gal. cans	"	1.30

Combine the best wood preservative and the best waterproof mixture ever put together. Creosote is acknowledged by civil engineers and architects to be the best preserver of wood known at the present time. Graphite has long been acknowledged the most durable pigment for a paint, under or above water, under all conditions of weather. By thoroughly grinding graphite with a special liquid for the purpose, we have produced our Creographite Paints, which we can safely recommend to the public as far superior to any known paint for the purposes intended, such as shingle, tin, iron, wood, felt or canvas roofs, structural iron work, boilers, smoke-stacks, iron tanks, iron shutters, factories, elevators, bridges, barns, posts or timbers sunk into the ground or buried in masonry; also for heavy timbers and joists of buildings that are placed next to the ground or in damp cellars.

These paints have had the unqualified endorsements of many prominent railroads, and are used largely for all bridge and iron work. They are ideal paints for all kinds of roofs.

One gallon of Creographite Paint will cover about 300 sq. ft. of tin, iron or smooth surface, 100 sq. ft. of shingles, or 150 sq. ft. of canvas or felt, two coats.

CREOGRAPHITE ROOF CEMENT.

Colors.
No. S—Dark Slate. No. H—Red.

Waterproof Always Elastic.

Barrels (about 600 lbs.)	per pound	$0.06
50 and 100 lb. kegs	"	.06½

1 pt. cans, *with brush,* w't per doz. 12 lbs., per dozen. $3.00

ONE DOZEN IN A CASE.

1 qt. cans, w't per gal. 8 lbs.	per gallon	$2.00
2 qt. cans, w't per gal. 8 lbs.	"	1.90
1 gal. cans, w't per gal. 8 lbs.	"	1.80

Dries with a brilliant luster. Prepared especially for gas stoves, boilers, machinery and all iron work where a bright gloss black is required. Will not turn dull, crack, scale or rub off, and will resist heat.

ASPHALT ROOF COATING.

Adapted for Paper, Felt, Canvas and Prepared Roofing.

Barrels	per gallon	$0.57
Half barrels	"	.66
5 and 10 gal. kits	"	.75
1 gal. cans		.80

It is used for cementing the joints and laps of the paper, for flashing, around chimneys, smoke-stacks, etc. It is elastic, very durable, and sheds the water; is non-absorbent, and spreads freely without the necessity of heating; can be thinned with benzine, dries quickly, and never melts in the sun or cracks in the cold.

VARNISH AND PAINT REMOVER.

Liquid.

5 gal. cans	per gallon	$2.50
1 gal. cans	"	2.50
½ gal. cans	"	2.60
1 qt. cans	"	2.80
1 pt. cans	"	3.20

Instint Varnish and Paint Remover is composed of the best combination of solvents for varnish and paint known to chemistry, with the addition of a thickener which prevents the evaporation or drying down of these solvents, yet does not in any way retard their actions but adds to their solvent power. It effectively softens or dissolves the varnish or paint, and contains no acid or caustic to burn or injure the wood.

"Instint." Will not raise the grain or injure the surface of the finest wood. Will not injure the hands. Contains no acid or fusil oil. Can be used on mouldings and on carvings, where it is impossible to use a torch or a scraper. A few gallons will clean a very large surface. Will not explode.

Removes paint, varnish, Shellac and enamel clean to the bare wood almost instantly, contains no acid or alkalies and will positively not injure the hands or the finest veneers. Ad-el-ite is made from the finest imported material, which gives it greater solvent properties than other brands.

Liquid.

Separate Sizes.

OVB VARNISHES.

Revised December 1st, 1908. (Superseding all previous lists.)

The following pages describe our Architectural Varnishes and a general line of house painters' varnishes with the adaptations of the different grades. These varnishes are made after the most approved formulæ and prepared with the greatest possible care by varnish makers of skill and experience. *The OVB label on a can of varnish is a guarantee of the best value that money can produce and the contents are the very best goods for the purpose described.*

OVB Pale Hard Oil Finish.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 400 per can	$9.50	2.00	1.10	.60	.35	.19

This is a very pale colored varnish especially adapted for finishing natural wood or grained surfaces; is free working, dries free from tack in a few hours and makes a good gloss finish or can be rubbed.

OVB Light Hard Oil Finish.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 401 per can	$8.25	1.75	.98	.54	.32	.18

This varnish is similar to our Pale Hard Oil Finish, but not as light in color. Brushing and drying qualities about the same. Suitable for all ordinary woods except Maple, Light Mahogany, etc., and can be rubbed or left in the gloss.

OVB Light Interior Coach.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt
No. 301 per can	$8.25	1.75	.98	.54	.32	.18

This is for either new or old housework. Dries with a very high gloss in from thirty-six to forty-eight hours and can be rubbed within three days. One coat of Light Interior Coach and one coat of Transparent Liquid Wood Filler over either Pine or Hard Woods produces a full and satisfactory finish. Where Oak or Open Grained Woods are to be finished, same should first be filled with a paste wood filler.

OVB No. 1 Coach.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 405 per can	$8.25	1.75	.98	.54	.32	.18

This is a very popular varnish for use on interior woodwork; dries in about twelve hours and can be rubbed or recoated in forty-eight hours.

OVB Extra Durable Coach.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 418 per can	$12.00	2.50	1.35	.73	.42	.22

This varnish is all that its name implies, namely—a very durable varnish. It is intended for either interior or exterior work. Is elastic, flows well, dries with a high lustre in about eighteen hours.

OVB Cabinet Finish.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 302 per can	$9.50	2.00	1.10	.60	.35	.19

This is very similar to our Interior Spar but dries a little quicker and in addition to its desirability for Interior work makes an excellent varnish for all kinds of furniture. Dries with good gloss in about eighteen hours and can be rubbed in two days and polished day after. A good general all around varnish.

OVB White Batavia Damar.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 409 per can	$12.00	2.50	1.35	.73	.42	.22

This is made from selected White Damar Gum. Unsurpassed for making White Enamels or Coating over white surfaces to produce a gloss effect. (Damar Varnish should not be used for furniture or outside work.) Dries in about eight hours.

OVB Furniture Varnish.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 403 per can	$5.75	1.25	.75	.42	.26	.15

A brilliant and quick drying varnish for gloss work (except floors.) One coat of this varnish produces a very satisfactory finish over old work. Dries over night

OVB Elastic Floor.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 408 per can	$9.50	2.00	1.10	.60	.35	.19

This is very similar to our Architectural Floor Varnish but a little darker in color and is an excellent varnish for refinishing old floors, oil cloths, linoleum or interior woodwork. Very tough and elastic and will not turn white when floor is washed. Dries in from eighteen to twenty-four hours.

OVB Bar Top Finish.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.
No. 330 per can	$14.50	3.00	1.60	.85	.48

This is a very durable varnish for use on bar tops, counters and fixtures. Dries in about twenty-four hours and is not affected by alcoholic liquors or constant washing which bar tops are subjected to. Light in color and very elastic.

OVB House Painters' Japan.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
Nos. 422 per can	$3.25	.75	.48	.29	.20	.11

This is a very strong dryer. Light in color. Suitable for use in drying mixed paints, White Lead in Oil, etc.

OVB T Japan Dryer.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 419 per can	$5.75	1.25	.73	.42	.26	.15

This is a very powerful dryer and will not injure the life of paints. One gallon will dry twenty-five gallons of Raw Linseed Oil in from eight to twelve hours.

OVB Egyptian Black Asphaltum.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 413 per can	$2.50	.60	.40	.25	.18	.10

A very strong, quick drying black, for use on smoke stacks, boilers, furnace fronts, stove pipes or ironwork Dries in about eight hours.

OVB Turpentine Oil Shellac.

Size cans	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 404 per can	$8.25	1.75	.98	.54	.32	.18

A transparent quick hard drying varnish used as a priming coat on all close grain natural woods or first coater on open grain woods that have first been filled with a paste filler. This varnish is far superior to shellac inasmuch as it is not affected by moisture. Dries over night sufficiently hard to admit of being sandpapered.

VARNISHES AND BAKING JAPANS.

OVB VARNISHES.

Architectural Finishes.

In offering our architectural varnishes to the trade, we desire to call special attention to the fact that we have combined all the qualities essential and characteristic of high grade finishes for architectural purposes

OVB Exterior Spar.

Size cans.	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 412.....per can	$19.50	4.00	2.10	1.10	.60	.32

Especially adapted for store fronts, vestibules, window casings, front doors, and all outside work requiring a varnish of extreme durability. It dries free from dust in from six to eight hours, and hardens in about four days to admit of being rubbed.

OVB Interior Spar.

Size cans.	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 411.....per can	$14.50	3.00	1.60	.85	.48	.25

Especially adapted for fine interiors, parlors, libraries, dining rooms, etc., where a rich, durable finish is desired. It works freely, dries with a brilliant luster, and can be rubbed to a dull finish or highly polished. It can be used over natural wood, painted or grained surfaces. Dries free from dust in from five to seven hours, and can be rubbed and polished in from three to four days.

OVB Architectural Floor Finish.

Size cans.	5 gal.	1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
No. 300.....per can	$14.50	3.00	1.60	.85	.48	.25

This varnish is the best that money can buy. Made from all hard gum and free from resin. Will not mar white and is not affected by hot or cold water. Dries dust free in from two to three hours, and under favorable conditions, can be walked upon over night. Best results are obtained by applying two coats well brushed out.

OVB Transparent Liquid Wood Filler.

Size cans.	1 gal.	½ gal.	1 qt.
No. 429.....per can	$1.35	.71	.39

The base of this varnish is made from good hard gum and combined with a transparent pigment produces a perfect first coater. Is superior to shellac, as it resists moisture better and absolutely seals up the pores of the wood. Saves at least one coat of varnish.

CARRIAGE AND AUTOMOBILE.

OVB Pale Wearing Body.

Size cans.	1 gal.	½ gal.	1 qt.	1 pt.
No. 320.....per can	$4.50	2.35	1.25	.65

A very pale varnish of great brilliancy and durability. Dries dust free in ten to twelve hours, and can be run out in three to four days.

OVB Quick Rubbing Body.

Size cans.	1 gal.	½ gal.	1 qt.	1 pt.
No. 321.....per can	$3.00	1.55	.85	.45

A very quick and durable rubbing varnish. Used for under coats. Rubs in about three days without sweating.

OVB Black Rubbing.

Size cans.	1 gal.	½ gal.	1 qt.	1 pt.
No. 322.....per can	$3.00	1.55	.85	.45

An undercoating varnish. Dries to rub in three days

OVB Heavy Gear.

Size cans.	1 gal.	½ gal.	1 qt.	1 pt.
No. 323.....per can	$3.00	1.55	.85	.45

A very brilliant and elastic varnish for wheels and under parts. Dries dust free in eight to ten hours, and can be run out in about three days.

OVB Wagon Body Varnish.

Size cans.	1 gal.	½ gal.	1 qt.	1 pt.
No. 324.....per can	$2.50	1.35	.75	.40

A light colored, full drying and brilliant varnish for finishing wagon bodies Dries dust free in about five or six hours, and can be run out in two days.

BAKING JAPANS, ETC.

OVB Black Baking and Finishing Japans.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 312...per gal	$1.65	1.70	1.75	1.80	1.85

Suitable for use on bicycles, hardware specialties, and all work requiring a high grade finish. Flows out nicely under the brush and bakes at about 300 to 350 degrees for five to seven hours, according to the heat.

OVB Black Baking and Dipping Japans.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 313...per gal.	$0.75	.80	.85	.90	.95

Similar to the Finishing Japan, but much heavier in body, and is used principally for dipping purposes.

OVB Air Drying Black Japans.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 314...per gal.	$0.60	.65	.70	.75	.80

Good body and luster. Dries in about eight hours.

OVB Black Wrought Iron Finish.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 315...per gal.	$2.25	2.30	2.35	2.40	2.45

A dull, rich colored black for metal or wood. Air dries in about eight to ten hours, giving a wrought iron finish effect. Especially adapted for use on gas stoves.

OVB Turpentine Asphaltum.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 316...per gal.	$0.90	.95	1.00	1.05	1.10

Made from the best Gilsonite asphaltum gum; very brilliant and dense in color. Works freely under the brush and dries quickly.

OVB B Asphaltum.

Size	1 bbl.	½ bbl.	10 gal.	5 gal.	1 gal.
No. 317...per gal.	$0.36	.41	.46	.51	.56

Similar to the above, but thinned with benzine. A good article for furnace doors, boiler fronts, etc.

SHELLAC.

OVB White.*

	1 GAL.	½ GAL.	1 QT.	1 PT
No. 425.....per gallon	$			

For under coats before varnish or hard oil is applied. Used on light woods. Dries hard in three to four hours.

OVB Orange.*

	1 GAL.	½ GAL.	1 QT.	1 PT.
No. 426.....per gallon	$			

Same as No. 425, but orange in color. For darker woods, such as oak, etc. Made from selected gum and wood or grain alcohol. Dries hard in four hours. Used for finishing and also for under coats of varnish. Superior for covering knots and pitch.

*Nos. 425 and 426 prices subject to market changes.

GOLD AND ALUMINUM PAINTS, ETC.

SAPOLIN GOLD ENAMEL.

Gerstendorfer's.

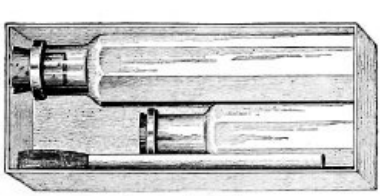
No. 20—Small size, consists of one bottle of bronze powder, one bottle of liquid, one tin for mixing, one outfit in a box, w't per doz., 4 lbs..per dozen $2.50

No. 10—Medium size, otherwise same as No. 20, w't per doz., 8 lbs.,..per dozen 3.60

No. 4—Large size, otherwise same as No. 20.....per dozen 5.80

Sapolin covers all surfaces with a smooth coating, free from streaks. Can be washed with soap and water and will retain its lustre. It is ready for use and easily applied, being particularly adapted for gilding furniture, gas fixtures, leather work, metallic ornaments, etc.

STAR GOLD PAINT.



Gerstendorfer's.

No. 5—Consists of one bottle of bronze powder, one bottle of liquid and brush, one outfit in a box, w't per doz., 2½ lbs ..... per dozen $1.80

This is a good gold paint for all kinds of decorations.

ONE DOZEN IN A CARTON.

STANDARD GOLD PAINT.

Gerstendorfer's Ready Mixed.

No. 30—Medium size, one bottle in a wooden box with brush, w't per doz., 4 lbs.....per dozen $2.50

This is a very satisfactory gold paint.

ONE DOZEN IN A CARTON.

SAPOLIN JAPANESE GOLD PAINT.

Figure given gratis with first order of Japanese Gold Paint amounting to $16.00.

Gerstendorfer's Ready Mixed.

No. 3—Small size, one dozen bottles in carton with brushes, w't per doz., 2 lbs., per dozen..... $1.50

No. 2—Medium size, one bottle in a highly polished wood box with brush, w't per doz., 4 lbs.....per dozen 3.00

No. 1—Large size, otherwise same as No. 2, w't per doz., 6¼ lbs.....per dozen 5.50

This is a gold paint for all kinds of artistic and decorative gilding. Its appearance is so brilliant that only experts can tell whether the article is coated with gold leaf or not. For this reason it can be used as a perfect substitute on all articles where gold leaf has been used heretofore.

A handsome gilded figure is given with first order amounting to $16.00, showing the brilliant and lasting effect of Japanese Gold Paint. Figure is 15 in. high, encased in glass and rests upon a rosewood pedestal.

NOS. 2 AND 1, ONE DOZEN BOXES IN A CARTON.

PATENTED BRONZE PAINTS.

SEE NEXT COLUMN.

Ready mixed gold paint has never been a success for practical work. Unmixed gold paints or the buying of bronze and liquid separately requires an experience in properly mixing in order to paint with the best results. This device holds the bronze powder (gold or aluminum as the case may be) and the bronzing liquid IN ACCURATE PROPORTIONS SEPARATELY until required for use, being literally a can within a can. The decorator need only empty the contents of the upper can containing the gold (or aluminum) into the lower containing the bronzing medium and he has in a handy tin all ready mixed the best gilding preparation ever placed before the public.

PATENTED BRONZE PAINTS.

ORMOLOID.

For Gold Leaf Effect. Liquid and Powder Separate.

No. 50—Special size cans, w't per doz., 2 lbs..... ..... per dozen $2.00

FURNITURE POLISH AND FLOOR PREPARATIONS.

"OUR VERY BEST" FURNITURE POLISH.

Removes the Dirt, Gives Life to Varnish, Brings Back the Polish.

3 oz. Bottles, one dozen in a counter display box, w't per doz. 9 lbs.. per dozen $1.35
6 oz. Bottles, half dozen in a counter display box, w't per doz. 11 lbs.. per dozen 1.80
1 gal. Cans, w't 8 lbs.....each 1.35

In recommending this polish, we do so with the full knowledge of its ingredients. It contains no acids, kerosene, lard oil, grease, lime, lye or potash, chloride of lime, or, in fact, anything harmful to the furniture. There has never been anything like it produced. It can be used on the finest pianos, all kinds of furniture, and store, office and bank fixtures. It restores the original finish, removes dirt, grease, finger marks, ink, etc. It is equally good on oil finish, varnish, shellac, lacquer or painted surfaces, and is by far the best polish, renewer and cleaner on the market.

ZOL FURNITURE POLISH.

"Zol" disinfects and cleans, while at the same time it imparts a deep, rich lustre. It brings back the fresh look that things have before they are aged by grime and wear. It should be used daily on dusting cloths. It will not smear, dries quickly, and contains no acid.

Zol—Cleaner and polisher, 8 oz. bottles, w't per doz. 20 lbs., per dozen..... $3.00

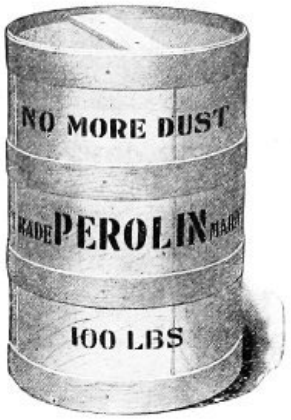
ONE DOZEN IN A BOX.

LIQUID VENEER.

Liquid Veneer is a wonder worker. It will make refinishing or revarnishing entirely unnecessary. It is not a varnish but a surface food and cleaner which builds up the original finish and makes it brighter than ever. No brush is needed—nothing but a piece of cheese cloth and there is no drying to wait for. It removes all scratches, stains, dirt and dullness, and it can be applied to any finish with beneficial results. It is perfectly adapted to natural wood as well as any color of paint. It will improve the most beautiful furniture. It will take that smoky look from the piano and other mahogany and it is highly beneficial to golden oak, white enamel, gilt, silver, and other finishes. Extensive advertising in high-class magazines is causing a great demand for Liquid Veneer and dealers everywhere find that it is a lively seller.

No. 13—1 gal. bottles, w't 15 lbs., per gal. $4.25
No. 14—½ gal. bottles, w't 9 lbs. " 4.75
No. 15—¼ gal. bottles, w't 4 lbs. " 5.50
No. 1—50 cent size, 12 oz. bottles, w't per doz. 24 lbs.....per dozen 8.00
No. 2—25 cent size, 4 oz. bottles, with display stand, w't per doz. 11 lbs., per dozen..... 4.50

PEROLIN SWEEPING POWDER.



100, 200 and 300 lb. Drums, for general use.....per 100 lbs. $7.00
25 Cent Canisters, containing 5 lbs., for general use, one dozen in a case, per dozen..... 4.50

Perolin is the original German disinfectant and dustless sweeping powder. It is a dust absorbent that absorbs dust. It scours and polishes floors to such an extent that after several weeks of continuous use, frequent scrubbing can be dispensed with. It cleans and preserves carpets and rugs. It disinfects and purifies the air. Perolin will prove invaluable in any store where goods are displayed on the counters or any place where settling dust causes damage. Saves merchandise for the storekeeper and saves work for the housewife.

DUSTLESS FLOOR OIL.

Keeps Down the Dust.

5 gal. Cans, w't 40 lbs.....per gallon $0.95
1 gal. Cans, w't 8 lbs..... " 1.00
½ gal. Cans, w't 4 lbs..... " 1.35
1 qt. Cans, w't 2 lbs..... " 1.60

This is a thin coating to apply to office, store and public hall floors. Keeps down the dust and protects the floor. It is easily applied, and is coming into general use. In sweeping the dust does not leave the floor, but rolls up and brushes easily along. One gallon will cover 200 to 300 square feet, according to the nature of the wood and surface.

JOHNSON'S FLOOR WAX.

1, 2 or 4 lb. Cans.....per pound $0.60

Prepared from materials adapted to produce the best results. It is perfectly transparent, and will not change the natural color of the wood. It does not show scratches or heel marks.

JOHNSON'S POWDERED FLOOR WAX.

1 lb. Perforated Top Round Cans...each $0.60
½ lb. Perforated Top Round Cans... " .36

This is especially recommended for dancing floors.

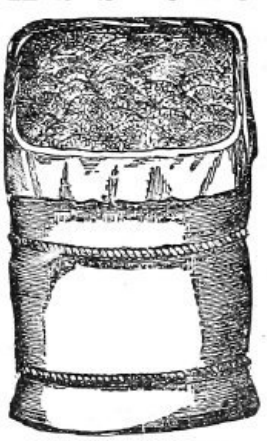
LINOLEUM LUSTRE.

No. 1—Case containing twelve 1 qt. cans, w't per case 33 lbs.....per case $9.60
No. 2—Case containing eighteen 1 pt. cans, w't per case 30 lbs.....per case 7.80
No. 3—Case containing assortment of eight 1 qt. cans and eight 1 pt. cans, w't per case 32 lbs.....per case 9.44

A liquid preparation made especially for linoleum and printed oil cloth. It is without a peer as a color and pattern preserver. Linoleum is to-day one of the most popular of all floor coverings, its most objectionable feature has been the continual unevenness of wear, causing color to become dull and pattern to be lost, leaving a decidedly spotted effect in the linoleum. By the use of Linoleum Lustre the linoleum or oil cloth will retain all its original brightness and lustre, thus making its life much longer and service more satisfactory. It is easily applied, in fact, a child can apply it, as it is impossible to get an uneven surface, such as would cause it to crack or blister when dry. Applied in the evening it will be dry in the morning. Hot or cold water does not affect it.

One quart of Lustre will cover 160 square feet.

CUBAN SPONGES.



Thoroughly Washed.

No. 20—Best Cuban sheepswool, per pound..... $4.50
No. 30—Best Cuban grass.....per pound 1.30

These sponges are very strong, soft, and free from grit. For washing buggies, and for general painters' use.

WEIGHT PER BALE 50 LBS.

LUBRICATING OILS.

CHARGE FOR CONTAINERS.

No. 12—REVONOC, 8 oz., with oil can with patent screw top, otherwise same as No. 36, - - - per case 1.75
ONE DOZEN IN A CASE

LINSEED OIL.

American Linseed Co's Brand.

Raw, strictly pure, old process, - - - - - - - - - - - - - - - - - - per gallon $

Boiled, strictly pure, old process, - - - - - - - - - - - - - - - - - "

Linseed oil sold by weight, 7½ lbs. to the gallon.

Linseed oil is shipped direct from the following points: Chicago, Milwaukee, St. Louis, New Orleans, Des Moines, Sioux City, Omaha, Kansas City, Minneapolis and St. Paul.

Raw linseed oil is a straw yellow color and weighs 7½ lbs. to the gallon. The boiling point is 597 degrees, and it solidifies at 17 degrees Fahrenheit. Its specific gravity at 60 degrees F. is .930. Raw linseed oil is used mostly for light colored and white paints. It is the best for outside use; requires three days to dry in summer heat and has more elasticity than when boiled.

Boiled linseed oil has a dark red amber color, and boils at 597 degrees F. The object of boiling is to dissolve the fatty and greasy portions of the oil, causing it to more thoroughly unite and dry quickly. It requires twenty-four hours to dry in summer heat. Cannot be used in white paint without discoloring it.

MISCELLANEOUS OILS.

Gloss Oil, - per gallon $

Used in place of linseed oil for barrel paints; often substituted for varnish for cheap work, such as toys, willow ware, etc.; extensively used for sizing walls (for which purpose it is excellent), to stop suction before calcimining. It is purely a rosin product, therefore will not mix with lead or zinc; can be used in dry paints, etc., but we do not advise its use.

Spirits of Turpentine, - per gallon $

Mostly used for reducing paint, especially for inside work; used in all varnishes and indispensable to the painter. When used with judgment, this article is of benefit; unless its effects are understood, paints may be easily destroyed by it.

Wood Turpentine, - per gallon $

Wood Turpentine differs from Spirits of Turpentine in that it is distilled from the gum while it is in the wood, while Spirits of Turpentine is distilled from the gum after it has been taken from the wood.

Benzine or Naphtha, - per gallon $

This is a mineral product used by painters, but is usually looked upon as an adulterant. This is a mistake. Benzine, when properly used, is superior to turpentine for numerous purposes. It contains less oil, and will not deaden liquids, such as linseed oil. It evaporates, leaving no sediment, therefore, varnish for inside work can be reduced by it much thinner than if turpentine were used, without destroying its lustre. It is in most cases a better solvent for dryers, etc., than turpentine.

Rubbing Oil, - per gallon $

This article is very valuable for rubbing and polishing varnish in connection with pulverized pumice and rotten stone. It does not dry or become rancid, and can easily be wiped off after the work is completed.

Wood Alcohol, - per gallon $

A perfect substitute for grain alcohol, for all mechanical purposes. It is a better solvent for shellac gums and is equally good for burning purposes. Makes an excellent carriage for fine wood fillers.

We make no charge for packages on oils when sold in full barrels. When sold in less than full barrels, we charge the wholesale price of the container.

H. S. B. & CO'S WHITE LEADS.

Manufactured to Our Order and Fully Guaranteed.

I X L, 1 lb. cans,	per pound	$0.11
I X L, 2 lb. cans,	"	.11

DRY MINERAL PAINTS.

Dark Red Iron.

	BARRELS	LESS
No. 1—350 lb. barrels, - - - - - - - - - - - - - - - - per pound	$0.01½	$0.02½

Made from Lake Superior iron ore of the very best hematites in the country; requires a small amount of oil to mix it; free from impurities.

Seal Brown Iron.

No. 2—350 lb. barrels, - - - - - - - - - - - - - - - - per pound	.01¾	.02¾

Made from Lake Superior iron ore of superior shade and quality, of a brown shade, and equal to No. 1 for durability.

Rosy Red Iron.

No. 3—350 to 400 lb. barrels, - - - - - - - - - - - - - - - - per pound	.01¼	.02¼

An iron ore paint, very fine, mixes readily with oil; no sediment; has been on the market for over sixteen years and proved a good red.

Purple Iron.

No. 4—400 lb. barrels, - - - - - - - - - - - - - - - - per pound	.02¼	.03¼

An iron oxide of an excellent purplish cast, a change in color from the red and brown, and very extensively used.

Iron Ridge Iron.

No. 5—300 to 360 lb. barrels, - - - - - - - - - - - - - - - - per pound	.01¼	.02¼

The first iron ore paint made in the United States, always satisfactory; brownish red shade.

Metallic Brown.

No. 6—Prince's shade, 300 to 360 lb. barrels, - - - - - - - - - - - - per pound	.01½	.02½

A red brown iron ore paint; very serviceable.

Red Iron Primer.

No. 7—500 lb. barrels, - - - - - - - - - - - - - - - - - - per pound	.02¾	.03¾

An iron ore paint for priming machinery, wagons, etc.; very fine and makes a smooth coat; first class in all respects; used very extensively under vermilion.

Metallic Red Oxide.

No. 8—336 lb. barrels, - - - - - - - - - - - - - - - - - - per pound	.02¼	.03¼

An excellent red oxide, stronger than Venetian red; a good, strong article for mixing with lead.

Tuscan Red Oxide.

No. 9—336 lb. barrels, - - - - - - - - - - - - - - - - - - per pound	.02¼	.03¼

A fine deep shade, good body, covers extra well, and is very durable; oil gives it a fine tone which never changes.

Mortar Red.

No. 10—300 lb. barrels, - - - - - - - - - - - - - - - - - - per pound	.01¾	.02¾

A good strong color; will not fade; stands well with any mortar, as the lime will not burn it.

DRY MINERAL PAINTS.

Indian Red.

	BARRELS	LESS
No. 11—400 lb. barrels, - - per pound	$0.04½	$0.06

A fine, rich shade, good body and covering capacity.

Maroon Oxide.

No. 12—400 lb. barrels, - - per pound	.02½	.03½

One of the finest purple shades, remarkably durable; large barrels only.

American Venetian Red.

No. 13—350 lb. barrels, - - per pound	.01¼	.02¼

Good shade, ground fine, universally sold all over the country.

Cookson's English Venetian Red.

No. 16—336 lb. barrels, - - per pound	.01⅞	.03

This is genuine, and the finest red on the market; cannot be imitated; is of a purple shade when dry; when mixed in oil it is an excellent bright red.

Royal Venetian Red.

No. 72—336 lb. barrels, - - per pound	.01⅞	.03

Our own selection of English Venetian red; very fine; spreads smoothly under the brush; color strong; stands well.

Perfection Venetian Red.

No. 73—336 lb. barrels, - - per pound	.02	.03

This is also our selection of an English red; very strong; ground very fine; spreads smoothly under the brush; free from grit of all kinds; the very best red for the money ever put on the market.

Light Chrome Ochre.

No. 28—355 lb. barrels, - - per pound	.03	.05

A mineral chrome ochre; very fine, bright in color, does not change when mixed in oil.

Medium Chrome Ochre.

No. 29—355 lb. barrels, - - per pound	.03	.05

Same as No. 28, but more brilliant; good strength and a general favorite among painters.

Oxford Shade Chrome Ochre.

No. 30—355 lb. barrels, - - per pound	.03	.05

Same as Nos. 28 and 29, but a darker shade; excellent body.

Roman Chrome Ochre.

	BARRELS	LESS
No. 31—355 lb. barrels, - - per pound	$0.03	$0.05

Very fine color and a good favorite; used principally for mixing with lead.

Rochelle Yellow Ochre.

No. 33—400 lb. barrels, - - per pound	.01½	.02½

Used for general purposes such as priming and mixing with other pigments; not as fine as French ochre, but gives universal satisfaction.

French Yellow Ochre.

No. 34—375 to 400 lb. barrels, - per pound	.01¾	.02¾

The standard yellow ochre and most called for of all ochres; is fine and of good quality; gives every one satisfaction, and the price is reasonable.

Bermuda Yellow Ochre.

No. 35—375 to 400 lb. barrels, - per pound	.01½	.02½

A good ochre for the money, excellent in quality and well liked by the trade as a cheap ochre.

Golden Washed Ochre.

No. 36—375 to 400 lb. barrels, - per pound	.01¼	.02¼

A very fair ochre and will give good satisfaction for a low-priced article.

Zinc White Mineral.

No. 42—500 to 575 lb. barrels, - per pound	.01⅞	.03

Very white, good body, and an excellent article to mix with lead for priming, or to be used alone for the same purpose.

French Gray.

No. 47—375 lb. barrels, - - per pound	.01¼	.02¼

An excellent shade of gray, especially noted for its fineness; will mix with any pigment; never settles when in oil; very popular.

Stone Gray.

No. 67—375 to 400 lb. barrels, - per pound	.01¼	.02¼

A good shade of gray; fair body; very fine.

DRY COLORS.

Gilders' Whiting.

Bolted, 350 lbs. in barrel, - - - - per pound $0.02

Both lump and bolted are for the same purpose. Extensively used in the manufacturers' arts.

Chalk.

Lump, 300 to 400 lbs. in barrel, - - - per pound $0.02

For coopers' use.

Dry White Lead.

In Bulk, or 600 lb. barrels, - - - - per pound

This is mostly used to make cements and carriage putty. It is also mixed and ground in connection with various pigments to produce colors, giving them a body and covering capacity. At the present day this article can be had in nearly every form imaginable.

Plaster of Paris.

260 lbs. to Barrel, - - - - - per barrel $3.15

For making casts, finishing coats of wall plaster, and is now fast taking the place of lime in wall plaster. Nearly all patent plaster is mixed with this article in the place of lime. By retarding the setting of the plaster of Paris with powdered glue and air-slacked lime, or china clay, it can be made to set in any desired length of time. The addition of alum water will harden this article like granite.

No charge for barrels.

Ordinary Lamp Black.

A Sanitary Calcimine.

		Tints.	White.
Barrels (350 lbs.), all shades,	per pound	$0.08	$0.07
Kegs (100 lbs.), all shades,	"	.08½	.07½
5 lb. Packages (20 packages in case), all shades,	"	.11	.10

Calcimo requires only cold water to mix it; flows freely under the brush; dries with a hard, smooth surface; will not rub off, crack, scale or blister. The practical workmen are adopting it everywhere, and it can be used by inexperienced help. It does away with the old-fashioned glue mixtures that require hot or boiling water. It will not lose its properties after being mixed; never works cloudy, streaky, or changes color. It is used by the U. S. government and has been adopted by the school boards throughout the country. It is a disinfectant, therefore is the very best wall coating for hospitals, asylums, prisons, etc.

No. 213,	"	.10½	.11	.11½	.12

A wonderful cold water paint; weather proof, fire proof, and a substitute for oil paint; a powder that mixes easily with cold water. Anyone can apply it; will remain in suspension while in solution with no sediment; can be put on any kind of surface; produces a water-proof coating; will not wash off; will stand the snow and rain; is but a fraction of the cost of oil paint; will last for years; one coat covers better than two coats of paint or whitewash; will not rub, crack, scale or peel off. Suitable for elevators and factories (inside and outside), boiler rooms, breweries and basements; also sides of buildings and areaways, brick and stone walls, courts, sheds, etc.; can be applied with a machine. About 5 lbs. dry powder will produce a gallon of paint. Never put up in 5 lb. packages, 25 lb. kegs being the smallest package.

BULK GLUES.

Our glues are made of the very best selected material and we guarantee them to run uniform in grade and quality.

	IN BARRELS	LESS QUANTITY
H. S. Amber—In sheets of 2×4, packed in barrels of about 200 lbs., - - per pound	$0.21	$0.22½
A first-class joining glue for general purposes, such as hardwoods.		
Ribbon Amber—In sheets of 8¼ × 1 in. packed in barrels of about 250 lbs., - per pound	.18	.20
A medium grade of cabinet glue.		
X3 Pure Hide Glue—In broken flake form, packed in barrels of about 250 lbs., per pound	.22½	.24
A high grade joining, especially adapted for fine cabinet work.		
B Amber—Broken flake glue, packed in barrels of about 250 lbs., - - per pound	.14¼	.15¾
A cheaper joining glue, good for soft wood work, also sizing.		
Sinew Stock—Broken flake gelatine, packed in barrels of about 175 lbs., - per pound	.24	.25½
A clear, pure gelatine glue for extra fine sizing, calcimining and painters' glue; also good for general work where the very best glue is required.		
Hide Stock Calcimining Glue—Broken flake, in barrels of about 245 lbs., - per pound	.22½	.24
A high grade of opaque glue, better known as IX, good for joining where a light glue is required.		
Hide and Sinew Ground Glue—Packed in barrels of about 400 lbs., - per pound	.18	.19½
A good glue for sizing, paper box work, and also for general use. It dissolves very rapidly.		
White Thin Stock—Broken flake in barrels of about 200 lbs., - - - per pound	.22½	.24
For very fine calcimining and tinting, where it requires a pure white glue.		
A White—Broken flake in barrels of about 250 lbs., - - - - per pound	.18	.19½
Also a first-class calcimining glue. Thicker cut than the white thin stock.		
H. S. B. White Ground—In barrels of about 400 lbs., - - - - per pound	.21	.22½
A general calcimining glue, dissolving very fast, and does the very best of work. We recommend this very highly.		

We can furnish any of the above glues in ground form at the additional cost of ½ cent per pound.

A Pointer to the Glue User.

In all cases, use ground glue if possible, as it will save considerable time in getting your glue ready for use, as it dissolves considerably faster than the flake glue and also requires less attention. It is best to soak the glue in cold water for an hour or so, then add hot water, and in a very few minutes will be ready for use.

Powdered,	" .10

Most of this article comes from England; is of a very fine grit for polishing high surfaces, usually after pumice stone has been used.

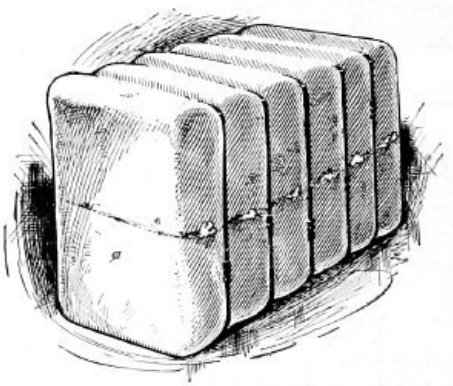
STEEL WOOL.

No. 0—For rubbing and polishing, instead of pumice stone, per pound,		$0.75
No. 1—Equal to No. 0 sand paper,	per pound	.60
No. 2—Equal to Nos. ½ or 1 sand paper,	"	.60
No. 3—Equal to Nos. 1½ or 2 sand paper,	"	.45

ONE POUND IN A PACKAGE.

Steel wool is a mass of fine fibres of steel, resembling curled hair, which, while sharp, do not scratch, but will cut as smoothly as the finest abrasive material heretofore used. It is the best article for rubbing off varnish, shellac, etc., for various uses, where sand paper, pumice stone and other rubbing materials are used, and doing the work quicker, saving time, labor and cost and making it easier for the workman, as he can do the work better and quicker. Being soft and pliable, steel wool adapts itself to the shape of carvings, mouldings, etc., going into places where sand paper does not get in. Will not clog up or gum up, and can be used to the last particle. It is excellent for rubbing a first coat of varnish. When using, rub with the grain. If a particularly smooth finish is desired, use a little linseed oil.

COTTON WASTE.



Machined.

No. 1 White—Best grade,	per pound	$0.12
No. 2 White—Medium grade,	"	.11
No. 1 Colored—Medium grade,	"	.08½

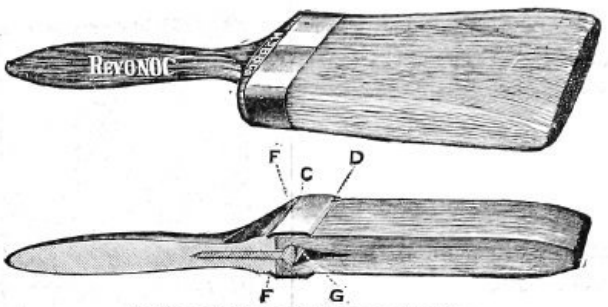
"REV-O-NOC" INDESTRUCTIBLE PAINT AND VARNISH BRUSHES.



Section of Brush showing construction.

NEW IMPROVED INDESTRUCTIBLE TACKLESS.

C and D—Ferrule beveled after plug has been driven.

F—Dovetailed handle.

G—"T" shaped corrugated aluminum plug.

These brushes must be seen in order to be fully appreciated and the customer who has once used them will never be satisfied with others. They give satisfaction under all circumstances and conditions. The holding parts are all metal and the bristles, ferrule and the handle are forced together under high pressure. This construction makes it impossible for the brushes to shed bristles or come apart, no matter for what purpose they are used or how long they are kept. They are guaranteed to wear and they will work satisfactorily in paint, varnish, shellac, hot glue or any other preparation that will not injure or destroy the brushes.

The "Rev-o-noc" brushes are the neatest and the easiest for the mechanic to keep clean. They are the strongest metal bound brushes made. They will wear close without becoming stiff. They will not "finger" or "swallow-tail" and will not dry out or come apart. Only the best quality of bristles are used. "Rev-o-noc" brushes are the most economical and satisfactory on the market and contain every quality necessary for good work.

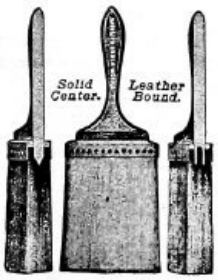
This brush is extra heavy and very elastic.

HALF DOZEN IN A BOX.

WALL PAINT BRUSHES AND PAINTERS' DUSTERS.

WALL PAINT BRUSHES.



These Brushes are the Best Because:

They have more elasticity, and break in easier.
They will hold more paint and spread it more evenly.
They will wear up closer, and wear longer.
They will not "swallow tail."
They will not come apart.
They are absolutely first-class in every respect and are fully warranted.

"Countess" Stucco, Solid Center, Leather Bound, All Long Selected Chinese Bristles.

No. 366—Sizes	30	35	40

No. 765—Black Chinese bristles, nickel plated ferrule, red polished beaver tail handle, width 2 in., length 2¼ in., w't per doz. 3¼ lbs.....per dozen $5.25
The holding parts being all metal, the cement is not relied upon alone, and it is only the flat glue brush that can be depended upon under all circumstances.

STEEL.

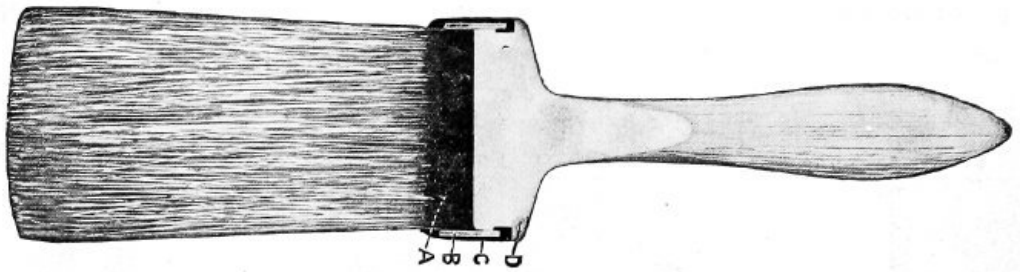
No. 109—Painters' long handle scratch, 14½ in. block, three 6 in. rows of 1¼ in. fine wire bristles, w't per doz. 4 lbs., per dozen..... $3.30

No. 177—Painters' curved back scrub, 8×2¾ in. block, 6 rows of 1 in. fine wire bristles, w't per doz. 6 lbs., per dozen..... $6.22
This brush is made for the same purpose as No. 111, but on account of its curved back and short bristles, can be used for much harder work It does away entirely with the use of sand paper and is a very popular article.

No. 111—Painters' round wire scrub, 7×2½ in. block, 6 rows of 2 in. fine wire bristles, w't per doz. 6 lbs...per dozen $5.10

No. 105—Casting foundry brush, 7¾×2½ in. solid back, 5 rows of 4 in. heavy flat steel bristles, w't per doz. 12 lbs., per dozen..... $3.60

"RUBBERSET" PAINT BRUSHES.



Construction of Rubberset Brushes.

The bristles are solidly embedded in soft rubber (see A) bound with strong metal band (B) covered with ferrule (C) the handle is dovetailed into the head (D)

The portion of the brush covered with rubber and metal is placed in a die and vulcanized or hardened under heat and pressure.

The result is a solid vulcanized head in which the bristles are so thoroughly anchored that we guarantee this strong, compact body to retain the bristles until the brush wears out.

The temperature necessary for vulcanizing the rubber in no way injures the most delicate hair or bristles.

For many years the consumers of paint, varnish, kalsomine and artists' brushes have been looking for tools that would not dry out and become loose in the cement setting, brushes that could be used in turpentine, benzine, alcohol or water without dissolving the cement and causing the bristles to come out.

This ideal brush is now perfected in the "Rubberset" in either rubber, metal or leather binding and is offered to the trade with the knowledge and confidence that they will prove to be the most serviceable, economical and satisfactory brushes ever offered.

The bristles in these brushes cannot come out under any circumstances, that is guaranteed and the name "Rubberset" is on every brush for your protection. Do not burn bristles by putting them in hot lime or acid. These brushes require no swelling before using.

STUCCO WALL.

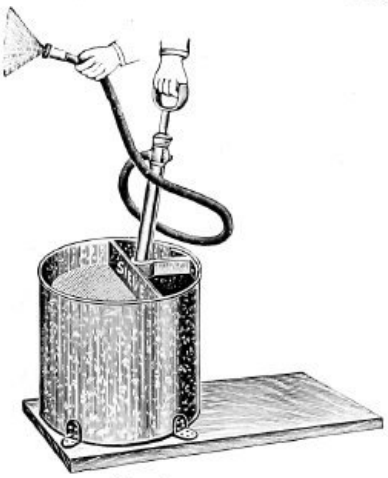
Nos. 10 and 15 are reinforced at joints.
ONE IN A CRATE.

SPRAYING MACHINES.

FOR WHITEWASH AND COLD WATER PAINTS.



No. L.

No. H.

No. J.

No. K.

No. L—"Misto," Capacity equal to work of 3 or 4 men with brushes in same time, 5 gallon heavy galvanized iron tank, galvanized sieve, double action brass pump, 4 ft. of ⅜ in. discharge hose with spray nozzle, net w't crated 10 lbs., - - - each $10.00

Guaranteed to handle properly mixed whitewash, cold water paint, Bordeaux mixture and liquids used for tree and shrub sprays.

No. H—Capacity equal to work of 5 men with brushes in same time, galvanized iron tank capacity 3 gallons liquid, one spray cock and nozzle and 10 ft. ⅜ in. "STAR," special discharge hose, net w't 15 lbs., w't crated 20 lbs., - - - - - each $14.00

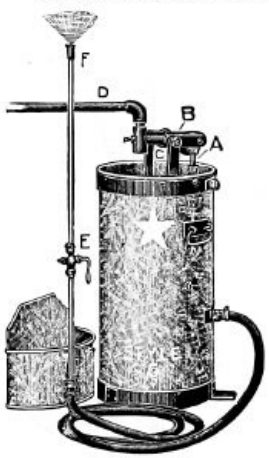
This machine is made of heavy material and all joints are well riveted and soldered. It is adapted for residences, barns, dairies, poultry yards, gardens, etc., and can be used for many other uses. They have bail handles and are very portable.

No. J.—Capacity equal to work of 5 men with brushes in same time, one spray pipe complete with cock and nozzle, one follower wrench and 10 ft. ⅜ in. "STAR" special discharge hose, machine complete as shown in illustration except pail, net w't 30 lbs., w't crated 40 lbs., - - - - - - - - - - - - - - - - - - - each 17.80

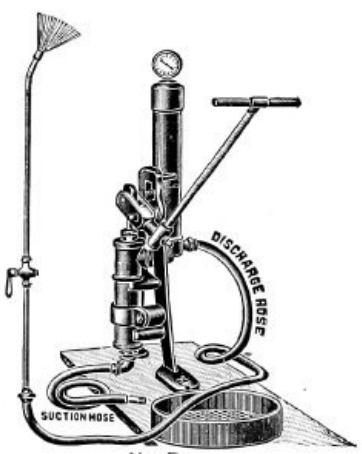
One man can operate this machine and from 70 to 80 pounds pressure can be be easily carried. This machine is adapted for use around dairies, poultry yards, residences, etc.

No. K—Capacity equal to work of 5 men with brushes in same time, galvanized iron tank capacity 8 gallons, one spray pipe complete with cock and nozzle, one follower wrench and 10 ft. ½ in. "STAR" special discharge hose, net w't 30 lbs., w't crated 40 lbs., - - - - - - - - - - - - - - - - - - - each 24.00

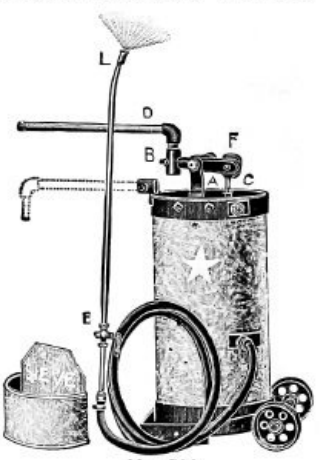
One man can operate this machine and from 100 to 125 pounds pressure can be easily carried. This machine is adapted for use around orchards and many other places.



No. G.



No. D.



No. GM.

No. G—Capacity equal to work of 8 men with brushes in same time, galvanized steel tank capacity 12 gallons, base lugs for mounting and side handles for carrying, agitator, spray pipe complete with cock and nozzle, one extra spray tip, one special galvanized sieve, one follower wrench, and 10 ft. ½ in. "STAR" special discharge hose, net w't 50 lbs., w't crated 75 lbs., - - - each 36.00

This machine is well adapted for and gives excellent satisfaction among moderate sized industries of all classes. This machine is provided with pumping lever which can be inserted in rocker arm, permitting its use in either horizontal or vertical position. No pressure gauge is furnished with this machine but provision is made for attaching same.

No. D—Capacity equal to work of 8 men with brushes in same time, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, one suction hose and 10 ft. ½ in. "STAR" special discharge hose, net w't 50 lbs., w't crated 90 lbs., - - - - - - - - - - each 37.50

This machine is the same as No. C only that it is smaller and has a few modifications. It is especially adapted for nurserymen, gardeners, etc. In country towns or on farms in addition it affords means of testing traction engine boilers, steam gauges, etc.

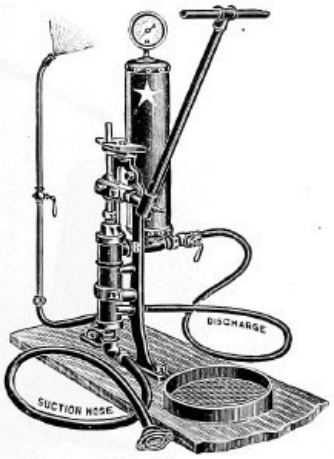
No. GM—Capacity equal to work of 8 men with brushes in same time, mounted on strong two wheeled truck, galvanized steel tank capacity 12 gallons, agitator, spray pipe complete with cock and nozzle, one extra spray tip, one follower wrench, and 10 ft. ½ in. "STAR" special discharge hose, net w't 70 lbs., w't crated 90 lbs., - - - - - - - - - each 38.40

This machine is identically the same as No. G in size, construction and material except it is mounted on a strong two wheeled truck enabling its being conveyed from place to place while filled with materials.

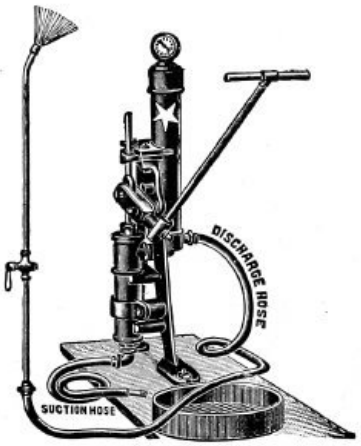
These machines are guaranteed to successfully handle and give satisfactory service with properly-prepared white wash, any of the cold water, mineral or graphite paints offered on the market, or any that can be formed into a fine spray or mist. They are not recommended for use with heavy oil paints, that is those whose base is white or red lead mixed with heavy linseed oil. These ingredients, being of a sticky, gummy nature, clog up and prevent spray working satisfactorily. This is also true of all spray nozzles with which we are familiar, and this means all of them.

SPRAYING MACHINES.

FOR WHITEWASH AND COLD WATER PAINTS.



No. B.



No. C.

No. I.

No. B—Capacity equal to work of 20 men with brushes in same time, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, one suction hose and 20 ft. ½ in. "STAR" special discharge hose, net w't. 70 lbs. w't. crated 130 lbs., - - - - - - - - - - each $53.50

This machine is built on the same lines and of the same construction as No. A except that it has a trifle smaller pump cylinder and lighter frame. It is adapted for same classes of work as No. A.

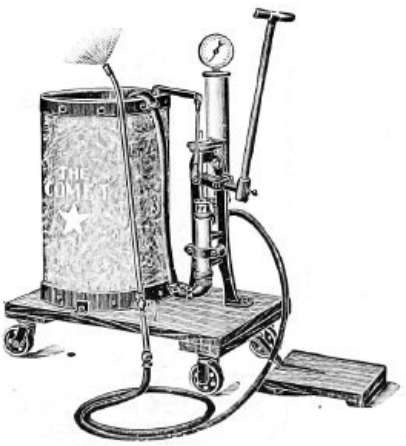
No. C—Capacity equal to work of 12 men with brushes in same time, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, one suction hose, and 10 ft. ½ in "STAR" special discharge hose, net w't 60 lbs. w't crated 110 lbs., - - - - - - - - - - - each 45.00

This machine is adapted for use around laundries, creameries, small factories, poultry farms, etc.

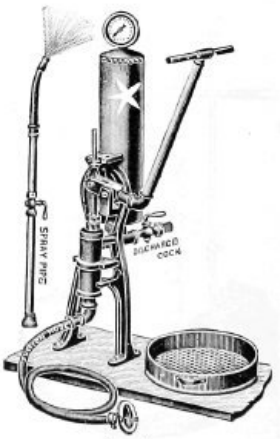
No. I—Capacity equal to work of 8 men with brushes in same time, mounted on wheel barrow frame, galvanized steel tank, capacity 12 gallons, agitator, spray pipe complete with cock and nozzle, one extra spray tip, one special galvanized sieve, one follower wrench, and 10 ft. ½ in. "STAR" special discharge hose, net w't 70 lbs., w't crated 90 lbs., - - - - - each 42.00

This machine is identically the same as No. G in size, construction and material. It is adapted for smaller classes of work such as florists, orchardists, gardeners, stables etc. and in any place requiring only a limited amount of service.

No. F.



No. E.



No. A.

No. F—Capacity equal to work of 10 men with brushes in same time, mounted on an extra heavy saddle truck, wheels 6 in. diameter 2 in. face, with 20 gallon galvanized steel tank, agitator, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, and 10 ft. ½ in. "STAR" special discharge hose, net w't 85 lbs. w't crated 110 lbs., - - - - - - - - - - - - - - - each $48.00

This machine is smaller and more compactly built than the No. E but is constructed from same materials and along same lines. It is fitted with a specially designed pump.

No. E—Capacity equal to work of 12 men with brushes in same time, mounted on heavy trucked platform, 28 gallon tank and agitator, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, one suction hose and 10 ft. ½ in. "STAR" special discharge hose, net w't 125 lbs. w't crated 150 lbs. each 57.50

The portability of this machine enables it being filled with materials any distance from and wheeled to work.

No. A—Capacity equal to work of 25 men with brushes in same time, one spray pipe complete with cock and nozzle, one extra spray tip, one 200-pound pressure gauge, one special galvanized sieve, one follower wrench, one suction hose and 20 ft. of ½ in. "STAR" special discharge hose, net w't 80 lbs., w't crated 140 lbs., - - - - - - - - - - - each 60.00

Especially adapted for railroads, breweries, packing houses, mills, factories, etc.

These machines are guaranteed to successfully handle and give satisfactory service with properly-prepared white wash, any of the cold water, mineral or graphite paints offered on the market, or any that can be formed into a fine spray or mist. They are not recommended for use with heavy oil paints, that is those whose base is white or red lead mixed with heavy linseed oil. These ingredients, being of a sticky gummy nature, clog up and prevent spray working satisfactorily. This is also true of all spray nozzles with which we are familiar, and this means all of them.

GASOLINE TORCHES.

No. 18.

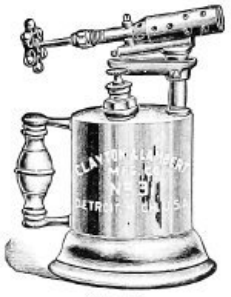
No. 18—One piece heavy brass tank, brass air pump in handle, round burner with improved double shouldered needles and wood handle regulator, brass handle, height 7½ in., diameter 3¼ in., capacity 1 pt., w't 3¾ lbs., - each $5.00

No. 29.

No. 29—One piece polished brass tank, brass air pump in handle, round burner with double shouldered needles and wood handle regulator, brass handle, height 8½ in., diameter 4 in., capacity 1 qt., w't 5 lbs., - - each $5.50

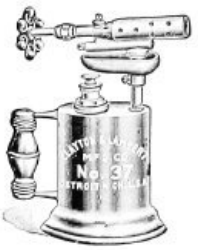
No. 16.

No. 16—One piece polished brass tank, brass air pump in handle, round burner with double shouldered needles and wood handle regulator, brass handle, height 8½ in., diameter 4 in., capacity 1 qt., w't 5 lbs., each, - - - - $6.00



No. 31.

No. 31—Heavy polished brass tank with reinforcements, heavy fittings, brass air pump which screws into tank, round burner with double shouldered needles and round nickel regulator, powerful generator, polished brass handle, height 9½ in., diameter 4 in., capacity 1 qt., w't 5¼ lbs., - - each $6.50



No. 37—Heavy seamless brass tank, fitted with brass air pump which screws into tank, round burner with double shouldered needles and round nickel regulator, polished brass handle, height 7¾ in., diameter 3¼ in., capacity 1 pt., w't 3¾ lbs., - each $5.50

No. 32—Heavy seamless polished brass tank, heavy fittings, brass air pump which screws into the tank, round burner with double shouldered needles, round nickel regulator, powerful generator, hook and support for soldering coppers, polished brass handle, height 9¾ in., diameter 4 in., capacity 1 qt., w't 5¾ lbs., each, - - - $7.00

No. 47.

No. 47—Polished brass, oblong, 1⅞×5×8 in., with special burner hinged supports, new style automatic pump, capacity 1 pt., w't per doz. 56 lbs., - - - each $6.50

No. 48—Burner fitted with hoop and support for holding soldering coppers, otherwise same as No. 47, w't per doz. 63 lbs., - - - each $7.00

ONE IN A BOX.

Nos. 47 and 48 have been very carefully constructed, the weight has been reduced to a minimum and the shape and size of the tank are the most convenient. It is supplied with hinged supports to prevent the torch from tipping over sideways when set on the ground or bench. A special burner designed with a view of making a light, yet powerful generator that will produce flame enough for all requirements, thus insuring a perfect working and very durable torch.

Fifty-two feet and longer furnished in three sections only; additional charge for shorter ladders in three sections, $1.40 each.

STERLING.

With Shelf, Extra Well Braced, Iron Truss Rod Under Each Step Running from Side to Side and Over a Truss Block.

Sterling.

Length,	5	6	7	8	10	12 **ft.**
Weight,	16	18	24	28	36	43 lbs.
Each,	$2.75	3.30	3.85	4.40	5.50	6.60

This is an excellent ladder in every respect. Has wide steps, heavy sides and legs, and is well finished throughout. Has an absolute support for step, which positively holds sides as in a vise.

IXL IMPROVED.

Extra Well Braced.

Length,	5	6	7 **ft.**
Weight,	16½	19½	22 lbs.
Each,	$2.25	2.75	3.00
Length,	8	10	12 **ft.**
Weight,	24½	35	43 lbs.
Each,	$3.50	4.50	5.00

IXL Improved.

Made from selected and extra heavy stock, extra strong and very durable, malleable iron brackets and leg hinges, anchor irons under each step to prevent spreading, patent truss braces on back of steps corner irons over end of each leg brace, new spreading brace to hold the legs.

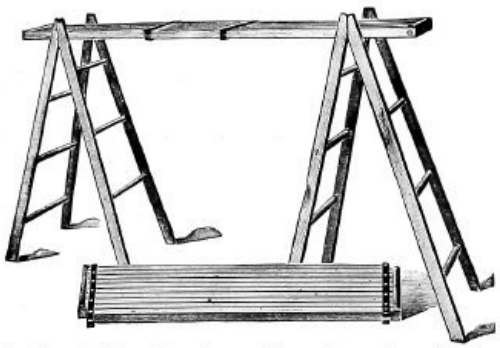
PAINTERS' TRESTLES.

Made of clear Norway pine, with hickory rungs let into sides and secured by long, heavy screws. The trestles are put together at the head with wrought iron screw bolts, making a hinge and a solid joint at the same time. A 12-ft. trestle is 12 ft. on each side; the price includes both sides.

Clear Norway Pine, Hickory Rungs.

Length,	6	7	8	10 ft.
Each,	$1.95	2.05	2.40	3.00
Length,	**12**	**14**	**16**	**18 ft.**
Each,	$3.60	4.15	4.75	5.10

AJAX EXTENSION PLANKS.



12 Inches Wide, Southern Pine, Ironed and Riveted.

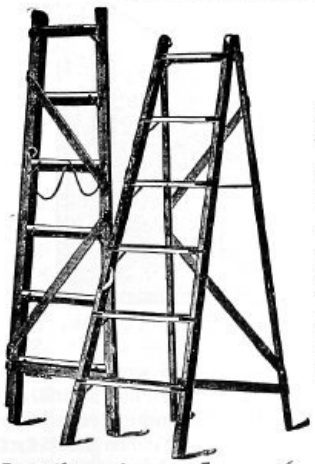
Nos.	1	2	3
Length, closed,	6	8	10 ft.
Length, extended,	10½	14	17½ ft.
Weight,	32	42	65 lbs.
Each,	$2.95	4.15	6.15

Adjustable to any space; do not spring or warp; lie even and afford a firm footing; stronger and lighter than planks; can be carried up any stairway.

Nos. 1 and 2 have 1¾×1⅛ in. strips; No. 3, 2×1⅛ in. strips.

PAINTERS' LADDERS.

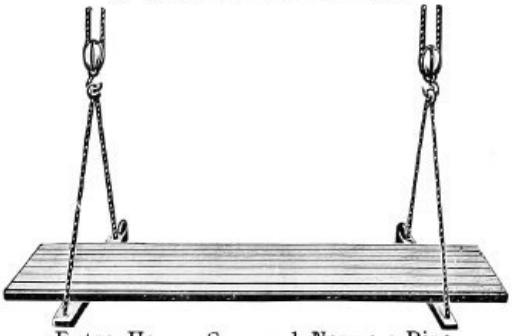
THE PAINTERS' FAVORITE.



The legs fold outside of the sides; has iron straps on sides and front of each step; iron braces on sides and back of each step, corner irons on end of each brace and legs; extra heavy stock, carefully selected as to quality. This ladder is braced at every point and folds more compactly than any other ladder, which is an important feature for painters and decorators.

Length,	4	5	6	7	8	10	12 ft.
Each,	$	1.60	2.00	2.30	2.60	3.30	3.60

SWINGING STAGES OR SCAFFOLDS.



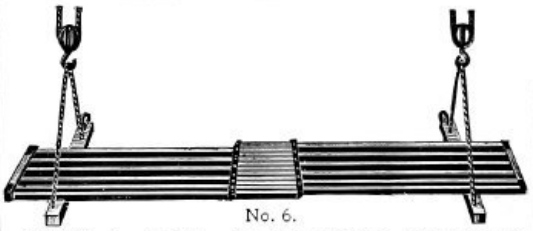
Extra Heavy Seasoned Norway Pine.

Length,	18	20	22	24	26	28 ft.
Weight,	83	92	100	110	120	130 lbs
Each,	$4.90	5.40	5.80	6.45	7.00	7.35

Special selected timber, joined together with long rods, making a strong, non-springing staging. Every one warranted.

Cross Bars and Rollers, for stages, - - per pair $ 1.50
Heavy Iron Cornice Hooks, - - - " 12.00
Common Cornice Hooks, - - - - " 10.00

AJAX EXTENSION STAGES AND ROOF HOOKS.



No. 6.

18½ Inches Wide, Southern Pine, Ironed and Riveted.

No. 6—Stages, 10 ft. closed, 17½ ft. extended, wt. 120 lbs., - - each $10.95

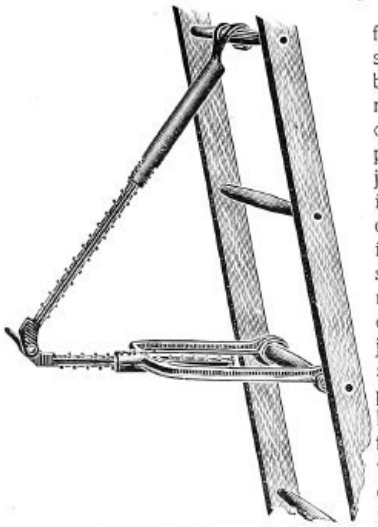
These are the same as Ajax Extension Planks, except for their greater width, and possess equal advantages.

No. 5.

No. 5—Roof hook, adjustable, per pair $1.00

Easily attached to any ladder and much more practical than the old style hooks. They are made very strong and durable.

LADDER JACKS.



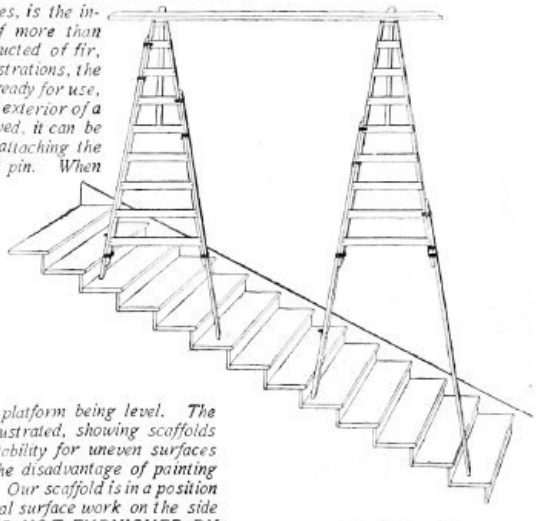
We call attention to the following points of superiority, simplicity, strength and durability: There are no screws, nuts, bolts or pins to get loose or lost, there are no loose pieces to put in place. This jack is so constructed that it is impossible for it to get out of order, loose or slip, as the interlocking bars are so constructed that it can not be moved without giving either end a quarter turn. It is adjustable every one-quarter inch so as to be able to make the plank level at any angle of the ladders. It can be adjusted from 12 to 24 in. wide. It will hold up any load that ladders will carry, and will work in or outside of ladder.

Giant, malleable iron, - - - - per pair $5.50

LEUZ ADJUSTABLE SCAFFOLDS.

Trestles for interior decorating and ceiling work.

The Leuz Scaffold is designed for various purposes, is the invention of a practical painter and paper hanger of more than thirty-seven years' actual experience. It is constructed of fir, light weight, strong and durable. As shown by illustrations, the construction is simple, easily adjustable and always ready for use, in any position, to reach any points in the interior or exterior of a building, for any desired purpose. As will be observed, it can be used as a ladder by raising the "nose" or bracket attaching the support, by the simple insertion of a key or cotter pin. When closed it takes up less room than an ordinary step ladder. For interior work it can be used with "nose" against the wall and plank extended, or for ceiling work a support is adjusted and a convenient and safe platform is afforded. It is an acknowledged fact that workmen invariably desire a firm and safe footing or platform. Our scaffolds fill the bill in this respect, as they are firm and free from any swaying motion. The irregularity of the surface upon which the side rails rest will not interfere with the staging or platform being level. The side rails are adjustable, as is well illustrated, showing scaffolds in use on a stairway; hence their adaptability for uneven surfaces is assured. Every painter knows the disadvantage of painting window sash from a common ladder. Our scaffold is in a position for this work when adjusted for general surface work on the side of a building. THE TOP BEAM IS NOT FURNISHED BY US. This can be made of an ordinary 2x6 in. plank, length as may be desired, according to size of working space.



For high ceiling stairway.

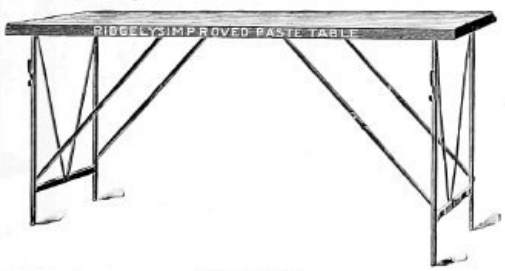
Interchangeable for Interior or Exterior Work, Made of Spruce and Fir Lumber, Castings are Malleable Iron, Nicely Painted Chrome Yellow, with Black Trimmings.

F. O. B. IOWA CITY, IOWA.

No. 3—Length closed 3 ft. 6 in., extended 12 ft., - - - - - - - - - - - - - - per pair $ 9.00
No. 6—Length closed 6 ft. 6 in., extended 18 ft., - - - - - - - - - - - - - - " 11.50
No. 12—Length closed 12 ft., extended 30 ft., - - - - - - - - - - - - - - " 16.00

WESTERN CLASSIFICATION 3RD CLASS RATE, F. O. B. IOWA CITY, IOWA.

FOLDING PASTE TABLES AND BOARDS.



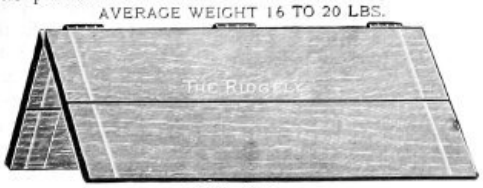
Ridgely's.

No. 10—6 ft. long, - - - - - - - each $5.20
No. 11—7 ft. long, - - - - - - - " 5.50
No. 12—8 ft. long, - - - - - - - " 5.60

The top is in four pieces riveted together with patent corrugated rivets and glued. (This is done to prevent dishing, as is invariably the case when one board 11 in. wide is used.) It folds up intact without a hook or button to manipulate.

To extend for wide goods insert three rods in the holes in back. Will not warp or dish.

AVERAGE WEIGHT 16 TO 20 LBS.



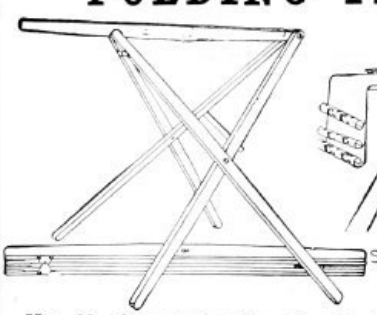
Ridgely's.

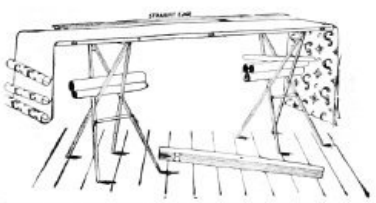
No. 7—6 ft. long, - - - - - - - each $1.90
No. 8—7 ft. long, - - - - - - - " 2.00
No. 9—8 ft. long, - - - - - - - " 2.00

$\frac{9}{16}$ in. thick, 23 in. wide, 11½ in. closed, made in four boards riveted with patent corrugated rivets and glued to prevent dishing (which always occurs in a single board 11½ in. wide), four battings to prevent warping, and hinged with three hinges.

AVERAGE WEIGHT 9 LBS.

FOLDING TRESTLES.

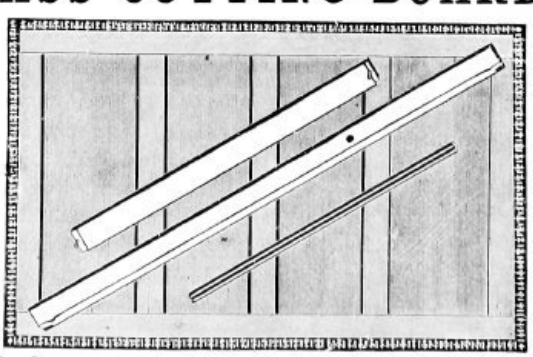




Showing Trestle in use in Connection with Paste Board.

No. 60—Improved, without board, w't per pair 4½ lbs., per pair $2.40
Folds compactly, forming a bundle 40 in. long and 2½ in. square.

GLASS CUTTING BOARDS.



No. 19—LIGHTNING, paneled, capacity 30×48 in., w't 35 lbs., each, - - - - - - - - - - $7.25

It will soon pay for itself in broken glass and wrong-cut sizes. Owing to its construction, it can neither warp, swell nor shrink, and must retain its original shape permanently. Its illuminated numbers make it possible to cut glass in the darkest places. The most inexperienced can cut as well as an expert, it being impossible for the straight edge to slip. We warrant the board unconditionally.

AMERICAN WINDOW GLASS.

Revised Price List. Adopted October 1, 1903. Per Box of 50 Square Feet.

WALL PAPER.

The following pages show a comprehensive assortment of wall papers that have been selected with great care from a very comprehensive line, and our aim in making these selections has been to offer a variety in pattern, coloring and price.

There are papers suitable for all purposes in these samples, and prices range from the lowest to a moderate figure. Every number shown is a strong selling pattern, and the big volume of business that we have already transacted on every paper shown, is the best evidence that can be secured that they are universal big sellers.

Please note that under each pattern the pattern number and price is printed plainly, and a description of the colorings in the pattern.

All of our wall paper is made in full length rolls on standard weight stock or heavier, and all will hang perfectly. The wall paper is put up in bundles containing 50 single rolls of 8 yards each, or 25 bolts. A bolt contains 2 single rolls of 8 yards each.

The correct proportion in which to order wall paper is 50 rolls of sidewall, 26 rolls of ceiling, and 8 rolls of two band bolder or 14 rolls of one band border. If a less quantity than 50 rolls of sidewall is ordered, the proportion mentioned above should be generally observed.

SPECIAL INTRODUCTORY ORDER ASSORTMENTS.

For the convenience of our customers who are willing to accept our services and knowledge as to the best selections to make up a comprehensive line of wall paper, we recommend the assortments given below. Every pattern is one of our best selling numbers and all are new. Each assortment includes paper adapted for parlors, bedrooms, dining rooms, halls and kitchens.

Assortment No. 55, 1180 Rolls, $100.00.

ALL OF THE PATTERNS MENTIONED ABOVE ARE ILLUSTRATED ON THE FOLLOWING PAGE.

ELECTRICAL GOODS.

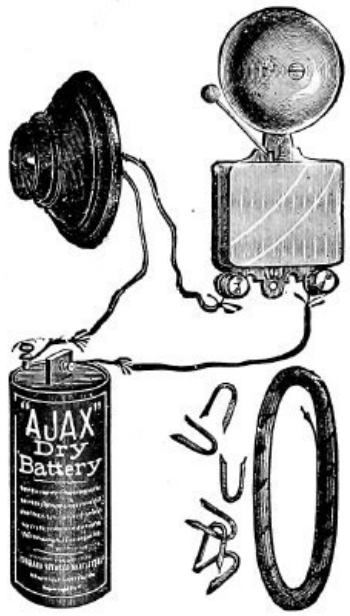
Our rapidly increasing assortment of Electrical Goods has made increased space necessary; we have accordingly transferred this line to the end of our catalogue beginning with page 2501.

The following pages were ready at the time for printing this lot. As soon as the remainder of these pages are completed a comprehensive index will be prepared.

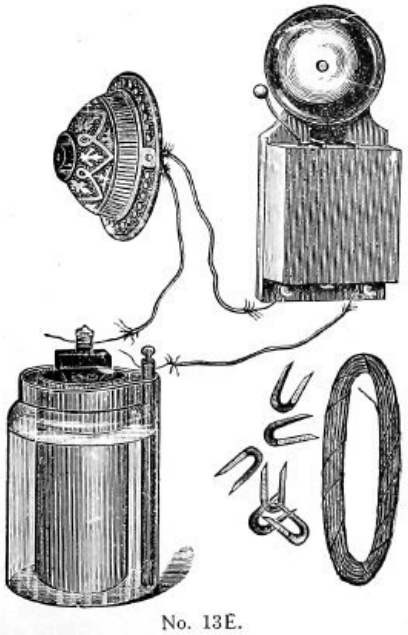
We carry a very large assortment of standard electrical supplies, appliances and tools used by electric light companies, lighting plants, telephone companies and dealers.

ELECTRIC BELLS, BUZZERS, ETC.

ELECTRIC BELL OUTFITS.



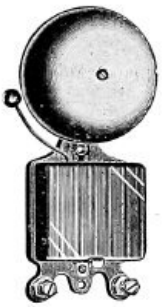
No. 26E—Ajax dry battery, 2½ in., nickel plated, iron box bell, wood push button, ½ lb. (50 feet) annunciator wire, staples, etc., w't per set 3½ lbs.....per set $1.75
Wiring diagram enclosed with each outfit.
ONE SET IN A BOX.



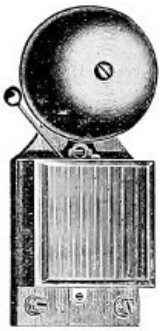
No. 13E.

No. 25E—Carbon battery, 2½ in., nickel plated, iron box bell, wood push button, ½ lb. (50 feet) annunciator wire, staples, etc., w't per set 8 lbs.....per set $2.00
No. 13E—Carbon battery, 2½ in., nickel plated, wood box bell, bronze push button, ½ lb. (50 feet) annunciator wire, staples, etc., w't per set 8 lbs...per set 2.50
Wiring diagram enclosed with each outfit.
ONE SET IN A BOX.

ELECTRIC BELLS.



No. 525E—2½ in., nickel plated, japanned iron box, w't ¾ lb.....each $0.48
No. 530E—3 in., nickel plated, japanned iron box, w't 1 lb.....each .50
No. 540E—4 in., nickel plated, japanned iron box, w't 1½ lbs.....each .66
ONE IN A BOX.

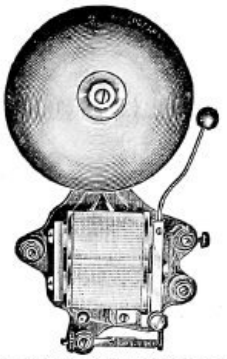


No. 425E—2½ in., nickel plated, wood box, w't ¾ lb.....each $0.70
No. 430E—3 in., nickel plated, wood box, w't 1 lb.....each .72
No. 440E—4 in., nickel plated, wood box, w't 1 lb.....each .88
ONE IN A BOX.

IMPROVED MONITOR BELLS.

No. 1900E—Nickel plated, diam. of base 3½ in., diam. of gong 3 in., total height 2½ in., w't 1½ lbs.....each $0.90
The contact spring of this bell is set in a slot in the frame, assuring positive connection, as the vibration cannot jar it loose and break the contact.
The binding posts are also set in slots in the frame, which prevents them from turning and making a poor wire connection.
Double magnets are used, giving a large surface to the armature and a powerful blow to the hammer.
The gong is secured in its place so it cannot turn, giving always a clear ring instead of a rattle caused by a loose gong.
ONE IN A BOX.

SKELETON BELLS



Nickel Plated Bell Metal Gong.

Nos	1961E	1962E	1963E
Diam.	3	4	5 in
W't	1½	1¾	3 lbs.
Each	$2.08	2.34	3.32
Nos	**1964E**	**1966E**	**1968E**	**1969E**
Diam.	6	8	10	12 in.
W't	3¼	7	11½	15 lbs.
Each	$3.60	6.00	9.60	12.00

No. 1964E is the most salable size.
All parts are heavily nickel plated, giving the bell a beautiful appearance. The steel pivot works in two brass adjustable screws with lock nut. The contact and tension screws are both easy of adjustment and provided with a locking device. Selected hardened platinum is used for contacts. The best cast bell metal nickel plated gongs are used. They are especially adapted for hotels, fire alarms, railroad signals, public buildings, etc., as they have a powerful blow and clear ringing tone.
ONE IN A BOX.

BUZZERS.

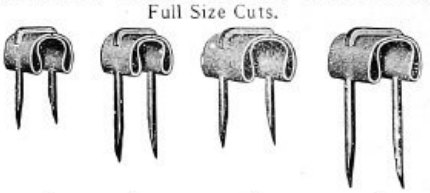
No. 2E—Iron box, 2½ in., japanned, w't ½ lb.....each $0.50
Contact points platinumized. Absolutely dust and bug proof. Will operate equally well on one to ten batteries.

ELECTRICIANS' STAPLES.

No. 12E—½ in., coppered.....per pound $0.25
No. 58E—⅝ in., coppered..... " .25
No. 34E—¾ in., coppered..... " .25

BLAKE INSULATING STAPLES.

Full Size Cuts.



1 5 3 7

No. 741E—Size 1, ½ in.....per 1000 $2.90
No. 742E—Size 5, ⅝ in..... " 2.90
No. 743E—Size 3, ¾ in..... " 2.90
No. 744E—Size 7, 1 in..... " 2.90
ONE HUNDRED IN A PACKAGE; TEN PACKAGES IN A CASE.

ELECTRIC FLASHLIGHTS.

MINIATURE.

2⅞×1⅜×¾ Inches, Brass Case, Heavily Nickel Plated and Highly Polished, Imitation Ruby Contact Button.

No. 6661E—Fitted with No. 650E Merchlor battery and No. 1480E-2½ volt Osram bulb.....each $1.25
No. C6661E—Fitted with No. 1480E-2½ volt Osram bulb, *without battery*, each..... 1.00
No. 650E—Extra Merchlor batteries, each..... .25
No. 1480E—Extra Osram bulbs, 2½ volt.....each .60

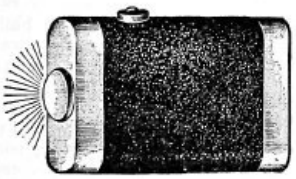
ONE IN A BOX.

2⅞×2×¾ Inch, Brass Case, Heavily Nickel Plated and Highly Polished, Imitation Ruby Contact Button.

No. 6662E—Fitted with No. 651E Merchlor battery and No. 1481E-3½ volt Osram bulb.....each $1.50
No. C6662E—Fitted with No. 1481E-3½ volt Osram bulb, *without battery*, each..... 1.20
No. 651E—Extra Merchlor batteries, each..... .30
No. 1481E—Extra Osram bulbs, 3½ volt.....each .60

ONE IN A BOX.

COAT POCKET.



5×3⅜×1⅛ Inches, Metal Case, Leatherette Covered, Nickel Trimmings.

No. 1901E (35E)—Fitted with No. 504E battery and No. 1303SE bulb, w't 20 oz. each..... $1.25
No. C1901E—Fitted with No. 1303SE bulb, *without battery*..each .90
No. 504E (350E)—Extra batteries, sunken cell.....each .35
No. 1303SE (1350E)—Extra bulbs, 3½ volt carbon.....each .35

5×2¼×1⅛ Inches, Metal Case, Cloth Covered, Nickel Trimmings.

No. 1951E—Fitted with No. 593E battery and No. 1497E-2½ volt Osram bulb, w't 17 oz.....each $1.50
No. C1951E—Fitted with No. 1497E-2½ volt Osram bulb, *without battery*...each 1.20
No. 593E—Extra batteries..... " .30
No. 1971E—Fitted with No. 693E Merchlor battery and No. 1497E-2½ volt Osram bulb, w't 17 oz.....each 1.75
No. C1971E—Fitted with No. 1497E-2½ volt Osram bulb, *without battery.*, each..... 1.40
No. 693E—Extra Merchlor batteries, each..... .35
No. 1497E—Extra Osram bulbs, 2½ volt, each..... .50

ONE IN A BOX.

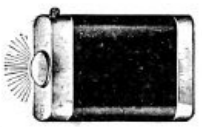
VEST POCKET.

3½×2¾×1 Inch, Metal Case, Cloth Covered, Nickel Trimmings.

No. 6502E (17E)—Fitted with No. 502E battery and No. 1202E-3½ volt carbon bulb, w't 8 oz.....each $0.90
No. C6502E—Fitted with No. 1202E-3½ volt carbon bulb, *without battery*, each..... .60
No. 502E (180E)—Extra batteries, sunken cell.....each .30
No. 1202E (118E)—Extra carbon bulbs, 3½ volt.....each .35

3½×2¾×1 Inch, Metal Case, Alligator Covered, Nickel Trimmings.

No. 6501E (18E)—Fitted with No. 502E battery and No. 1202E-3½ volt carbon bulb, w't 8 oz.....each $1.10
No. C6501E—Fitted with No. 1202E-3½ volt carbon bulb, *without battery*, each..... .80
No. 502E (180E)—Extra batteries, sunken cell.....each .30
No. 1202E (118E)—Extra carbon bulbs, 3½ volt.....each .35



3½×2¾×1 Inch, Fibre Case, Nickel Trimmings.

No. 6509E (25E)—Fitted with No. 502E battery and No. 1202E-3½ volt carbon bulb, w't 8 oz.....each $1.25
No. C6509E—Fitted with No. 1202-3½ volt carbon bulb, *without battery*, each..... .95
No. 502E (180E)—Extra batteries, sunken cell.....each .30
No. 1202E (118E)—Extra carbon bulbs, 3½ volt.....each .35

The feature of this flashlight is that it has a snap switch, giving permanent light when desired.

3½×1×1⅞ Inch, Metal Case, Cloth Covered, Nickel Trimmings.

No. 6602E—Fitted with No. 592E battery and No. 1497E-2½ volt Osram bulb, w't 6 oz.....each $1.25
No. C6602E—Fitted with No. 1497E-2½ volt Osram bulb, *without battery*, each..... 1.00
No. 592E—Extra batteries.....each .25
No. 6802E—Fitted with No. 692E Merchlor battery and No. 1497E-2½ volt Osram bulb, w't 6 oz.....each 1.50
No. C6802E—Fitted with No. 1497E-2½ volt Osram bulbs, *without battery*, each..... 1.15
No. 692E—Extra Merchlor batteries, each..... .35
No. 1497E—Extra Osram bulbs, 2½ volt.....each .50

ONE IN A BOX.

VEST POCKET.

3½×2¾×1 Inch, Fibre Case, Nickel Trimmings.

No. 6809E—Fitted with No. 603E Merchlor battery and No. 1490E-3½ volt Osram bulbs, w't 8 oz.....each $1.75
No. C6809E—Fitted with No. 1490E-3½ volt Osram bulb, *without battery*, each..... 1.40
No. 603E—Extra Merchlor batteries, each..... .35
No. 1490E—Extra Osram bulbs, 3½ volt.....each .50

EVER READY.

5×1¼ Inches, Fibre Cover, Nickel Trimmings.

No. 2702E—Fitted with No. 591E battery and No. 1497E-2½ volt Osram bulb, w't 6 oz.....each $1.50
No. C2702E—Fitted with No. 1497E-2½ volt Osram bulb, *without battery*, each..... 1.25
No. 591E—Extra batteries.....each .25
No. 2902E—Fitted with No. 691E Merchlor battery and No. 1497E-2½ volt Osram bulb, w't 6 oz.....each 1.75
No. C2902E—Fitted with No. 1497E-2½ volt Osram bulb, *without battery*, each..... 1.40
No. 691E—Extra Merchlor batteries, each..... .35
No. 1497E—Extra Osram bulbs, 2½ volt.....each .50

6½×1½ Inches, Fibre Cover, Nickel Trimmings, Glove Fastener Contact.

No. 2704E—Bulldog, fitted with No. 590E battery and No. 1497E-2½ volt Osram bulb, w't 13 oz.....each $2.00
No. C2704E—Bulldog, fitted with No. 1497E-2½ volt Osram bulb, *without battery*.....each 1.75
No. 590E—Extra batteries..... " .25
No. 2904E—Bulldog, fitted with No. 690E Merchlor battery and No. 1497E-2½ volt Osram bulb, w't 13 oz...each 2.25
No. C2904E—Bulldog, fitted with No. 1497E-2½ volt Osram bulb, *without battery*.....each 1.90
No. 690E—Extra Merchlor batteries, each..... .35
No. 1497E—Extra Osram bulbs, 2½ volt, each..... .50

NEW COMET.

8½×1½ Inches, Metal Case, Cloth Cover, Nickel Trimmings Continuous or Flash.

No. 2526E (55E)—Fitted with No. 505E battery and No. 1303E-3½ volt carbon bulb, w't 16 oz.....each $1.25
No. C2526E—Fitted with No. 1303E-3½ volt carbon bulb, *without battery*.....each 95
No. 505E (10E)—Extra batteries.. " .30
No. 1303E (110E)—Extra carbon bulbs, 3½ volt.....each .35

No. C2719E —Fitted with No. 1493E-3½ volt Osram bulb, *without battery*..... each 3.20

No. 505E (10E) —Extra batteries. " .30

No. 2919E —Fitted with No. 605E Merchlor battery and No. 1493E-3½ volt Osram bulb, w't 20 oz..... each 3.75

No. C2919E —Fitted with No. 1493E-3½ volt Osram bulb, *without battery*..... each 3.35

No. 605E —Extra Merchlor batteries..... each .40

No. 1493E —Extra Osram bulbs, 3½ volt..... each .50

11×1½ Inches, Fibre Cover, Nickel Trimmings, Large Lens, Highly Polished Reflector.

No. 2520E (15½E)—Fitted with No. 511E battery and No. 1303E-3½ volt carbon bulb, w't 26 oz..... each $3.25

No. C2520E —Fitted with No. 1303E-3½ volt carbon built, *without battery*..... each 2.95

No. 1303E (110E)—Extra carbon bulbs, 3½ volt ..... each .35

No. 2721E —Fitted with No. 511E battery and No. 1493E-3½ volt Osram bulb, w't 24 oz ..... each 4.00

No. C2721E —Fitted with No. 1493E-3½ volt Osram bulb, *without battery*..... each 3.70

No. 511E (20E) —Extra batteries.. " .30

No. 1493E —Extra Osram bulbs, 3½ volt..... each .50

13×1½ Inches, Fibre Cover, Nickel Trimmings, Large Lens, Highly Polished Reflector.

No. 2522E (16½E)—Fitted with No. 515E battery and No. 1365E-5½ volt carbon bulb, w't 31 oz..... each $3.75

No. C2522E —Fitted with No. 1365E-5½ volt carbon bulb, *without battery*..... each 3.25

No. 1365E (130E)—Extra carbon bulbs, 5½ volt..... each .35

No. 2723E —Fitted with No. 515E battery and No. 1495E-5½ volt Osram bulb, w't 28 oz..... each 4.50

No. C2723E —Fitted with No. 1495E-5½ volt Osram bulb, *without battery*..... each 4.00

No. 515E (30E) —Extra batteries.each .50

No. 1495E —Extra Osram bulbs, 5½ volt..... each .50

ONE IN A BOX.

The batteries are manufactured by an entirely new principle in dry cells. The tiny battery in combination with the Osram bulb, will give greater light, longer service and will stand much longer on the shelf without losing strength than old style batteries several times larger.

The lamps furnished in these lights have filaments of Osram which is a perfected Tungsten.

The filament is finely drawn metal, cross-sectioned to allow great length of wire and maximum concentration of light. The high point of fusibility permits of greater incandescence than ever before obtained. The bulbs are mushroom shaped and tipless. The lower half is of opal glass which acts as a reflector and owing to the wonderfully brilliant, white light a lens is entirely unnecessary.

TEN FLASHLIGHT CASES IN A STANDARD PACKAGE.

BATTERIES, CONNECTORS AND AMMETERS.

DRY BATTERIES.

No. 300E—AJAX, 1½ volts, 2½×6 in., 12 to 15 amperes, designed for telephone service, call bell, burglar alarm, etc., w't 2 lbs.....each $0.40

ONE HUNDRED AND TWENTY-FIVE IN A BARREL.

"REV-O-NOC."

No. 700E REV-O-NOC—1½ volts, 2½×6 in., 15 to 18 amperes, for use with telephones, gas engines, automobiles and wherever intermittent service of the highest efficiency is needed, w't 2 lbs., each.....$0.50

ONE HUNDRED AND TWENTY-FIVE IN A BARREL.

BATTERY BOXES.

No. 7E—PARAGON, for telephone and electric bell work, holds 2 standard size (No. 6) dry cells, sheet steel box, japanned, lined with insulating fibre, holes at top and bottom for leading wires, cover attached to box by nickel plated chain.....each $1.00

Used with desk or hotel types of local battery telephones, or in electric bell installations, provides a neat receptacle for the batteries which are generally left exposed and unprotected.

It prevents broken connections and protects the carbons, which frequently are broken when batteries are knocked over. It also keeps the batteries free from dust and dirt.

It can be fastened in any convenient place and may be attached to wall, post, desk or any desired surface. Can be removed to renew batteries, without removing screws.

DRY BATTERIES.

No. 406E (No. 160J)—EVER READY, round carton, style "J," 2½×6 in., 1⁶⁄₁₀ volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motorcycles, telephone work, etc., w't 2½ lbs.....each $0.60

No. 407E (No. 170K)—EVER READY, round carton, style "K," 3×7 in., 1⁶⁄₁₀ volts, 27 to 30 amperes, for use on automobiles, gas and gasoline engines, motor cycles, etc., w't 3¾ lbs.....each 1.20

No. 413E—Style "L," 3½×8 in., 30 to 35 amperes, otherwise same as No. 407E.....each 1.60

NO. 406E, ONE HUNDRED AND TWENTY-FIVE; NO. 407E, SEVENTY-FIVE; NO. 413E, FIFTY IN A BARREL.

No. 1406E—EVER READY, square carton, 2½×2½ in., 1⁶⁄₁₀ volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motor cycles, telephone work, etc., w't 2½ lbs.....each $0.60

ONE HUNDRED AND TWENTY-FIVE IN A BARREL.

BATTERY CONNECTORS.

No. 1071E—BULL DOG, 4½ in., safe, strong and reliable.....per 100 $10.00

TEN IN A BOX.

No. 1070E—QUICK ACTION.....per 100 $4.00

Is made of one piece of annealed copper, perfectly and permanently insulated; the attaching ends are ribbed to provide stiffness and cushion; the opening is a slot, making attachment to battery post easy and quick; the point is turned up to prevent complete disconnection if nut backs off, is clean and white.

ONE HUNDRED IN A BOX.

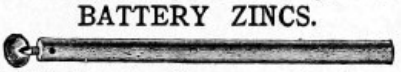
WET BATTERIES.

Carbon Cylinder.

No. 200E—Battery complete.....each $0.50
No. 202E—Carbon cylinder..... " .30
No. 203E—Jars..... " .12
No. 204E—Zinc and rubber ring..... " .06
No. 205E—Sal ammoniac, ¼ lb. packages.....per pound .30

The most powerful, efficient, and economical low-priced open circuit battery on the market. We use only the very best carbon cylinders.

BATTERY ZINCS.



No. 55E—Round, plain, copper thumb screws.....each $0.06

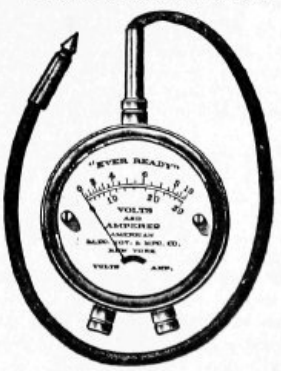
No. 65E—Square, plain, copper thumb screws.....each $0.06

AMMETERS.

No. 1E—2⅛ in., nickel plated.....each $3.00

The most accurate pocket-size instrument on the market. Can be applied to either binding post of the battery, as it indicates in either direction of current.

VOLT-AMMETERS.



No. 8E—2 in., nickel plated combination, hand calibrated, accurate.....each $4.00

This is the most efficient and convenient meter on the market. Has two scales, the top reading in volts, 0 to 10, and the lower reading in amperes, 0 to 30. Has flexible contact for reading across several cells.

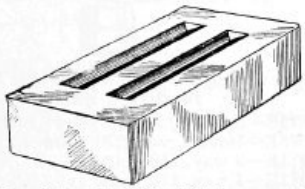
SAL AMMONIAC, TAPES, SOLDERING STICKS, ETC.

SAL AMMONIAC.

Powdered, Imported, 99 Per Cent Pure.

No. 910E—In bulk. .....per pound $0.20
No. 912E— 5 lb. packages.... " .23
No. 911E— 1 lb. packages.... " .23
No. 205E—¼ lb. packages.... " .30
No. 913E—Lump in bulk, for soldering, per pound..... .25

ABOUT SIX HUNDRED POUNDS IN A CASK.



No. 915E—Cake 4×2⅜×1⅞ in...each $0.20

These are specially grooved to take the soldering iron and are recommended for tinners, plumbers and all kinds of soldering work.

INSULATED TAPE.

For Electrical Work.

No. 60E—AJAX, friction, ¾ in., per pound $0.50
HALF POUND ROLLS IN CARTONS.

No. 62E REVONOC—Friction, ¾ in., per pound..... $1.00
HALF POUND ROLLS IN A TIN BOX.

No. 64E—Rubber, ¾ in.....per pound $1.00
HALF POUND ROLLS IN A CARTON.

Ajax Tape is the best medium priced tape on the market and is used extensively by electrical contractors, electric light plants and telephone companies. "Rev-o-noc" is a much higher grade.

No. 65E—WALPOLE, friction, ¾ in., per pound..... $1.25
HALF POUND ROLLS IN A TIN BOX.

No. 277E—NEPONSET, rubber, ¾ in., per pound..... $1.25
HALF POUND ROLLS IN A CARTON.

These are the highest grade, best quality, and equal to any on the market regardless of price.

LEATHER NAIL HEADS.

No. 3635E.....per thousand $1.00

A small leather ring or washer for use with porcelain insulators and cleats where it is desired to fasten them with nails instead of screws.

ONE THOUSAND IN PACKAGE.

SOLDERING PASTE.

No. 401E—ALLEN'S, in 2 oz. boxes, per box..... $0.25
No. 402E—ALLEN'S, in ½ lb. boxes, per box..... .45
No. 403E—ALLEN'S, in 1 lb. boxes, per box..... .80
No. 404E—ALLEN'S, in 5 lb. boxes, per box..... 3.25

No. 93E—CRESCENT, in 2 oz. boxes, per box..... $0.25

Crescent Soldering Paste is an oleate, not an acid. It is a clean, efficient and economical flux.

SOLDERING STICKS.

No. 400E—ALLEN'S.....per stick $0.25

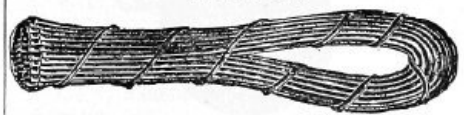
No. 92E—CRESCENT.....per stick $0.20

These sticks are non-corrosive and efficient, economical and quick acting. They are not hard or brittle, and will not crumble.

SOLDERING SALTS.

No. 3405E—ALLEN'S, ½ lb. bottles, each $0.30
No. 3406E—ALLEN'S, 1 lb. bottles, " .40
No. 3407E—ALLEN'S, 5 lb. bottles, " 2.00

SOLDER.



No. 81E—Wire..... per pound $0.50

No. 83E—Bar.....per pound $0.40

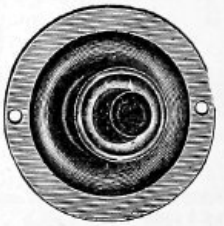
PUSH BUTTONS.

2⅜ Inch.

No. 441E—Natural oak.....each $0.15
No. 442E—Antique oak..... " .15
No. 443E—Walnut..... " .15
No. 444E—Ash..... " .15
No. 445E—Cherry..... " .15

3 Inch, Pear Shape.

No. 43E—Oak.....each $0.20
No. 46E—Walnut..... " .20



2½ Inch.

No. 9595E—Light bronze, pressed metal, each..... $0.25
No. 9598E—Oxidized copper, pressed metal.....each .30

2½ Inch.

No. 9600E—Light bronze, pressed metal, each..... $0.25
No. 9603E—Oxidized copper, pressed metal.....each .30

No. 999E—LIBERTY, 1¾ in., black with white center.....each $0.20

A moulded composition button of hard rubber finish. Better than wood or metal. It will not rust, contacts will not loosen and the mechanical details are perfect.

PUSHES, SWITCHES, ETC.

TABLE PUSHES.

No. 1261E—Nickel plated, pearl center.....each $0.50

No. 1262E—Nickel plated, black center.....each $0.50

FLOOR PUSHES.

No. 1263E—Nickel plated.....each $0.40

Used under dining room table for signaling servant.

No. 1264E—Nickel plated, combination.....each $0.50

Same as 1263E with extension attachment for connecting with table push.

FLOOR TREADS.

No. 1150E—4 in., reliable, brass finish, felt covered base.....each $0.75

Although snugly hidden under the rug it can readily be found and signal instantly made upon the slightest pressure with foot at any point. This distinct advantage is due to its full, round shape and simple construction.

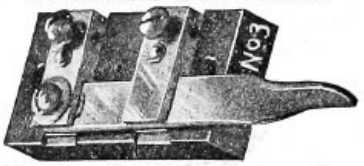
CORD NOT INCLUDED.

"NOSCRU" MIDGET PUSHES.

No. 133E—Senior, for ¾ in. hole, celluloid center.....each $0.25
No. 134E—Senior, for ¾ in. hole, pearl center.....each .35
No. 135E—Junior, for ⅝ in. hole, celluloid center.....each .25
No. 136E—Junior, for ⅝ in. hole, pearl center.....each .35
No. 137E—Pee-Wee, for ⅜ in. hole, pearl center.....each .25

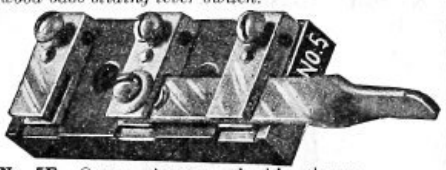
The "Noscru" pushes require no tools to install and can be connected in a moment. Have frictional contact direct on the wires, making a clean and positive contact every time button is pressed.

BATTERY SWITCHES.



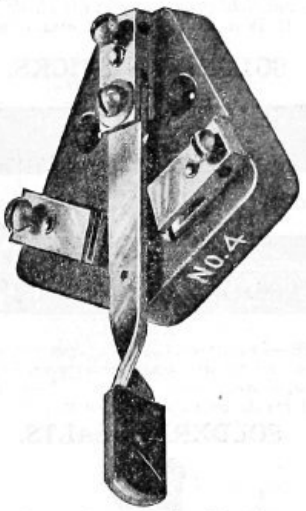
No. 3E—Quick Action, single throw, solid brass contacts, copper lever, composition base, 2⅛ in. long by 1 in. wide by ⅜ in. thick, *plain handle*.....each $0.20
No. 13E—*Insulated handle*, otherwise same as No. 3E.....each .22

This is the switch that has displaced the round wood base sliding lever switch.



No. 5E—Quick Action, double throw, solid brass contacts, copper lever, composition base, 2¾ by 1 by ⅜ in. thick, *plain handle*.....each $0.30
No. 15E—*Insulated handle*, otherwise same as No. 5E.....each .32

Used for two sets of batteries or battery and magneto.



No. 4E—Quick Action, double throw, launch, solid brass contacts, copper lever, composition base, *plain handle* each.....$0.50
No. 14E—*Insulated handle*, otherwise same as No. 4E.....each .52

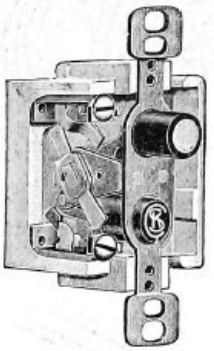
The lever is held at the neutral point by its own spring. The throw from one contact to another is rapid as the distance is small, so as not to cause misfire.

WOOD BASE SWITCHES.

Round, Wood Base, 2⅝ Inch Diameter.

No. 461E—1 point switch.....each $0.25
No. 462E—2 point switch..... " .28
No. 463E—3 point switch..... " .30
No. 464E—4 point switch..... " .35
No. 465E—5 point switch..... " .40
No. 466E—6 point switch..... " .45

NEW ENGLAND PUSH SWITCHES.



10 Amperes, Length 2¾ Inches, Width 1¾ Inches, Depth 1½ Inches.

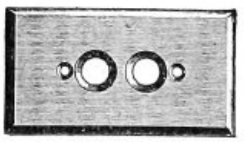
No. 2972E—Single pole, 250 volts..each $0.72
No. 2973E—Double pole, 220 volts. " 1.00
No. 2974E—3 way, 250 volts..... " 1.00
No. 2971E—4 way, 110 volts..... " 3.25
No. 12973E—Double pole, lock with key, 220 volts.....each 1.50
No. 972E—Extra key for No. 12973E switch.....each .15

These prices do not include plates. For prices on same see below.

The mechanism of the New England push switch is actuated by a coiled spring which is in compression only and is not strained torsionally and is removable. The simplicity of this switch will appeal to any man of a mechanical turn of mind and will prove to him conclusively the truth of the foregoing statements.

ONE HUNDRED ASSORTED IN A STANDARD PACKAGE.

PLATES FOR ABOVE PUSH SWITCHES.



Struck Up Pattern for One Switch, 4½×2¾ Inches.

No. 4972E—Nickel finish.....each $0.27
No. 14972E—Brush brass finish..... " .27
No. 24972E—Oxidized copper finish. " .27

Struck Up Pattern for Two Switches, 4½×4 9-16 Inches.

No. 4973E—Nickel finish.....each $0.54
No. 14973E—Brush brass finish..... " .54
No. 24973E—Oxidized copper finish. " .54

Struck Up Pattern for Three Switches, 4½×6⅜ Inches.

No. 4974E—Nickel finish.....each $0.81
No. 14974E—Brush brass finish..... " .81
No. 24974E—Oxidized copper finish. " .81

Struck Up Pattern for Four Switches, 4½×8 3-16 Inches.

No. 4975E—Nickel finish.....each $1.40
No. 14975E—Brush brass finish..... " 1.40
No. 24975E—Oxidized copper finish. " 1.40

ONE HUNDRED SINGLE PLATES OR THE EQUIVALANT IN GANGS MAKE A STANDARD PACKAGE.

ANTI-WOOD SWITCHES.

Round, Metal Base, 2½ Inches Diameter, Fibre Insulator, Strong and Durable.

No. 551E—1 point switch.....each $0.30
No. 552E—2 point switch..... " .35
No. 553E—3 point switch..... " .40

PERKINS' SWITCHES AND PLATES.

SNAP SWITCHES.

National Code, 250 Volts.

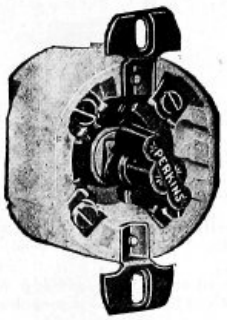
No. 2176E—10 amperes, 2½ in. diam., solid base.....each .66

NO. 2175E, ONE HUNDRED; NO. 2176E, FIFTY IN A STANDARD PACKAGE.

ROTARY SWITCHES.



National Code, 250 Volts.

No. 2093E—5 amperes, diam. 2⅜, depth 1½ in., single pole, round cup, gang switch.....each $0.62
No. 2095E—10 amperes, diam. 2⅜, depth 1½ in., double pole, round cup, gang switch.....each 1.05

These prices do not include plates. For prices on same see below.

NO. 2093E, ONE HUNDRED; NO. 2095E, FIFTY IN A STANDARD PACKAGE.

ROTARY SWITCH PLATES.

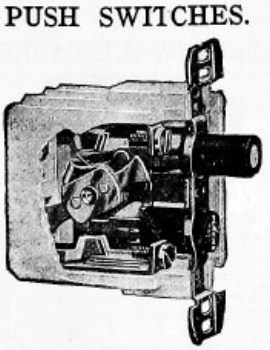
For Nos. 2093E and 2095E Flush Switches.

No. 2219E—4×2¾ in., nickel finish, for one switch.....each $0.53
No. 12219E—4×2¾ in., brass finish, for one switch.....each .53
No. 22219E—4×2¾ in., oxidized copper finish, for one switch.....each .63

Plates for any number of gangs and in any finish can be furnished on application.

ONE HUNDRED IN A STANDARD PACKAGE.

PUSH SWITCHES.



National Code, 250 Volts.

No. 2201E—10 amperes, length 2¾, width 1¾, depth 2¼ in., single pole, push button gang.....each $0.72

This price does not include plate. For price on same see next column.

ONE HUNDRED IN A STANDARD PACKAGE.

PUSH SWITCH PLATES.

For One Switch.

No. 3165E—4½×2¾ in., nickel finish, each..... $0.35
No. 13165E—4½×2¾ in., brush brass finish.....each .35
No. 23165E—4½×2¾ in., oxidized copper finish.....each .45

We can furnish plates in any finish for 2 to 6 switches, and will quote prices on request.

ONE HUNDRED IN A STANDARD PACKAGE.

PENDENT SWITCHES.

No. 2250E—5 amperes, single pole ⅛ in., polished brass.....each $0.50
No. 2251E—10 amperes, single pole ⅛ in., polished brass.....each .80

Used for controlling incandescent clusters and fixtures.

ONE HUNDRED IN A STANDARD PACKAGE.

No. 2359E—10 amperes, single pole pendent cap.....each $0.80

This switch is for pendent work only and is provided with a double bushing suitable for as large as No. 16 National code lamp cord. Underwriters' rating is 6 amperes, 125 volts; 3 amperes, 250 volts.

ONE HUNDRED IN A STANDARD PACKAGE.

HART SWITCHES, SWITCH PLATES AND WALL CASES.

SNAP SWITCHES.

250 Volts, Single Pole.

No. 2148E—5 amperes, diam. 2 in., closed base, plain cover.....each $0.28
No. 2161E—5 amperes, diam. 2 in., open base, plain cover.....each .28
No. 2162E—5 amperes, diam. 2 in., closed base, indicating cover.....each .32
No. 2163E—5 amperes, diam. 2 in., open base, indicating cover.....each .32

TWO HUNDRED FIFTY-TWO IN A STANDARD PACKAGE.

Single Pole Indicating Covers, 250 Volts.

No. 220E— 5 amperes, diam. 2⅛ in., closed base.....each $0.40
No. 320E— 5 amperes, diam. 2⅛ in., open base.....each .40
No. 221E—10 amperes, diam. 2½ in., closed base.....each .54
No. 321E—10 amperes, diam. 2½ in., open base.....each .54

ONE HUNDRED TWO IN A STANDARD PACKAGE.

Double Pole Indicating Covers, 250 Volts.

No. 222E—10 amperes, diam. 2½ in., closed base.....each $0.76
No. 322E—10 amperes, diam. 2½ in., open base.....each .76
No. 432E—20 amperes, diam. 3 in., closed base.....each 1.30
No. 532E—20 amperes, diam. 3 in., open base.....each 1.30

NOS. 222E AND 322E, ONE HUNDRED TWO; NOS. 432E AND 532E, THIRTY IN A STANDARD PACKAGE.

THREE WAY SWITCHES.

250 Volts, Not Indicating.

No. 23E—10 amperes, diam. 2½ in., closed base.....each $0.66
No. 123E—10 amperes, diam. 2½ in., open base.....each .66

FIFTY-FOUR IN A STANDARD PACKAGE.

FOUR WAY COMMUTATION.

250 Volts, Not Indicating.

No. 24E—10 amperes, diam. 2½ in., closed base.....each $0.86
No. 124E—10 amperes, diam. 2½ in., open base.....each .86

THIRTY IN A STANDARD PACKAGE.

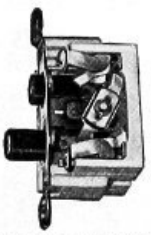
ELECTROLIER SWITCHES.

250 Volts, Not Indicating.

No. 229E—10 amperes, diam. 2½ in., 2 section closed base.....each $0.86
No. 225E—10 amperes, diam. 2½ in., 3 section closed base.....each .86

THIRTY IN A STANDARD PACKAGE.

PUSH SWITCHES.

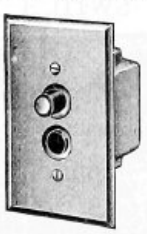


No. 2081E—10 amperes, length 2¾, width 1¾, depth 1½ in., single pole, 250 volts.....each $0.72
No. 2082E—10 amperes, length 2¾, width 1¾, depth 1½ in., double pole, 220 volts.....each 1.00
No. 2083E—10 amperes, length 2¾, width 1¾, depth 1½ in., 3 way, 250 volts, each..... 1.00
No. 2084E—10 amperes, length 2¾, width 1¾, depth 1½ in., 4 way, 110 volts, each..... 3.25

These prices do not include plates. For prices on same see below.

NO. 2081E, ONE HUNDRED; NOS. 2082E, 2083E, FIFTY; NO. 2084E, TEN IN A STANDARD PACKAGE.

PUSH SWITCH PLATES.



Struck up Style. For One Switch.

No. 1701E—4½×2¾ in., nickel finish, each..... $0.27
No. 1702E—4½×2¾ in., brush brass, each .27
No. 1703E—4½×2¾ in., oxidized copper, each..... .27

For Two Switches.

No. 1704E—4½×4 5/16 in., nickel finish, each..... $0.51
No. 1705E—4½×4 5/16 in., brush brass, each .51
No. 1706E—4½×4 5/16 in., oxidized copper, each..... .51

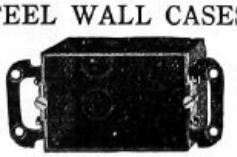
For Three Switches.

No. 1707E—4½×6⅜ in., nickel finish, each..... $0.81
No. 1708E—4½×6⅜ in., brush brass, each .81
No. 1709E—4½×6⅜ in., oxidized copper, each..... .81

We can furnish plates in any finish for 4, 5, or 6 switches and will quote prices on application.

ONE HUNDRED ASSORTED IN A STANDARD PACKAGE.

STEEL WALL CASES.

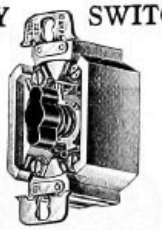


For Push Button and Rectangular Base Rotary Flash Switches and Receptacles.

	Stand pkg.	Each
No. 1E—Single case, 2×3×2¾ in.	50	$0.40
No. 2E—2 gang case, 3 1/16×3×2¾ in.	25	.70
No. 3E—3 gang case, 5 5/8×3×2¾ in.	25	1.00
No. 4E—4 gang case, 7 7/16×3×2¾ in.	10	1.30
No. 5E—5 gang case, 9 1/4×3×2¾ in.	5	1.60
No. 6E—6 gang case, 11 1/16×3×2¾ in.	5	1.90
No. 7E—7 gang case, 12 7/8×3×2¾ in.	5	2.30
No. 8E—8 gang case, 14 11/16×3×2¾ in.	5	2.50

Above cases are made in tandem vertical style also at same price as horizontal type. These cases are designed for use with flexible conduit—non metallic.

ROTARY SWITCHES.



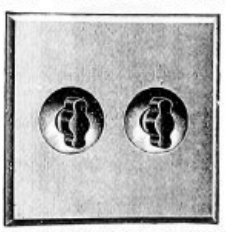
250 Volts.

No. 600E— 5 amperes, length 2¾, width 1¾, depth 1½ in., single pole....each $0.62
No. 601E—10 amperes, length 2¾, width 1¾, depth 1¼ in., single pole....each .71
No. 602E—10 amperes, length 2¾, width 1¾, depth 1¼ in., double pole...each 1.05
No. 603E—10 amperes, length 2¾, width 1¾, depth 1¼ in., 3 way.....each 1.05
No. 604E—10 amperes, length 2¾, width 1¾, depth 1¼ in., 4 way.....each 1.05
No. 605E—10 amperes, length 2¾, width 1¾, depth 1¼ in., 3 section, electrolier.....each 1.05
No. 609E—10 amperes, length 2⅝, width 1¾, depth 1⅝ in., 2 section, electrolier, each..... 1.05

These prices do not include plates. For prices on same see below.

NO. 600E, ONE HUNDRED; NOS. 601E TO 603E, FIFTY; BALANCE TEN IN A STANDARD PACKAGE.

ROTARY SWITCH PLATES.



For One Switch, 4½×2¾ Inches.

No. 1600E—Nickel finish.....each $0.53
No. 1601E—Brush brass..... " .53
No. 1602E—Oxidized copper..... " .63

For Two Switches, 4½×4 5/16 Inches.

No. 1603E—Nickel finish.....each $1.20
No. 1604E—Brush brass..... " 1.20
No. 1605E—Oxidized copper..... " 1.30

For Three Switches, 4½×6⅜ Inches.

No. 1606E—Nickel finish.....each $1.80
No. 1607E—Brush brass..... " 1.80
No. 1608E—Oxidized copper..... " 2.00

We can furnish plates in any finish for 4, 5, or 6 switches and will quote prices on application.

ONE HUNDRED ASSORTED IN A STANDARD PACKAGE.

RECEPTACLE PLUGS.

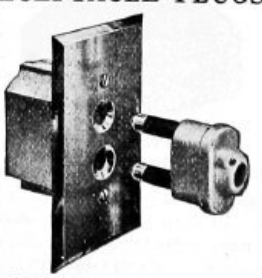


Plate 4½×2¾ Inches, Length of Receptacle 2⅝, Width 1¾, Depth 1½ Inches.

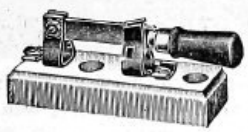
No. 42001E—Receptacle plug only..each $0.25
No. 42002E—Receptacle plate only.. " .65
No. 42033E—Receptacle base only.. " .50
No. 42034E—Receptacle complete... " 1.40

Large enough to permit the use of size 16 new code cord and sufficient space to permit a knot being tied in the cord. The screw holes are the same distance apart as in the push switches and the receptacle will fit in the same box.

TWENTY-FIVE IN A STANDARD PACKAGE.

KNIFE SWITCHES AND CUT-OUTS.

KNIFE SWITCHES.



National Code.

No. 1511E—15 amperes, 125 volts, single pole, single throw, porcelain base, each $0.32

No. 2511E—25 amperes, 250 volts, single pole, single throw, slate base.....each .46

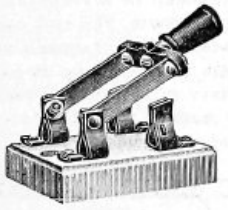
ONE HUNDRED IN A STANDARD PACKAGE.

National Code.

No. 1512E—15 amperes, 125 volts, single pole, double throw, porcelain base, each $0.60

No. 2512E—25 amperes, 250 volts, single pole, double throw, slate base....each .86

ONE HUNDRED IN A STANDARD PACKAGE.

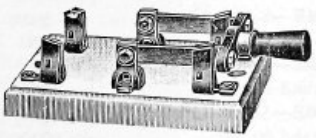


National Code.

No. 1521E—15 amperes, 125 volts, double pole, single throw, slate base.....each $0.50

No. 2521E—25 amperes, 250 volts, double pole, single throw, slate base.....each .68

ONE HUNDRED IN A STANDARD PACKAGE.



National Code.

No. 1522E—15 amperes, 125 volts, double pole, double throw, slate base....each $0.92

No. 2522E—25 amperes, 250 volts, double pole, double throw, slate base....each 1.26

FIFTY IN A STANDARD PACKAGE.

EDISON PLUG CUT-OUTS.

(National Code.)

250 Volts.

No. 62569E—2×3 in., single pole, main, 0 to 30 amperes.....each $0.18

ONE HUNDRED AND FIFTY IN A CASE.

250 Volts.

No. 62965E—3×3 in., double pole, main, 0 to 30 amperes.....each $0.30

ONE HUNDRED AND FIFTY IN A CASE.

250 Volts.

No. 8020E—3×3 in., double pole, cross over, 0 to 30 amperes.....each $0.36

ONE HUNDRED AND FIFTY IN A CASE.

250 Volts.

No. 61935E—3×4 in., double pole, single branch, 0 to 30 amperes.....each $0.32

ONE HUNDRED IN A CASE.

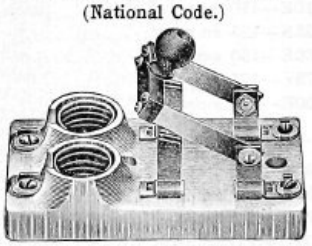
250 Volts.

No. 62587E—3×6 in., double pole, double branch, 0 to 30 amperes.....each $0.62

ONE HUNDRED IN A CASE.

COMBINATION SWITCH AND PLUG CUT-OUTS.

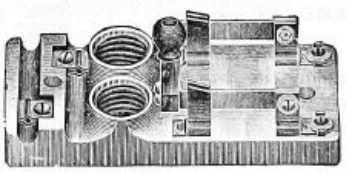
(National Code.)



125 Volts.

No. 1695E—5¾×3 in., 25 amperes, double pole, entrance switch.....each $0.90

ONE HUNDRED IN A CASE.



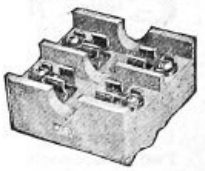
125 Volts.

No. 1694E—7½×3¼ in., 25 amperes, double pole, single branch panel switch, each.....$1.10

No. 1694E will be approved on a 250 volt circuit only when 250 volt fuses are used. See fuse casing No. 1945E and cartridge fuses for capacity. FIFTY IN A CASE.

ENCLOSED FUSE CUT-OUTS.

(National Code.)

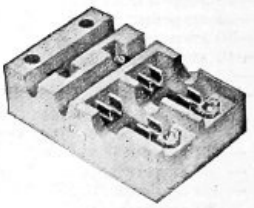


250 Volts.

No. 1917E—2¾×3½ in., two wire main, 1 to 30 amperes.....each $0.55

No. 1918E—3¾×5 in., two wire main, 31 to 60 amperes.....each 1.40

FIFTY IN A CASE.

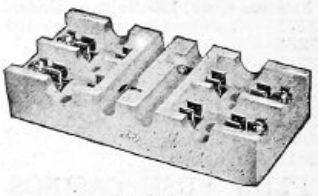


250 Volts.

No. 1919E—3×5 in., two wire single branch, 1 to 30 amperes.....each $0.70

No. 1920E—3¾×7 in., two wire single branch, 31 to 60 amperes.....each 1.75

FIFTY IN A CASE.

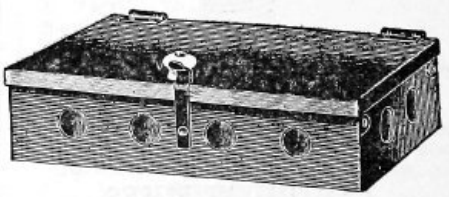


250 Volts.

No. 1922E—3×8 in., two wire double branch, 1 to 30 amperes.....each $1.30

TWENTY-FIVE IN A CASE.

SHEET STEEL CUT-OUT BOXES.



National Electrical Code Standard.

No. 1680E—12 in. long, 8 in. wide, 3½ in. deep.....each $1.20

No. 1681E—15 in. long, 8 in. wide, 3½ in. deep.....each 1.37

No. 1682E—18 in. long, 8 in. wide, 3½ in. deep.....each 1.54

No. 1683E—12 in. long, 10 in. wide, 3½ in. deep.....each 1.36

No. 1684E—15 in. long, 10 in. wide, 3½ in. deep.....each 1.55

No. 1685E—18 in. long, 10 in. wide, 3½ in. deep.....each 1.74

No. 1686E—12 in. long, 12 in. wide, 3½ in. deep.....each 1.92

No. 1687E—15 in. long, 12 in. wide, 3½ in. deep.....each 2.17

These cutout boxes are equipped with spring catch and knob, and are provided with ½ and ¾ in. knockouts. These knockouts are spaced 3 in. centers on the side of the box and 2 in. centers on the top and bottom.

CARTRIDGE FUSES, FUSE WIRE, PLUGS, ETC.

FUSE WIRE.

Two 8-oz. Spools.

No. 901E—	1 ampere	per pound	$1.10
No. 903E—	3 amperes	"	1.00

One Pound Spools.

NOS. 6003E TO 6030E, TWENTY-FIVE IN A CARTON AND ONE HUNDRED IN A STANDARD PACKAGE; NOS. 6035E TO 6060E, TEN IN A CARTON AND ONE HUNDRED IN A STANDARD PACKAGE; NOS. 6065E TO 6100E, FIVE IN A CARTON AND FIFTY IN A STANDARD PACKAGE.

These are made so that when fuse is blown it indicates and can be easily found.

ARC LIGHT CARBONS.

COLUMBIA

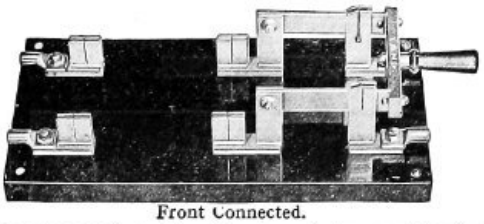
For Alternating and Direct Current Lamps.

No. 3000E—	Solid, 12×½ in., w't per thousand 140 lbs	per 1000	$55.00
No. 3001E—	Cored, 12×½ in., w't per thousand 140 lbs	per 1000	59.00
No. 3002E—	Solid, 12×$\frac{7}{16}$ in., w't per thousand 110 lbs	per 1000	46.00
No. 3003E—	Cored, 12×$\frac{7}{16}$ in., w't per thousand 110 lbs	per 1000	50.00
No. 3004E—	Solid, 9½×½ in., w't per thousand 120 lbs	per 1000	46.50
No. 3005E—	Cored, 9½×½ in., w't per thousand 120 lbs	per 1000	49.50
No. 3006E—	Solid, 12×⅜ in., w't per thousand 90 lbs	per 1000	44.00
No. 3007E—	Cored, 12×⅜ in., w't per thousand 90 lbs	per 1000	48.00

Direct current enclosed arc lamps use solid carbons in both upper and lower. Alternating current lamps use one cored and one solid.

FIFTY IN A BOX AND ONE THOUSAND IN A STANDARD PACKAGE.

LANG'S PARAGON SWITCHES.



Front Connected.

The "Paragon" has been designed for the purpose of meeting the demand for a substantial and durable knife switch which could be sold at a low price.

We do not wish it understood that the quality of material, the amount of copper or the general workmanship has been sacrificed; on the contrary, every part is carefully and conscientiously made.

These switches are manufactured in large quantities, which enables us to sell them at very low prices.

SINGLE POLE.

No. 50746E—Keyless, polished brass, concealed porcelain base, removable ring, each..... $0.40

TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

TWIN SOCKETS.

Edison Base, National Code, 250 Volts.

No. 411E—⅛ in., one light, polished brass each..... $0.35
No. 412E—⅛ in., two light, polished brass.....each .65

Designed with a view to economy in show-window or show-case work. By use of suitable shades and reflectors more complete distribution of light is secured.

FIFTY IN A STANDARD PACKAGE.

WEATHER PROOF SOCKETS.

Edison Base, National Code, 250 Volts.

No. 116E—Porcelain, with 8 in. wires, each..... $0.25
No. 43310E—Mica, with 6 in. wires..each .36

TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

Edison Base, National Code, 250 Volts.

No. 217E—Key, porcelain, for pendant work.....each $0.30

TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

Edison Base, National Code, 250 Volts.

No. 4200E—½ in. aluminum shell,..each $0.70
No. 4201E—⅜ in. aluminum shell,.. " .70

FIFTY IN A STANDARD PACKAGE.

RECEPTACLES, PLUGS, ADAPTERS, ETC.

RECEPTACLES.

Edison Base, 250 Volts.

No. 9411E—Bottom wires 8 in. long..each $0.35

ONE HUNDRED IN A STANDARD PACKAGE.

Edison Base, National Code, 250 Volts.

No. 1700E—1 5/16 in. base, 1½ in. top, height 1 in. above base.....each $0.14

FIVE HUNDRED IN A STANDARD PACKAGE.

One Screw, Edison Base, 250 Volts.

No. 9171E—Porcelain.....each $0.10

Receptacle is held in place by one screw through its center.

FIVE HUNDRED IN A STANDARD PACKAGE.

Two Screw, Edison Base, 250 Volts.

No. 9402E—Porcelain.....each $0.15

FIVE HUNDRED IN A STANDARD PACKAGE

RECEPTACLES.

No. 320E—Miniature, keyless sockets, each $0.23

No. 321E—Candelabra, keyless sockets, each..... .24

Candelabra bases should be used for all voltages over 40 volts.

TWO HUNDRED IN A STANDARD PACKAGE.

No. 327E—Miniature, for candle fixtures, each..... $0.12

No. 328E—Candelabra, for candle fixtures, each..... .12

Candelabra bases should be used for all voltages over 40 volts.

TWO HUNDRED IN A STANDARD PACKAGE.

No. 9445E—Miniature, round base..each $0.06

No. 9446E—Candelabra, round base. " .06

Candelabra bases should be used for all voltages over 40 volts.

FIVE HUNDRED IN A STANDARD PACKAGE.

SKEDOODLE PLUGS.

No. 131E—16 C. P., 100 to 120 volts, each $0.75

No. 130E— 8 C. P., 100 to 120 volts, " .75

This plug fits any ordinary socket and holds a common lamp, it flashes the lamp on and off many times a minute. Will outlast several lamps. Each plug is complete in itself and independent of every other socket.

No wiring is necessary, anyone can put it in place. Lasts indefinitely. Dimensions 1¾ in. long x 1⅛ in. diameter, direct or alternating current.

The uses are almost without limit—in small show cases, show windows, box designs, street fair decorations, stage effects, bull's eye and drum signs, color changing effects. It is quickly installed and easily maintained.

CANDLES AND ADAPTERS.

No. 315E. No. 314E.

No. 315E—Porcelain candles, packed 12 in a box.....each $0.35

No. 314E—Candelabra adapters, packed 50 in a box.....each .14

For use where it is desired to remove standard lamps and burn candelabra lamps for special occasions. Can be attached in a moment. In various kinds of special work, where it is desired to use candelabra lamps, it frequently happens that no suitable socket can be secured. By using these specialties this trouble is obviated since the regular standard sockets can be used. They are also desirable and useful in decorative fixture work.

No. 315E, TWO HUNDRED AND FORTY; No. 314E, TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

ROTATING SOCKETS.

No. 9002E—2-light, rotating socket..each $1.00

No. 9013E—3-light, rotating socket.. " 1.30

No. 9024E—4-light, rotating socket.. " 1.60

Sockets have rotating sleeve for attaching without turning the device. By the combined use of sockets and suitable half shades capable of revolving around the axis of the lamp, the light of a given installation may be effectively directed and distributed. When a strong light is not required an appreciable saving may be made with low candle-power lamps. Standard finish is polished brass.

TWENTY-FIVE IN A STANDARD PACKAGE.

PLUGS, CURRENT TAPS, ETC.

ATTACHMENT PLUGS.

Edison Base, National Code, 250 Volts.

No. 67E—Brass cap, fuseless.....each $0.22

TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

Edison Base, National Code, 250 Volts.

No. 147E—Porcelain caps, fuseless..each $0.22
No. 167E—Porcelain caps, fusible... " .22

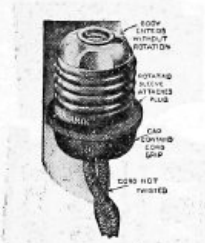
TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.

Edison Base, National Code, 250 Volts.

No. 16410E—Mesco, 3 amperes, porcelain cap.....each $0.25
No. 16411E—Mesco, 3 amperes, rubber cap..... each .30

This plug will separate at any angle. A pull on the cord in any direction will cause plug and cap to separate instantly without imposing the slightest strain on socket or cord, no matter how or where the socket is located.

TWO HUNDRED AND FIFTY IN A STANDARD PACKAGE.



Edison Base, National Code, 250 Volts.

No. 903E—Benjamin.....each $0.25

Rotating sleeve makes it possible to attach plug without turning device.
Twisting of cord is unnecessary.
Cord is firmly secured and held by cap grip.
There are no detachable parts to become lost or broken.
It is small, neat in construction and appearance.

ONE HUNDRED IN A STANDARD PACKAGE.

ATTACHMENT PLUGS.

No. 5406E—Hubbell, porcelain cap each $0.30

ONE HUNDRED IN A STANDARD PACKAGE.

RECEPTACLE PLUGS.

Edison Base, Polished Brass.

No. 192E—2 light multiple.....each $1.00
No. 193E—3 light multiple..... " 1.30
No. 194E—4 light multiple..... " 1.60

Fits any Edison base socket. Receives any combination of lamps and attachment plugs. Converts one light pendant into cluster.

TEN IN A STANDARD PACKAGE.

CURRENT TAPS.

Combined Socket and Attachment Plug.

No. 16414E—Glazed porcelain, phosphor bronze contact clips, designed for 250 volts.....each $0.50

A simple and safe device for tapping and carrying the current from any electric light fixture to motor, drop lights or other electrical devices without the loss of lamp already in fixture.

FIFTY IN A STANDARD PACKAGE.

STAGE CONNECTORS.

No. 16412E—Brass shell, interchangeable cap.....each $0.70

The most serviceable stage connector on the market, combining attractiveness and strength. The neat appearance of the brass shell together with the separable cap feature makes it an article of pronounced merit. Cap is interchangeable with our other separable cap fittings.

THIRTY IN A STANDARD PACKAGE.

SOCKET EXTENSIONS.

No. 91E—Benjamin, polished brass, each $0.25

Offers a convenient means for attaching glassware where the outlets do not otherwise permit it. Shell is provided with bead for standard shade holder. Is especially serviceable for use in connection with flush sockets and ceiling receptacles. Increases the length of the socket only 1¼ inch.

FIFTY IN A STANDARD PACKAGE.

PHELPS' PULL SOCKETS.

No. 132E—Porcelain insulation.....each $0.25

The strings are 13 inches long and are equipped with a white ball to turn the light on and a black ball to turn it out. The white one is corrugated so it can be found in the dark.
For high fixtures and short people. Brings light within easy reach of all. Fits any standard fixture. Works easily and noiselessly.

ONE HUNDRED IN A STANDARD PACKAGE.

TUNGSTEN ADAPTERS.

No. 99E—Brushed brass.....each $0.70
No. 199E—Polished brass..... " .70
No. 299E—Oxidized copper..... " .80

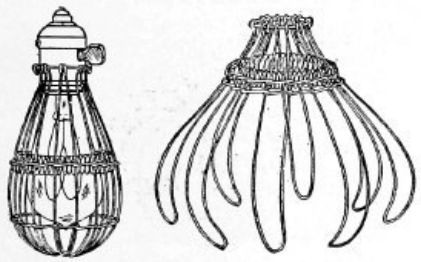
LAMP GUARDS, ELECTROGRIPS AND CORD ADJUSTERS.

LAMP GUARDS.



STANDARD, 15 Gauge Steel Wire, Heavily Tinned, Strengthened with Two Sliding Wire Rings, with Safety Cushion.

No. 316E—For 16 C. P. lamps..per dozen $2.00
No. 332E—For 32 C. P. Lamps... " 2.50

The mere closing of the guard over the lamp fastens it automatically and securely to the socket. Being attached to the socket instead of the lamp it throws no weight on the bulb.

The operation is simple. The half open guard is held well up on the socket; the lamp is inserted in place and the large ring slipped down as far as it will go, thus closing the guard and securing it to the socket at the same time.

The safety cushion holds the lamp perfectly rigid and prevents it jarring loose from the socket by vibration of the building or factory in which it is used.

This is the new LoXon lamp guard that fastens the bulb to the socket with a key. Prevents loss, breakage and theft—cannot be removed without the key.

Are made to stand the rough usage—can be hung anywhere, handled anywhere—and give the lamp perfect protection. Yet there is no interference with the light. A big money saver.

One key with every dozen guards. In ordering guard for W. P. sockets specify MAKE AND NO. OF SOCKET.

No. 14025E—LoXon, 16 C. P. standard socket.....per dozen $6.00
No. 14026E—LoXon, 32 C. P. standard socket.....per dozen 6.25
No. 14027E—LoXon, 16 C. P. W. P. socket.....per dozen 6.25
No. 24343E—LoXon, 40 or 60 watt Tungsten lamp, standard socket, per dozen..... 8.75
No. 14020 —Extra keys.....each .10

A strong, rigid guard, open at bottom, that affords absolute protection to the lamp without interfering with its insertion or removal. Has wire cushion which takes jar and protects lamp coming in contact with other wires. Easily attached and holds with a bull dog grip.

No. 14029E—PROTECTOR "O," tinned wire, 16 C. P. .....per dozen $2.50

LAMP GUARDS.

No. 66E—SPIRAL tinned, piano wire, for 16 candle power lamp, no fastening necessary, spring adjusts itself to lamp.....per dozen $2.00

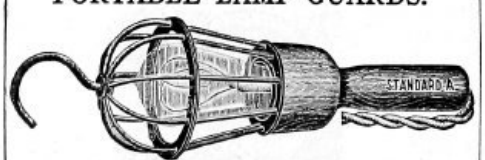
No. 66E.

No. 16E—BUFFALO, heavy tinned wire, for 16 candle power lamp, clamps around socket, can be put on and taken off without removing lamp.....per dozen $2.50

Inner wire prevents lamp from coming in contact with outer frame.

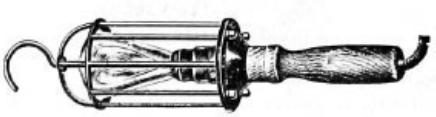
No. 16E.

PORTABLE LAMP GUARDS.



No. 46872E—THE STANDARD "A," 16 C. P., per dozen.....$30.00

Where a keyless portable guard is desired the Standard "A" is superior to any guard on the market. IT is WEATHERPROOF, having mica socket securely embedded in the handle with extra long lead in wire.



No. 46745E—CRESCENT, 16 C. P., per dozen.....$24.00

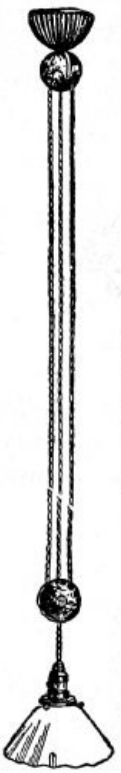
No. 0457E socket can be used with this guard. Light, strong and durable without socket.

ELECTROGRIPS.

These grips are used on drop lights for the purpose of raising or lowering the bulb. It grips the cord or fastening at any point, making the light hang high or low as desired.

No. 872E—Per dozen..... $3.00

"TWO-BALL" CORD ADJUSTERS.



This adjuster is a device for automatically maintaining an electric droplight at any desired height. It consists of two balls, fitted with grooved pulleys of insulating material, through which the lamp cord runs. The lower ball acts as a counter-balance to the lamp. Can be used on any droplight.

No. 1112E—Black enamel.....each $1.20

Benjamin Adjustable Plug and Socket Clusters are designed for use with ceiling or pendant dome fixtures, stand lamps in dining rooms, reading rooms, etc., where it is desirable to adjust and fix the lights in special relation to the sides of the dome or reflector. The socket may be turned to any position between two points 180 degrees apart, and locked by means of a screw. By removing the socket cap easy access is gained to the binding screws. They are therefore easily wired. Standard finish is polished brass.

TEN IN A STANDARD PACKAGE.

TUNGSTEN CLUSTER BODIES.

Type 3T—Multiple, Edison Base, Fibre Lined, Polished Brass, 4½ in. Diam.

No. 32TE—2 light .....each $1.75
No. 33TE—3 light..... " 2.00
No. 34TE—4 light..... " 2.25
No. 35TE—5 light..... " 2.50
No. 36TE—6 light..... " 2.75

Type 3T is designed for Tungsten lamps. The outlets in Nos. 32TE, 33TE and 34TE are at an angle of 6 degrees with the vertical; in Nos. 35TE and 36TE 24 degrees. They are regularly furnished without flange, but ⅜ in. steel flange will be supplied without additional charge.

TEN IN A STANDARD PACKAGE, W'T 15 LBS.

FLANGES.

TUNGSTEN ARCS.

No. T44E —4 light.....each $ 9.40
No. T45E —5 light..... " 9.70
No. T44KE—4 light..... " 9.40
No. T45KE—5 light..... " 9.70
No. T46KE—6 light..... " 10.00

The Tungsten Arc consists of cluster body with special reflector shell of frosted aluminum, 15 in stem of 3/8 in. iron pipe and ¾ in. brass casing, reflector holder, 18 in. opal reflector, 5½x4 in. canopy, and crowfoot. The device is wired, and measures 25 in. over all. For pendant switch and one yard of flexible cord add $1.00 list; for grouping switch furnishing three degrees of illumination, and chain extending 54 in. below the ceiling add $2.75 list; for additional chain 5 cents per foot net. Unless otherwise specified the grouping switch operates in two sets of one single and all remaining lights. In "K" styles the single is the center light. 4 and 6 light fixtures will be furnished wired two in series for 220 volt circuits without additional charge. Frosted lamps are recommended. Prices are less lamps only. Standard finish is brushed brass.

TEN IN A STANDARD PACKAGE, W'T 60 LBS.

No. T83E—3 light .....each $11.90
No. T84E—4 light..... " 12.20
No. T85E—5 light..... " 12.50

The enclosed Tungsten Arc is constructed along the same general lines as the above fixture, but has an additional enclosing globe. The latter is spaced at the top and open at the bottom, thus offering good ventilation, as well as opening for the suspending chain or cord. It also assists in rounding out the fixture, securing symmetry of outline. Prices do not include lamps. Standard finish is brushed brass.

Standard package discounts apply to all Tungsten Arcs regardless of quantity or catalog number.

TEN IN A STANDARD PACKAGE, W'T 90 LBS.

TUNGSTEN ARCS.

No. T823E—3 light.....each $7.60
No. T824E—4 light..... " 7.90
No. T825E—5 light..... " 8.20

This interior ceiling fixture is furnished with three (3) to five (5) lights; "K" type, i. e., with center lamp opening, from four (4) to six (6) lights, if specified. The device is practically the first fixture described on center column, with sub-base instead of stem, canopy, and crowfoot. The other specifications there given apply.

TEN IN A STANDARD PACKAGE, W'T 50 LBS.

No. T832E—2 light .....each $7.30
No. T833E—3 light..... " 7.60
No. T834E—4 light..... " 7.90

The enclosed interior ceiling fixture consists of cluster body with special reflector shell of frosted aluminum, sub-base, and 10x8 in. glass ball. C. R. I. globes are regularly furnished unless otherwise specified. Nos. T832E and T833E take either 40 or 60-watt lamps; T834E, 40-watt lamps only. It may be used to adrantage on low ceilings, basements, in short any place where it is desirable to attach the device directly to the supporting surface. Prices do not include lamps. Standard finish is brushed brass.

TEN IN A STANDARD PACKAGE, W'T 62 LBS.

No. T62E—2 light .....each $8.70
No. T63E—3 light..... " 9.00
No. T64E—4 light..... " 9.30

These Weather-proof fixtures consists of cluster body with special reflector shell of frosted aluminum, 8 in. stem of ½ in. iron pipe, globe and reflector holders, 18 in. enameled steel reflector, 10x8 in. ball, and suspension fitting. The device is wired, and measures 21 in. over all. Nos. T62E and T63E take either 40 or 60-watt lamps; T64E 40-watt lamps only. Globe has 1 in. opening in the bottom; the holder is perforated at the top—thus securing perfect ventilation. The suspension fitting consists of porcelain base carrying the binding plates, together with removable aluminum cover protecting the electrical parts, thus forming a perfect weather-proof connection. For fixture less stem and fitting deduct $1.30 list.

Standard package discounts apply to all Tungsten Arcs regardless of quantity or catalog number.

TEN IN A STANDARD PACKAGE, W'T 78 LBS.

ELECTRICAL SUPPLIES.

FLEXIBLE CONDUIT.

National Electrical Code Standard.

No. 50E—¼ in. inside diameter, 250 ft. in coil, w't per 1000 ft. 75 lbs. . .per foot $0.06
No. 51E—⅜ in. inside diameter, 250 ft. in coil, w't per 1000 ft. 110 lbs. .per foot .07
No. 52E—½ in. inside diameter, 200 ft. in coil, w't per 1000 ft. 125 lbs. .per foot .08
No. 53E—⅝ in. inside diameter, 200 ft. in coil, w't per 1000 ft. 155 lbs. .per foot .10
No. 54E—¾ in. inside diameter, 150 ft. in coil, w't per 1000 ft. 200 lbs. .per foot .12
No. 55E—1 in. inside diameter, 100 ft. in coil, w't per 1000 ft. 275 lbs. . . .per foot .16

No. 630E—10 in., for 2¼ in. holder, per dozen..... 10.00

Deep Cone, Tin, Green Outside, White Inside.

No. 408E— 8 in., standard, for 2¼ in. holder.....per dozen $2.25
No. 410E—10 in., standard, for 2¼ in. holder.....per dozen 3.00
No. 412E—12 in., standard, for 2¼ in. holder.....per dozen 4.00

Prices do not include lamps, sockets or shade holders.

Hubbell, Tin, Green Outside, White Inside.

No. 5440E—8 in., deep cone, holder attached.....per dozen $3.50
No. 5441E—10 in., deep cone, holder attached.....per dozen 3.80
No. 5442E—12 in., deep cone, holder attached.....per dozen 5.60

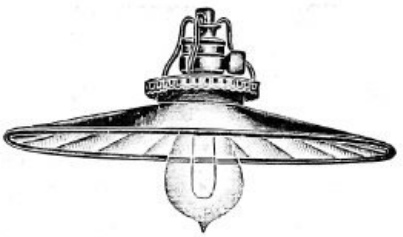
The feature about these shades is that they have the Hubbell holder attached.

Deep Cone, Silver Plated Mirror Reflector, Green Outside.

No. 2107E— 7 in., for 2¼ in. holder, per dozen..... $ 9.60
No. 2108E— 8 in., for 2¼ in. holder, per dozen..... 9.60
No. 2110E—10 in., for 2¼ in. holder, per dozen..... 10.80
No. 2112E—12 in., for 2¼ in. holder, per dozen..... 13.20

For use where a very powerful light is wanted on a small space, is lined with silver plated imported mirror plated glass and increases the light from twelve to fifteen times and very valuable for show window lighting and machine work, benches, type cases, desks, etc.

Prices do not include lamps, sockets or shade holders.

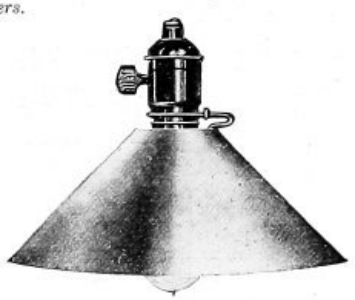


Flat, Silver Plated Mirror Reflector, Green Outside.

No. 1910E—10 in., for 2¼ in. holder, per dozen..... $ 9.60
No. 1912E—12 in., for 2¼ in. holder, per dozen..... 10.80
No. 1914E—14 in., for 2¼ in. holder, per dozen..... 13.90
No. 1916E—16 in., for 3¼ in. holder, per dozen..... 18.70
No. 1918E—18 in., for 3¼ in. holder, per dozen..... 22.80

For use with any system of incandescent electric light when it is desired to spread the light. Its silver plated mirror lining makes it most effective and pleasing.

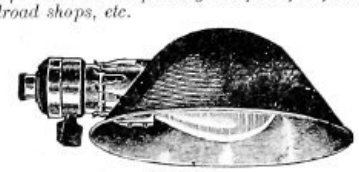
Prices do not include lamps, sockets or shade holders.



Fiberlite, Green Outside, White Inside.

No. 997E— 7 in., with shade holder attached.....per dozen $1.80
No. 998E— 8 in., with shade holder attached.....per dozen 1.80
No. 910E—10 in., with shade holder attached.....per dozen 1.80

These shades are made of a tough fibrous fireproof material. Especially adapted for factories, railroad shops, etc.



Parabola.

No. 27E—7 in., green outside, frosted inside.....per dozen $5.40
No. 28E—7 in., oxidized copper outside, frosted inside.....per dozen 5.40
No. 29E—7 in., brush brass outside, frosted inside.....per dozen 5.40
No. 30E—Steel, 7 in., green outside, frosted inside.....per dozen 4.20

These shades cover the lamps completely, so they are really shades as well as reflectors. They are scientifically constructed getting all the light possible from the lamp and throwing it right where the user wants it. The holder which is attached to shade turns on the socket, so that the light may be thrown at any angle.

Tin, Half Shade.

FORTY IN A STANDARD PACKAGE.

Satin finish is a very light frosting on the inside of the reflector which does not affect the reflecting value very much, but does soften the glare. It gives a soft, beautiful appearance. Bowl frosted lamps with satin finish reflectors are recommended.

SHADES HOLDER WILL NOT BE SHIPPED UNLESS ORDERED. The special holders specified for shades and lamps should always be used to get the proper reflector value.

These reflectors are packed in cases of ten each, except Nos. 106225E, 0106225E, 106125E, 0106125E, 106325E and 0106325E, which are packed twenty in a case.

Cases may be assorted to make a standard package quantity.

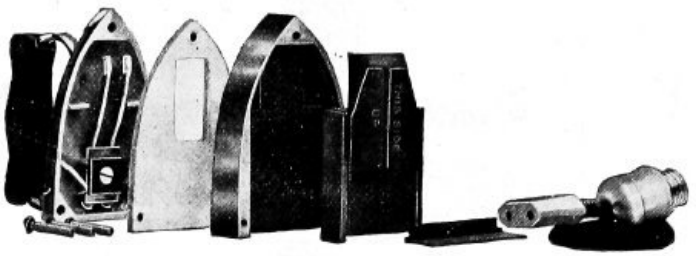
These shades are opal tint, smooth on the outside and either smooth or sandblasted on the inside. The leadea lines are dead black. Especially adapted for dens, halls and fancy lighting.

ELECTRIC SAD IRONS AND TOASTERS.

GENERAL INFORMATION.

VOLTAGES--Voltage desired must be specified in ordering and the device should not be connected to circuit if the voltage varies more than 5 or 6 volts. In order to obtain best results, the voltage of the circuit must be up to that marked on the device. If it is not, the amount of current flowing through it is lessened and the full heat is not obtained. If the voltage is too high more current flows through than should and the tendency is to overheat with the danger of burning out.

Care must be exercised in this respect.



REMOVABLE AND REPLACEABLE ELEMENTS—We have most of our devices with a removable and replaceable heating element, so that it is unnecessary to return a device in case repairs are needed.

It is impractical to construct all apparatus in this way, but all flat irons and devices of that kind are so supplied.

GUARANTY—We guarantee all of these devices to be free from inherent defect in material and workship and will replace any element or part shipped on our orders which is defective, providing of course that the trouble is not due to misuse or neglect on the part of the user.

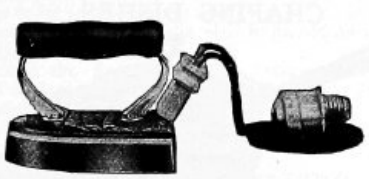
SAD IRONS.

Superior "V" Shape.

No. 6E—Size 6½×4 in., 475 watts, 0 to 125 volts, w't 6 lbs. ..... each $7.50
No. 36E—125 to 250 volts, otherwise same as No. 6E ..... each 8.50

Each iron is furnished complete with detachable plug, 6 ft. conductor cord, separable plug and lamp, socket attachment, coil spring for cord support and special heat insulating stand.

ONE IN A BOX.



American Steel Clad, "V" Shape.

No. 3E—Travellers', size 5½×2¾ in., 250 watts, 0 to 125 volts, w't 3 lbs. each $ 8.50

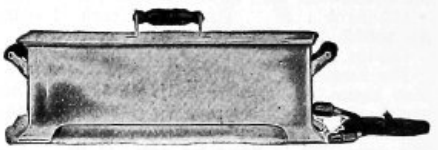
No. 124E—Heavy, 125 to 250 volts, otherwise same as No. 24E★ ..... each 22.50

Designed especially for manufacturers' work, and should not be attached to lamp sockets, but wired specially. Are constructed so the steel slug or heating element can be instantly removed.

ONE IN A BOX.

ELECTRIC TOASTER.



No. 5810E—Size 5½×5¾×9¾ in., 350 watts, 0 to 250 volts, w't 4½ lbs. each $10.00

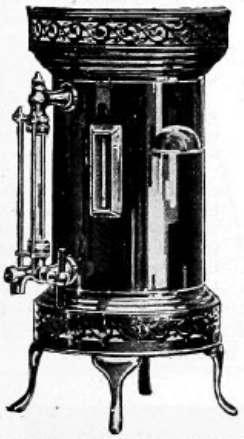
Furnished complete with 6 ft. detachable silk cord, plug contacts and attachment plug.

Is designed for making toast on the breakfast table or for afternoon tea, and absolutely free from odor, dirt and danger of fire.

★*FOR FACTORY SHIPMENT ONLY. VOLTAGE DESIRED MUST BE SPECIFIED IN ORDERING.*

ELECTRIC HEATING APPLIANCES.

HOT WATER URNS.



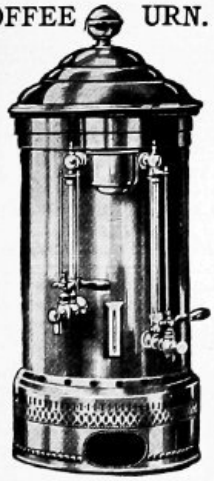
No. 4320E—2 gal., made of heavy copper, finished in nickel, double tin lining, fitted with gauge glass thermometer and tumbler warmer arrangement, 6 ft. of flexible cord and porcelain three-heat plug switch, w't crated 24 lbs.★.....each $37.00

No. 4325E—3 gal., otherwise same as No. 4320E, w't crated 25 lbs.★.....each 54.00

No. 4330E—5 gal., otherwise same as No. 4320E, w't crated 45 lbs★..each 68.00

The heaters are all arranged for three heats. The maximum to bring the water to boil. The minimum heat, one-quarter of the maximum, to keep the water at the boiling point.

COFFEE URN.



0 to 250 Volts.

No. 4420E—10 qt., 1400 watts, w't 80 lbs.★.....each $ 95.00

No. 4430E—14 qt., 2000 watts, w't 105 lbs.★.....each 110.00

No. 4440E—22 qts., 3200 watts, w't 115 lbs.★.....each 140.00

No. 4450E—36 qts., 4200 watts, w't 150 lbs.★.....each 170.00

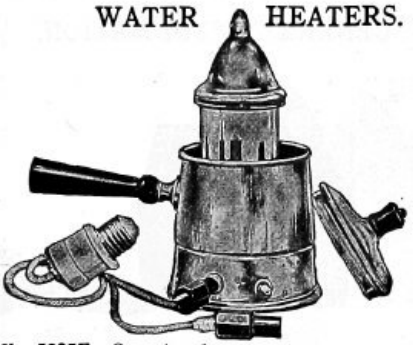
The heating is accomplished by a new type of plate heater, directly attached to the bottom of the urn, the plate having new type "Steel Clad" elements.

The heaters are all arranged for three heats. The maximum to bring the water to boil. The minimum heat, one-quarter of the maximum, to keep the water at the boiling point.

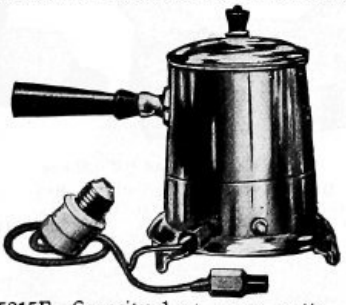
Are made in the best possible manner of heavy copper. The coffee receptacles are of stoneware. The urns are fitted with double gauge glasses, faucets, thermometers, etc., and are finished in polished nickel.

The receiver with cotton fabric filter is simple and easily arranged.

WATER HEATERS.

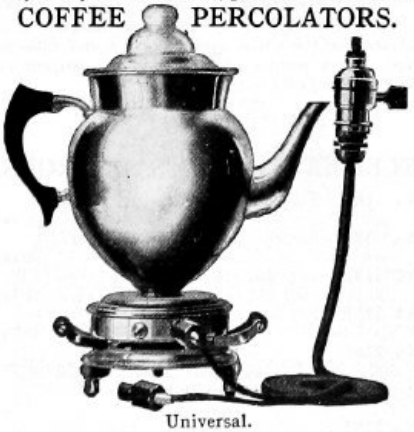


No. 5205E—Capacity 1 pt., max. watt cons, 275, made of spun copper, finished in nickel or copper, double silver lined, ebonoid handles, and equipped with replaceable heating elements, with detachable 6 ft. silk cord, plug contacts, and separable attachment plug, without bottle, unless specially ordered, w't 2 lbs.★.....each $10.00



No. 5215E—Capacity 1 qt., max. watt cons. 400, made of spun copper, finished in nickel or copper, double silver lined, ebonoid handles, and equipped with replaceable heating elements, with detachable 6 ft. silk cord, plug contacts and separable attachment plug, without bottle, unless specially ordered, w't 3½ lbs★..each $12.00

COFFEE PERCOLATORS.



Universal.

No. 2206E—Capacity 6 cups, empire type, watts 350.★.....each $15.00

No. 2209E—Capacity 9 cups, Empire type, watts 350.★.....each 16.50

No. 2214E—Capacity 14 cups, Empire type, watts 350.★.....each 18.00

This type, the well-known "Universal," equipped with disc stoves (No. 3210-E). The percolator and heater are separate. The stove heats quickly and the percolator begins to pump within a short time after the current is turned on. The stove is finished in polished nickel. The percolator is made entirely of aluminum. Furnished complete with six feet of detachable cord, and attachment plug.

COFFEE MACHINE.

Universal, 325 Watts.

No. 2204E—Round type, capacity 4 cups.★.....each $22.00

No. 2006E—Round type, capacity 6 cups.★.....each 24.00

No. 2009E—Round type, capacity 9 cups.★.....each 26.00

No. 2104E—Fluted type, capacity 4 cups.★.....each 26.00

No. 2106E—Fluted type, capacity 6 cups.★.....each 28.00

No. 2109E—Fluted type, capacity 9 cups.★.....each 30.00

This type of percolator, is the well-known "Universal," permanently equipped with special "American Steel Clad" heating elements. It produces incomparable results. This machine will operate better than any other type, as the heating elements are attached directly to the automatic valve in the bottom of the machine. Only a small volume of the water is heated in the valve chamber at any one time. It will begin to pump in about one minute after the current is turned on. The interior surface being plain and smooth, it is very easy to keep in perfect condition. Every percolator is fully equipped with detachable cord, and is ready for instant service.

CHAFING DISHES.

No. 335E—2 pints, nickel plated, 500 max. watts, w't 16 lbs.★.....each $22.50

No. 345E—3 pints, nickel plated, 500 max. watts, w't 16 lbs.★.....each 25.00

No. 337E—2 pints, silver plated, 500 max. watts, w't 16 lbs.★.....each 33.00

No. 347E—3 pints, silver plated, 500 max. watts, w't 16 lbs.★.....each 37.00

Made of heavy spun copper, finished in polished nickel or copper as desired, double tin lined, ebonoid handles. The stove is standard 6 in. top, with "Steel Clad" elements attached. A quick heater; has adjustable legs so that it may be used on any standard chafing dish by simply removing the alcohol stove and putting the electric stove in its place.

Three heats may be obtained and the minimum heat is used to do the cooking as soon as the water has begun to boil.

Furnished complete ready for attachment to circuit, with detachable 6 feet silk cord, plug contacts and attachment plug.

Polished nickel always shipped unless otherwise ordered.

★*FOR SHIPMENT FROM FACTORY ONLY. VOLTAGE DESIRED MUST BE SPECIFIED IN ORDERING.*

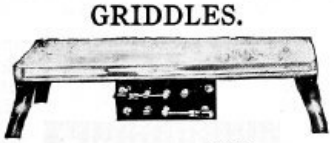
ELECTRIC HEATING APPLIANCES.

TEA KETTLES.

No. 5415E—Capacity 1 qt., max. watt cons. 400, made of *spun copper*, with heavy cast handles, is double silver lined and finished in heavy nickel or copper, complete with detachable 6 ft. silk cord, plug contacts and separable attachment plug; also stand, w't 4 lbs. ★ ..... each $15.00

No. 5425E—Polished *silver*, otherwise same as No. 5415E★ ..... each 23.00

GRIDDLES.



NO.	WIDTH	LENGTH	HEAT	MAX. WATT.	W'T LBS.	EACH.
2820E	7	11	1	800	18★	$18.50
2825E	7	11	3	800	18★	21.50
2830E	9	18	3	1200	38★	29.00

2870E	18	24	3	2600	88★	75.00
2880E	15	30	3	3000	95★	83.00

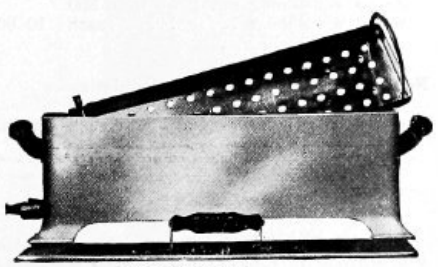
These plates are all equipped with the new "Steel Clad" heating elements, directly attached. They are light quick heaters. Will heat to a slightly higher temperature, and at the same time are more durable.

For restaurant and hotel use we suggest a number of the smaller units placed side by side, the advantage being in the current consumption, as only a sufficient number of plates need be turned on in order to perform the work at hand.

Griddles are finished with a finely polished planed surface, and furnished complete ready for attachment to circuit.

Made for various intermediate voltages up to 250.

INSTRUMENT STERILIZER.



0 to 250 Volts.

No. 5916E—Inside length 16½ in., width 4⅞ in., depth 3¾ in., max. watts, 900, w't 18 lbs. ★ ..... each $30.00

Made with "Steel Clad" heating elements attached directly to the bottom, insuring quick heating. For use of surgeons in the office or operating room, is large enough to take all ordinary instruments. Equipped complete with aluminum tray, cover and 5-ft. detachable cord and plug contact, etc., made for three different heats.

ONE IN A BOX.

DISC STOVES.

Industrial Style.

NOS.	DIAM. IN.	MAX. WATT CONS.	HEAT REG.	WEIGHT LBS.	EACH.
3260E	8	800	1	14★	$13.00
3265E	8	800	3	14★	17.00
3270E	10	1100	1	20★	16.00

3280E	12	1500	1	38★	20.00
3285E	12	1500	3	38★	24.00

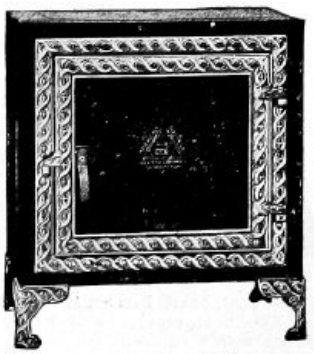
The top plate is constructed with steel clad heating elements directly attached. There is absolutely no wire, porcelain, enamel or cement used in their construction. They are made of cast-iron, heavily nickel-plated, and are ready for attachment to any circuit. They have exceedingly long life, and if the proper size is selected to do the work required, they will give perfect satisfaction. They are intended for laboratory or industrial work of all kinds, but may be used for boiling water or any other liquid. Flat bottom dishes or one covering the entire surface of the stove should always be used. They are made in various dimensions up to 12 inches. The three heat stoves are equipped with four feet of cord and porcelain plug. The single heat stoves are equipped with binding posts only.

Domestic Style.

NOS.	DIAM. IN.	WATTS.	WEIGHT LBS.	EACH.
3210E	4	350	8★	$7.00
3221E	5	400	10★	8.25
3281E	6	450	18★	9.50

This new type, domestic style, is very neat in appearance. The legs have fiber points to prevent scratching a finished surface, and the handles enable it to be removed while hot without burning the hands. The heater is furnished with "Steel Clad" heating elements, and is finished in polished nickel, fully equipped with detachable cord.

OVENS.



0 to 250 Volts.

No. 1012E—Inside width 12 in., depth 12 in., height 12 in., max. watts 1200, w't 50 lbs. ★ ..... each $35.00

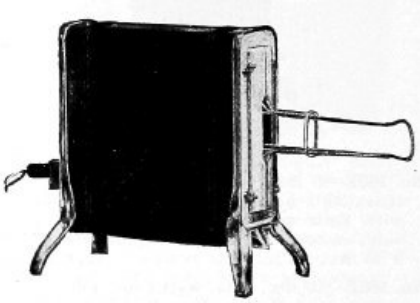
No. 1014E—Inside width 14 in., depth 14 in., height 12 in., max. watts 1300, w't 55 lbs. ★ ..... each 46.00

No. 1016E—Inside width 16 in., depth 16 in., height 12 in., max. watts 1400, w't 65 lbs. ★ ..... each 51.00

No. 1018E—Inside width 18 in., depth 18 in., height 12 in., max. watts 1500, w't 80 lbs. ★ ..... each 54.00

The electric oven is practically perfect. It is made so that it heats evenly on the top, bottom and sides, always heats to the same temperature in a given length of time so that it is possible to always reproduce the same results. All ovens are arranged for three heats.

BROILERS.



No. 5608E—Broiling surface 8×10 in., end pieces cast iron, finished in nickel, japanned steel casing, detachable 6 ft. cord, plug contacts and switch, w't crated 22 lbs. ★ ..... each $24.00

The heating elements are mounted on grids, which are removable and replaceable. The bottom of the broiler is arranged so that the greases will drain and drip into a cup. It is adapted for ordinary household use, or for use in restaurants, and other places for broiling small and medium steaks.

★*FOR FACTORY SHIPMENT ONLY- VOLTAGE DESIRED MUST BE SPECIFIED IN ORDERING.*

ELECTRIC HEATING APPLIANCES.

GLUE POTS.

No. 141E—1 qt., cast iron, max. watt cons. 450, heat regulation 3 heats, complete with 6 ft. cord, 3 heat porcelain plug switch, shipping w't 18 lbs. each. ★..... $20.00

No. 143E—2 qt., max. watt cons. otherwise same as No. 141E, shipping w't 25 lbs. ★.....each 23.00

Maximum watt capacity is only required in first starting to bring the glue to the proper consistency. One-quarter of the full amount is then sufficient to keep it there. These glue pots are well constructed, the heating element completely surrounding the water vessel and they have the advantage of being free from dirt or odor, fire, and danger from fire. By means of the regulating switch it is possible to reduce the current in the heater, so that the glue is kept at just the proper consistency.

SOLDER POTS.

No. 165E—5 lbs., cast iron, max. watt cons. 250, heat regulation 3 heats, with knife switch and binding post only, no cord or attachment plug, w't 9 lbs. ★.....each $12.50

No. 166E—10 lbs., max. watt cons. 450, otherwise same as No. 165E, w't 10 lbs. ★.....each 18.50

No. 167E—20 lbs., max. watt cons. 900, otherwise same as No. 165E, w't 16 lbs. ★.....each 24.00

No. 177E—50 lbs., max. watt cons. 1500, otherwise same as No. 165E, w't 25 lbs. ★.....each 30.00

The pots are intended for melting comparatively small quantities of solder, babbitt metal, lead and similar metals. They melt the metal quickly, and by means of the regulating switch it is then possible to reduce the current so that the metal is kept in a molten condition. Very substantial and durable.

DETACHABLE CORDS.

For Sad Irons Only.

No. 830E—Complete with No. 803E detachable plug, and separable lamp socket attachment plug. ★.....each $1.90

No. 831E—With No. 803E detachable plug only ★.....each 1.50

No. 832E—Cord only. ★..... " .80

For Water Heaters, Disc Stoves, Etc.

No. 817E—Complete with detachable contact plugs and lamp socket attachment plug, *double* conductor. ★...each $2.00

No. 820E—*Triple* conductor otherwise same as No. 817E. ★.....each 2.75

No. 818E—Cord only, *double* conductor, each. ★..... .80

No. 821E—Cord only, *triple* conductor, each. ★..... 1.20

DETACHABLE PLUGS.

No. 803E—Complete with contacts and non-kink springs. ★.....each $0.70

These plugs are of a special asbestos composition and will not crack or break under any ordinary conditions of usage. This plug is used on all standard "Steel Clad" irons. We use but one size which will fit all irons.

TEMPERATURE REGULATORS.

No. 472E—5½ in. diam. height over all 3 in., for regulating devices consuming not over 250 watts, w't 2½ lbs. ★. each $8.50

No. 400E—10×10½ in., for regulating device consuming not more than 400 watts, w't 9 lbs. ★.....each $ 9.00

No. 401E—10×10½ in., for regulating device consuming not more than 600 watts, w't 9 lbs. ★.....each 9.50

No. 402E—10×10½ in., for regulating device consuming not more than 800 watts, w't 9 lbs. ★.....each 10.00

No. 403E—10×10½ in., for regulating device consuming not more than 1000 watts, w't 9 lbs. ★.....each 10.50

Rheostats are intended for use in connection with different appliances for reducing or regulating the temperature, as for instance on our laundry and tailor irons, where irons are left between times without any work to do, or where irons are used for a variety of purposes on different kinds of work, where a finely graduated degree of heat is required.

By means of the rheostat, it is possible to regulate the temperature of irons from full heat to just enough to keep them warm, and to maintain any desired temperature between the two extremes. Only one device can be operated at a time with one rheostat.

IF LARGER SIZES DESIRED WRITE FOR DESCRIPTION AND PRICES.

All heaters are constructed with heavy nickeled iron tops and bottoms and black japanned steel casings. They are very neat in appearance. The dimensions vary from 12 in. length, 12 in. height, 3 in. width, to 20 in. length, 17 in. height, 4½ in. width. Shipping weights vary from 14 lbs. to 50 lbs. The heaters are furnished complete, the single heat without switches the No. 4125E, has the switches attached.

The heaters will work equally well on direct or alternating current circuits. In ordering, it is necessary to specify voltage. Wall type heaters equipped with brackets for attachment to the wall can be furnished if desired.

WARMING PADS.

No. 1815E—12×13 in., max. watt cons. 60, 10 ft. cord, switch, separable attachment plug, w't 16 oz.★.....each $11.00

Takes the place of the hot water bottle, consists of a flexible electric heating element cased in canvas with an outer casing of eiderdown or rubber cloth, the outer case being removable and washable.

This pad is endorsed by the leading physicians and is used in the home, hospitals and institutions of all kinds. It is always ready for instant use by merely screwing the attachment plug into the lamp socket.

LUMINOUS RADIATORS.

No. 6020E—Height 19 in., width 18 in., depth 7½ in., w't 30 lbs.★.....each $17.00

The "Detroit" luminous radiator is of a neat design and presents a very attractive appearance, for use in the parlor, drawing room, stateroom, hallway, bathroom or office, because of its cheerful, warm glow. It is particularly adapted for intermittent service where a moderate amount of reflected radiated heat is desired.

The radiator is equipped with the three-heat switch so that it is possible to turn on one, two or three elements as desired.

The luminous elements (heater lamps) are made for either 250 or 500 watts and for various intermediate voltages from 100 to 250. They are all equipped with standard Edison base and the bulbs are frosted.

By using either 250 watt elements or 500 watt elements, the maximum wattage may be varied from 750 to 1500. By using a combination, the wattage may be 1000 or 1250.

Regularly furnished in standard "brushed brass" finish, but polished brass, polished nickel, or oxidized copper can be furnished on special order at the same price.

Each radiator supplied with 8 ft. detachable cord. The list price above does not include the luminous elements, in estimating cost, include the price with three elements. The list price of the radiator complete with three elements varies from $22.40 to $23.60, depending on the wattage and voltage of the elements selected. Extra elements may be ordered as desired.

ELEMENTS FOR LUMINOUS RADIATORS.

No. 6001E—Watts 250, voltages 0 to 125.★.....each $1.80

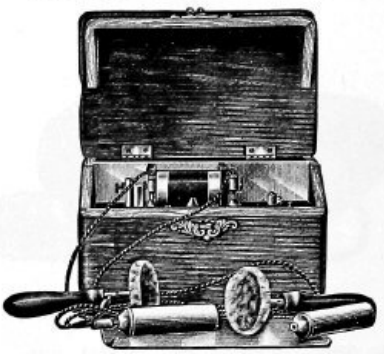
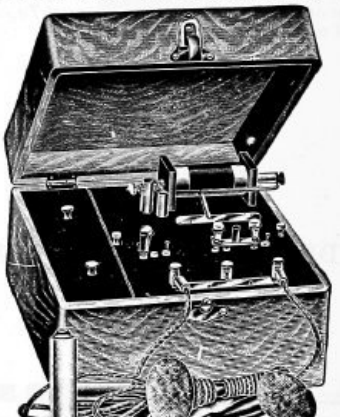
MEDICAL BATTERIES.



No. 4E—4×5½×6½ in. quarter sawed oak case with nickel plated handle and clasp, interior parts nickel plated, one powerful dry cell in position ready for use, coil and metal parts mounted on highly polished ebonized base, equipped with two sponge electrodes, two ebonized wood handles, two nickel plated hand electrodes, two four foot cords, one nickel plated foot plate, w't 5 lbs., each..... $5.00

No. 3E—5×6×8 in. polished oak case, with nickel plated handle and clasp, interior parts nickel plated, coil and metal parts mounted on highly polished ebonized base, equipped with two dry cells, two four foot silk cords, two nickel plated hand electrodes, two wood handle sponge electrodes, one nickel plated foot plate, w't 7 lbs.....each 7.00



No. 6E—5¾×8¼×8¾ in. highly polished quarter sawed oak case, two dry cells, equipped with improved induction silk mounted coil, improved vibrator post with binding nut, provided with index pointer showing amount of current being used, single and double switch so that either one or both cells may be used, equipped with two conducting cords, two wood handles, two nickel plated handles, one nickel plated foot plate, w't 9 lbs.....each $9.00

The most complete, compact batteries for either physicians or for use in the home. It generates all the different currents, primary, secondary and the two combined.

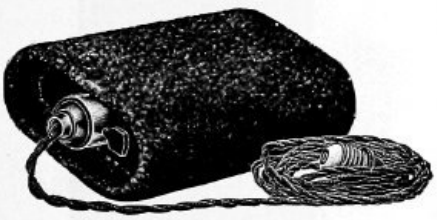
The current can be regulated smooth and even, and any degree of strength obtained, the range of power is sufficient to meet the requirements of strongest man or weakest child.

The dry cells are the only part that can exhaust, and these will last from four to twelve months, according to usage.

★*FOR SHIPMENT FROM FACTORY ONLY. VOLTAGE DESIRED MUST BE SPECIFIED IN ORDERING.*

ELECTRIC HEATING APPLIANCES.

MONARCHO ELECTRIC HEATERS.



No. 990E—10×6×3 in., covered with eiderdown, complete with 10 foot cord, attachment plug and 4 candle-power, 110 volt lamp, w't 2 lbs. ..... each $5.00

All No. 990E heaters are sent out with a 4 C. P. 110 volt lamp. If other voltage lamps are wanted, so specify on orders.

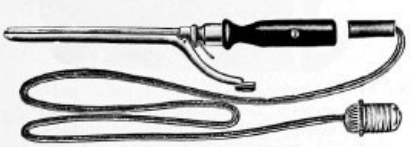
If ordered without lamp 20 cents less.

Monarcho heaters can be connected to any lamp socket, and by placing inside of heater a regular incandescent lamp (4 C. P. recommended) of the proper voltage, it is made ready for use.

Should be in every household where electric current may be had. It takes the place of a hot-water bottle, foot-warmer, and has numerous other uses. It is simple, sanitary and indestructible and the cost of operating is about 1 cent per hour. Where heat and light are wanted at the same time from one socket, No. 1641AE Current Tap can be used at a slight additional cost.

ONE IN A BOX.

DEL ELECTRIC CURLING IRONS.



100 to 125 Volts.

No. 500E—Nickel plated, ebonized handle and thumb button, length over all 11½ in., complete with plug and 9 ft. of silk covered cord ready to attach to socket ..... each $3.75

These irons are detachable and provide a convenient and simple way of making the Marcel Wave, Pompadour and other stylish coiffures. The cost of dressing the hair with the iron is less than one-half of one cent, and fifty per cent cheaper than gas.

ONE IN A BOX.

CURLING IRON HEATERS.

Used extensively for telephone work, has the same insulation as regular copper weatherproof wire, and put up in coils.

ANNUNCIATOR.

Insulated.

No. 518E —Size 18 B. & S. ga., in coils of 1 lb.....per pound $0.60

No. 518½E—Size 18 B. & S. ga., in coils, of ½ lb.....per pound .60

No. 618E —Size 18 B. & S. ga., on spools of about 8 lbs.....per pound .50

Double cotton, wrapped, waxed and paraffined, made in assorted colors.

ABOUT 155 FT. TO THE POUND.

GALVANIZED IRON.

Steel.

NOS.	LBS. PER 1,000 FT.	LBS. PER MILE.	PER 100 LBS.
6	111.74	540	
9	59.46	320	
10	48.86	260	
12	32.19	165	
14	18.75	96	

"Steel" (or homogeneous metal) is more expressly designed for short line telephone service, where a measure of conductivity can be exchanged for tensile strength in a light wire.

NO. 6—ONE THIRD MILE; BALANCE HALF MILE, IN A COIL.

"B. B." (Best Best.)

NOS.	LBS. PER 1,000 FT.	LBS. PER MILE.	PER
6	111.74	540	
9	59.46	320	
10	48.86	260	
12	32.19	165	
14	18.75	96	

Very tough and will stand a good mechanical test. It is largely used by telegraph companies and in railway telegraph service.

NO. 6—ONE THIRD MILE; BALANCE, HALF MILE IN A COIL.

"E. B. B." (Extra Best Best.)

NOS.	LBS. PER 1,000 FT.	LBS. PER MILE.	PER 100 LBS.
6	111.74	540	
9	59.46	320	
10	48.86	260	
12	32.19	165	
14	18.75	96	

E. B. B. (Extra Best Best) is made by improved continuous process from the very best iron. It stands highest of any telephone wire in conductivity. Very uniform in quality, pure, tough and pliable.

NO. 6—ONE THIRD MILE; BALANCE, HALF MILE IN A COIL.

GALVANIZED STRAND.

Consists of Seven Wires twisted together.

NOS.	DIAM. IN.	WEIGHT PER 100 FT.	PER 100 FT.
915E	$\frac{1}{4}$	13	$1.75

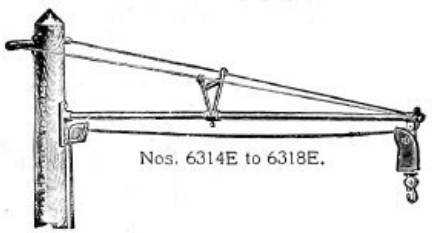
ELECTRIC LIGHT MATERIAL.

MAST ARMS.



Nos. 6314E to 6318E.

Medium, with one Triangular Stiffener.

No. 6314E— 6 ft.,	- -	each $ 7.80
No. 6315E— 8 ft.,	- -	" 8.60
No. 6316E—10 ft.,	- -	" 9.40
No. 6317E—12 ft.,	- -	" 10.20
No. 6318E—14 ft.,	- -	" 11.00

A common-sense type of mast-arm furnished with a steel thrust-arm from which a pair of steel strain rods run to the headpiece, giving a double bracing to keep the fixture from swaying in high winds. The pole plate has a weatherproof pulley fastened direct to it, the thrust-arm is extra heavy and the end has a safety pulley fitted to it.

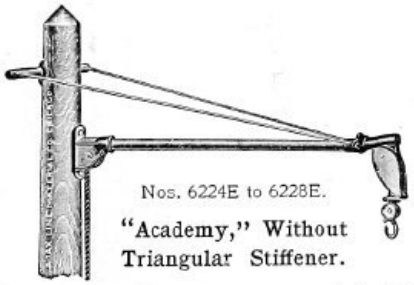
Midget, without Triangular Stiffener.

No. 6310E—4 ft.,	- -	each $ 6.00
No. 6311E—6 ft.,	- -	" 6.80
No. 6312E—8 ft.,	- -	" 7.60

A shorter form of the cut above, with the same arrangment of thrust-arm and strain rods, but without the stiffener for the middle of the pipe. Complete with safety pulley but without rope.

"Jumbo," with two Triangular Stiffeners, Safety Pulley, Anchored Thrust-Arm and Heavier Strain Rods. Otherwise Similar to Above.

No. 6330E—16 ft.,	- -	each $13.00
No. 6331E—18 ft.,	- -	" 14.00
No. 6332E—20 ft.,	- -	" 15.00



Nos. 6224E to 6228E.

"Academy," Without Triangular Stiffener.

No. 6224E—4 ft.,	- -	each $ 6.00
No. 6226E—6 ft.,	- -	" 6.80
No. 6228E—8 ft.,	- -	" 7.60

A short mast-arm, with the pole pulley and the outer safety pulley held so that the rope runs through the piping. Has a steel thrust-arm for the back of the pole, and pair of steel strain rods.

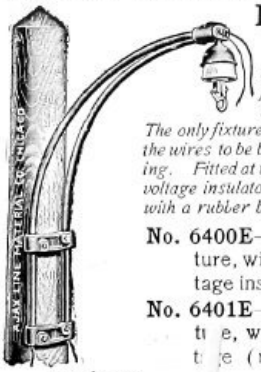
Tubular, With One Triangular Stiffener, Otherwise Same as Above.

No. 6116E— 6 ft.,	- -	each $ 7.80
No. 6118E— 8 ft.,	- -	" 8.60
No. 6120E—10 ft.,	- -	" 9.40
No. 6122E—12 ft.,	- -	" 10.20
No. 6124E—14 ft.,	- -	" 11.00

"Varsity," With Two Triangular Stiffeners, Heavier Strain Rods and Side-braced Thrust Arms, otherwise same as above.

No. 6301E—12 ft.,	- -	each $11.40
No. 6302E—14 ft.,	- -	" 12.40
No. 6303E—15 ft.,	- -	" 12.90
No. 6304E—16 ft.,	- -	" 13.40
No. 6305E—18 ft.,	- -	" 14.40
No. 6306E—20 ft.,	- -	" 15.40

POLE TOPS.



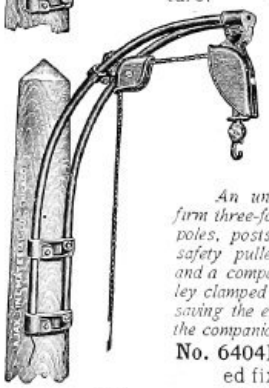
A neat, two-foot fixture, equally suitable for use on round poles, square poles or walls. The only fixture of its kind that allows the wires to be brought through the piping. Fitted at the outer end with a high voltage insulator (or for low voltage with a rubber bell insulator).

No. 6400E—Front fixture, with high voltage insulator, each $4.80

No. 6401E—Front fixture, with low voltage (rubber bell) insulator, - each, 4.60

Similar to the front fixture, but arranged for external wiring. Has a "Volta" (high voltage) cross-arm at the outer end with a channel steel arm to support glass petticoat insulators for guiding the wires. Two-foot reach, complete as pictured, except glass insulators.

No. 6402E—Quadrant fixture, - each $5.00



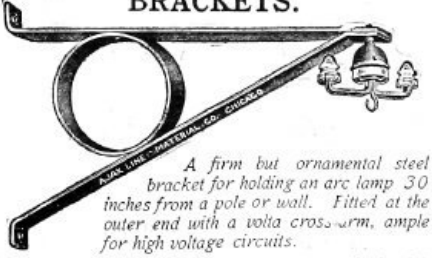
An unusually complete and firm three-foot fixture for use on poles, posts or walls. Has a safety pulley at the outer end, and a companion sleet-proof pulley clamped to the curved pipes, saving the extra labor of bolting the companion pulley to the pole.

No. 6404E—Pulleyed fixture, without rope, each $6.00

This new type holds the lamp slightly in front of the pole, or out of reach of the usual line of trees; is easily fastened in place, almost shadowless and neat in looks. The wires are readily run through the piping to the lamp, which is insulated from the fixture by a high voltage insulator.

No. 6403E—Forward, each $6.00

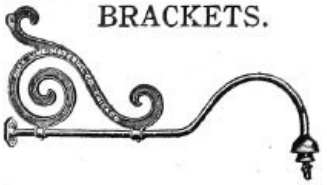
BRACKETS.



A firm but ornamental steel bracket for holding an arc lamp 30 inches from a pole or wall. Fitted at the outer end with a volta cross-arm, ample for high voltage circuits.

No. 6410E—30 in., Chicago, - each $4.00

BRACKETS.



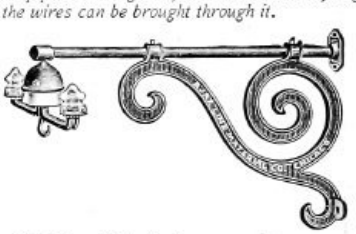
No. 6411E—4 ft., Opera, with insulator for supporting lamp, yet arranged to be wired through the piping, - - - - each $4.50

No. 6412E—5 ft., with chains and rosettes for guying the outer end, otherwise same as above - each 5.60

No. 6414E—4 ft., Madison, complete with bell insulator, not wired, each - - - - - - $3.60

No. 6415E—4 ft., Madison, grooved flange, without inner piping, each - - - - - - 3.50

An ornamental arc lamp bracket for concealed wiring. Halds the lamp three feet from the wall, and has the pipe extending one foot inside the wall flange, so that the wires can be brought through it.

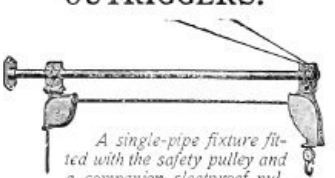


No. 6416E—4 ft., Ionic, complete, each, - - - - - - $3.80

No. 6418E—6 ft., Ionic, with chains and rosettes for guying outer end, each, - - - - - - 5.20

An ornamental bracket having a channel steel cross-arm with glass insulators to guide the line wires, and a volta insulator to properly insulate the lamp frame.

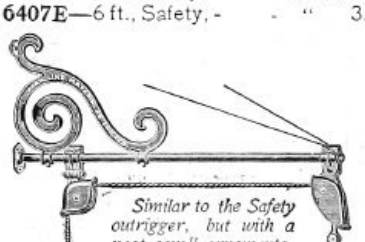
OUTRIGGERS.



A single-pipe fixture fitted with the safety pulley and a companion sleetproof pulley. Requires guying for the outer end, but can be put up in places where the wall space is limited.

No. 6406E—3 ft., Safety, - - each $2.60

No. 6407E—6 ft., Safety, - - " 3.00



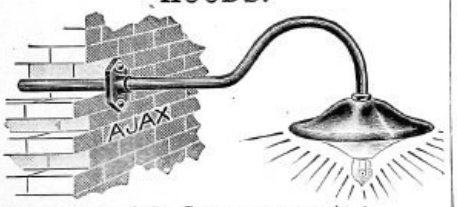
Similar to the Safety outrigger, but with a neat scroll ornamentation.

No. 6420E—3 ft., Scroll, with pulleys, each, - - - - - - $4.00

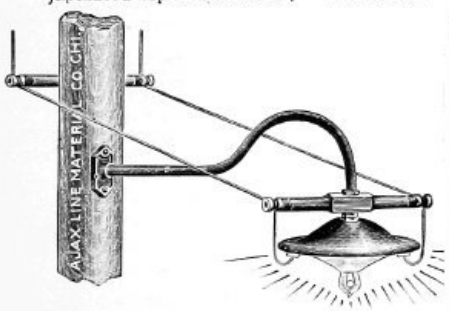
No. 6421E—6 ft., - - each 4.40

ELECTRIC LIGHT MATERIAL.

HOODS.

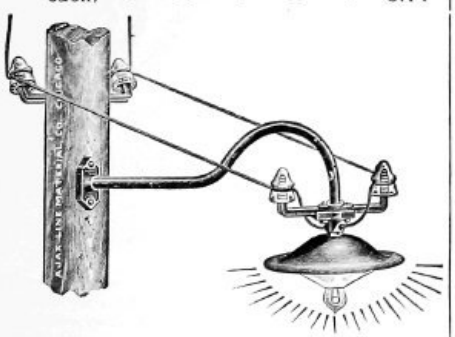


No. 6633E—3 ft., Swan, gooseneck, 1 ft. inner piping, Edison socket, japanned top and reflector, - each $3.10



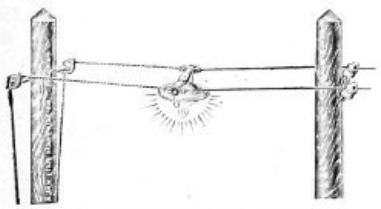
No. 6634E—3 ft., Chicago, gooseneck, Edison socket, japanned top and reflector, rear arm for back of pole, - - - - each $3.70

No. 6635E—Chicago, without rear arm, otherwise same as above, each, - - - - - 3.14



No. 6636E—3 ft., Duro, gooseneck, Edison socket, japanned top and reflector, channel steel cross-arm, (with double petticoat glass insulators), an extra durable fixture, each, - - - - - $3.40

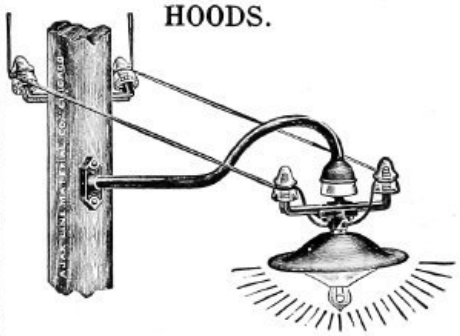
No. 6637E—"Duro," with channel steel pole arm (as shown at back of pole in above cut), otherwise same as above, - - each 4.10



No. 6644E—Horizontal, complete with Edison socket, pole arms for the wires and adjustable clamps for the ropes, - - - each $6.00

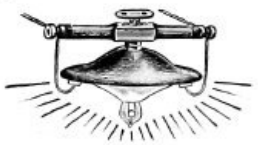
A suspension hood supported by the two wires and two ropes running over pulleys at the end of an iron cross-arm.

HOODS.



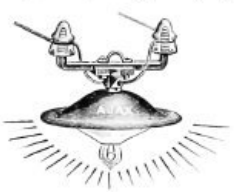
No. 6638E—"Volta," Edison socket, 1000 volt insulator over cross-arm, without pole arm, for high voltage circuits, - - - each $4.30

No. 6639E—"Volta," with pole-arm (as shown at back of pole in above cut), otherwise same as above, each, - - - - - - 5.00

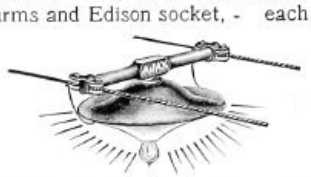


No. 6640E—Beam head, with Edison socket, japanned top and reflector and cross-arm with suspension loop, - - - - each $2.40

No. 6641E—"Ring" hood, with Edison socket, japanned top and reflector, and cross-arm with suspension loop, - - - - each $2.40



No. 6642E—Tee hood, a strong suspension hood, with steel cross-arms and Edison socket, - each $2.66

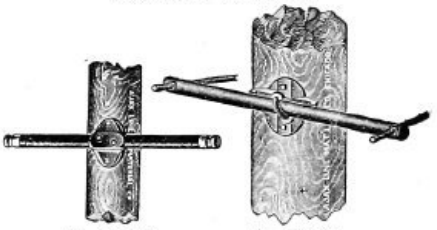


No. 6643E—Taut hood, center part of this illustration, with Edison socket and spreader arms, - each $2.80

POLE ARMS.

No. 6646E—Pole arm, channel steel, with cushion tips, - - each $0.70

REAR ARMS.



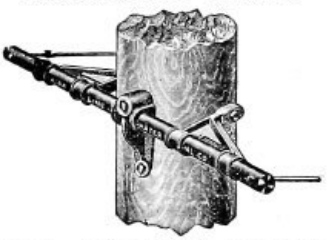
No. 6660E. No. 6661E.

No. 6660E—Rear arm (for incandescent hoods), enameled wood, metal bound ends, porcelain knobs and pole plate, - - each $0.56

No. 6661E—Without side brackets, " 1.20

A shorter form of the above, without the side bracing, as used with the Medium, Midget and Tubular mast-arms.

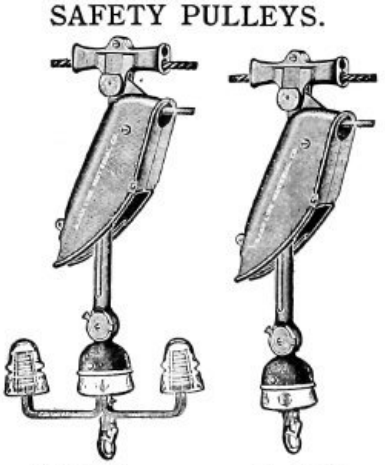
ANCHORED ARMS.



No. 6662E—Furnished regularly with the "jumbo" and "Varsity" mast-arms, - - - each $2.00

The only device of the kind that really utilizes the full diameter of the pole.

SAFETY PULLEYS.



No. 6701E. No. 6702E.

No. 6701E—With volta arm, - each $3.30

No. 6702E—With volta insulator, " 2.60

The finest combination made for insulating and supporting an arc lamp, and for guiding the wires to the lamp.

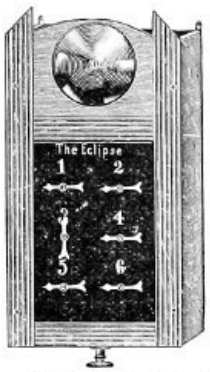
HOISTING CHAIN.

No. 1E—Oneida galvanized, per 100 ft. $3.80

1000 feet on a reel. Oneida galvanized coil chain is especially intended to be used on electric light poles, for arc lamp suspension, in place of wire cable, hemp or cotton cords. It is low in price and will last two or three times as long as any substitute now in use. This size will fit perfectly Bradley, Fletcher, Cutter or Ajax pulleys.

ANNUNCIATORS.

HOUSE.



"Eclipse," Natural Oak Finish.

The cable enters from the back and the wires are distributed to terminal contacts set on the back board. This annunciator may also be used for club or office.

"ACME" TWO POINT.

The drops cannot get out of order as there is no mechanism to adjust. Has very dainty appearance, and at the moderate price it should find a ready sale.

No. 1300E—	With bell, -	each $3.00
No. 1301E—	With buzzer, -	" 3.00

This is a very serviceable article. The case being made of metal, enamel finished.

BE SURE TO SPECIFY FINISH WANTED ON ALL ORDERS.

REV-O-NOC TELEPHONES.

COMPACT.

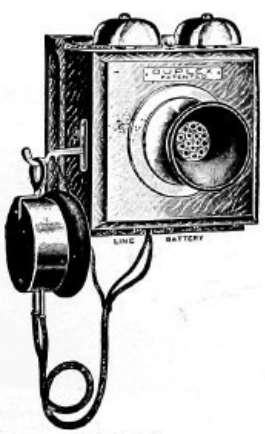
No. 7308E—3 bar series, 80 ohm ringer, each..... $17.50
No. 7410E—4 bar bridging, 1000 ohm ringer.....each 23.00
No. 7510E—5 bar bridging, 1000 ohm ringer.....each 24.50
No. 7516E—5 bar bridging, 1600 ohm ringer.....each 25.00
No. 7520E—5 bar bridging, 2000 ohm ringer.....each 26.00
No. 7616E—6 bar bridging, 1600 ohm ringer.....each 30.00

All Rev-o-noc Bridging telephones are equipped with patented SECRET SERVICE generators, by means of which calls are made secretly on either grounded or metallic lines. A backward turn of the generator crank throws the switchboard drop but does not ring the bells of the subscribers upon the line. A forward turn signals the subscribers in the usual manner. No push buttons or relays are necessary; can be used on any line, in conjunction with all other makes of instruments now installed, and without making any change in the present service.

Cabinets are quarter-sawed oak, highly polished, are furnished with adjustable ringer movements, No. 20E long distance solid back transmitter, No. 33E receiver with concealed cord connection, induction coil, automatic switch hook, lighting arrester and two dry batteries.

Telephones equipped with condensers 35 cents extra net.

BATTERY CALL.

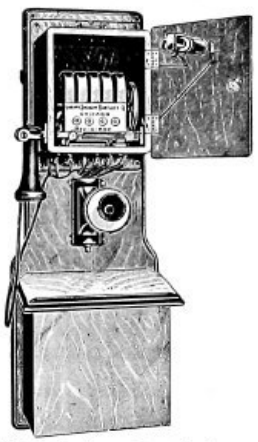


No. 6E—DUPLEX, with 2 batteries, complete and ready to install.....each $6.00

The duplex may be used in pairs and is especially adapted for use between two points, such as a house and barn, office and warehouse, or from one floor to another. Each instrument is furnished with a vibrating bell which will ring at a distance of 5000 ft. Where both phones are in the same building, annunciator wire is desirable.

If run outside No. 802E is recommended.

STANDARD STYLE.



Wide Battery Box Style.

No. 8308E—3 bar series, 80 ohm ringer, each..... $17.50
No. 8410E—4 bar bridging, 1000 ohm ringer.....each 23.00
No. 8510E—5 bar bridging, 1000 ohm ringer.....each 24.50
No. 8516E—5 bar bridging, 1600 ohm ringer.....each 25.00
No. 8520E—5 bar bridging, 2300 ohm ringer.....each 26.00

These cabinets are quarter-sawed oak highly polished, and equipped with powerful secret service generator for ringing long lines, adjustable ringer movement, No. 20E long distance solid back transmitter, No. 33E receiver, with concealed cord connection, induction coil, automatic switch hook, lightning arrester, two dry batteries. Wet batteries can be used if desired

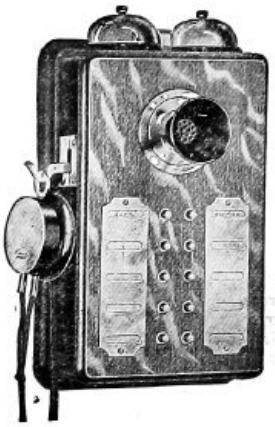
Telephones equipped with condensers 35 cents extra net.

DESK SETS.

No. 113E—3 bar, series generator, 80 ohm ringer, mounted in same box, each $22.00
No. 114E—4 bar bridging generator, 1600 ohm ringer, mounted in same box, each 24.00
No. 115E—5 bar bridging generator, 1600 ohm ringer, mounted in separate boxes, each..... 26.00
No. 116E—6 bar bridging generator, 1600 ohm ringer, mounted in separate boxes, each..... 27.00

These desk sets have rubber grip, cast brass parts, nickel plated removable bottom plates, leather cushion, induction coil and terminal block, mounted in base. Price is for the set complete, including telephone, generator, ringer, terminal block, batteries and diagram of connection.

INTER-COMMUNICATING.



No. 641E— 4 stations.....each $7.35
No. 642E— 8 stations..... " 7.65
No. 643E—10 stations..... " 7.95
No. 644E—12 stations..... " 8.25
No. 645E—16 stations..... " 8.85

No. 6603E—4 stations, with call buttons in base.....each $13.50
No. 6604E—8 stations, with call buttons in base.....each 15.30
No. 6605E—10 station, with call buttons in base.....each 16.20
No. 6606E—12 stations, with call buttons in base.....each 17.10
No. 6607E—16 stations, with call buttons in base.....each 18.90

No. 1060E—Choke coil.....each $0.90
One choke coil is required for every system.

The inter-communicating are wired for central battery common talking circuit, all stations being connected to one pair of talking wires, but having call buttons on each telephone to the number required to call other stations without a central.

These telephones are superior in point of design, finish, accessibility for connecting up, durability and efficiency to any line of apparatus for a similar system ever produced.

Cables for installing these telephones can be furnished at not to exceed $10.00 per hundred feet, nine cells of dry battery will operate any size system complete, wiring diagram furnished with every outfit. Prices do not include cable or batteries.

TELEPHONE PARTS.

RECEIVERS.

No. 33E—With concealed cord.....each $1.80

This receiver is furnished on all our telephones. It is perfect in design. Tungsten steel magnets. The coils are wound with silk covered wire and cords so attached that by careless handling or dropping they do not break loose from terminals.

WATCH CASE RECEIVERS.

No. 164E—Double pole, solid rubber shell.....each $2.50

OPERATORS' RECEIVERS.

No. 133E—Complete with leather covered band and watch case receivers....each $4.00

TRANSMITTERS.

No. 20E—Solid back.....each $3.00

In general workmanship and finish, this transmitter represents the highest development of the art of transmitter construction.

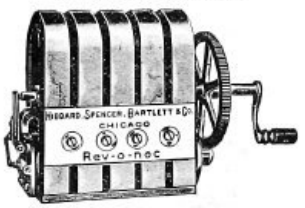
Every part is made of the very best materials procurable and constructed on strictly scientific and mechanical principles.

It embodies the latest features known and recognized as essential to good transmitter construction and is in every point in advance of any other transmitter now offered to the telephone public.

TELEPHONE MOUTH PIECES.

No. 613E—Male thread.....each $0.25
No. 615E—Female thread..... " .25

GENERATORS.



No. 53E—3 bar series.....each $3.80
No. 54E—4 bar bridging..... " 5.50
No. 55E—5 bar bridging..... " 7.00
No. 56E—6 bar bridging..... " 8.00

Our generators are made in all the standard sizes, 3-bar for series work, 4, 5 and 6 bar for bridging work.

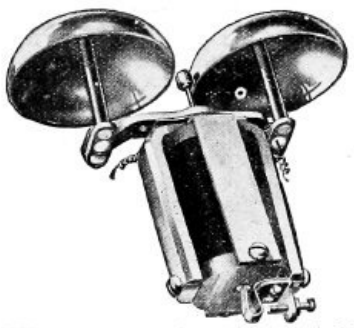
Both the series and bridging generators are of the same type and are built to stand hard and constant usage.

The armatures are made of a large number of laminations of the softest Swedish iron.

The permanent or field magnets are made from the best Tungsten steel and are subjected to a special secret treatment which insures the greatest permanency.

The output in amperage and E. M. F. is in excess of that of any other generator made.

RINGER MOVEMENTS.



No. 608E— 80 ohm series ringer.each $2.00
No. 610E—1000 ohm bridging ringer " 3.00
No. 616E—1600 ohm bridging ringer " 4.00
No. 620E—2000 ohm bridging ringer " 5.00

This improved type of ringer movement, we guarantee to be equal to any ringer movement now on the market. The cores and armatures are of the best grade annealed Norway iron. All coils, both for series and bridging work, are made long, which allows the use of a larger wire, giving more turns and not so liable to burn out from lightning or other causes. The wire used in winding these coils is insulated with pure silk. The adjustment of this ringer is easily accessible and very permanent, and being centrally located, it does not change the relative position of the clapper and gongs.

RECEIVER CORDS

No. 47E—36 in. worsted, tips both ends, each..... $0.40
No. 48E—36 in. worsted, tips one end, slips on other end.....each .40
No. 49E—36 in. green silk, tips both ends, each..... .60

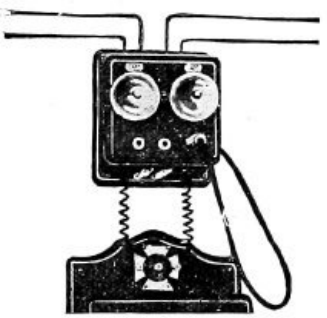
No. 47E is most commonly used

TESTING SETS.

No. 423E—4 bar generator, watch case receiver, in oak case 7½×6×8 in., w't 12 lbs.....each $24.00

Used in locating trouble on either a series or bridging line.

TOLL LINE EXTENSION BELL SWITCHES.

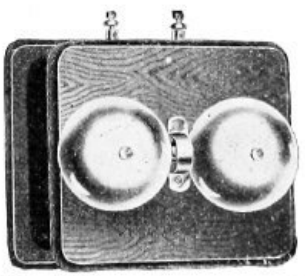


No. 3120E—Extension bell.....each $10.00

At times long toll lines are tied up because two stations near each other are talking. By using this extension bell several conversations can be carried on at the same time. Connections are made by the use of a key, which, when placed at the right the telephone is connected at the right hand line, leaving the left hand line clear. When the key is at the left the right hand line is clear and when in the center the lines are connected together and the telephones are bridged across.

Should be same resistance as telephones on line.

EXTENSION BELLS.



No. 318E— 80 ohm series.....each $3.00
No. 319E—1000 ohm bridging..... " 4.50
No. 320E—1600 ohm bridging..... " 5.00
No. 321E—2000 ohm bridging..... " 6.00

These bells are used in connection with telephones, enabling one to get the signal of the regular telephone when at a distance. The telephone may ring in one part of the building and by the aid of an extension bell the signal can be given in another part, wherever the bell is placed.

Should be same resistance as telephone to be used with.

TELEPHONE CONSTRUCTION TOOLS.

SPLICING CLAMPS.

No. 53E—10 in., forged steel, polished head, two round and two oblong holes, for Nos. 2, 4, 6 and 8 copper wire, w't 1 lb. ..... each $3 20

No. 155E—7 in. baby, forged steel, full polished, four round holes, for Nos. 10, 12, 14 and 16 copper wire, w't 6 oz. each.. ..... $2.70

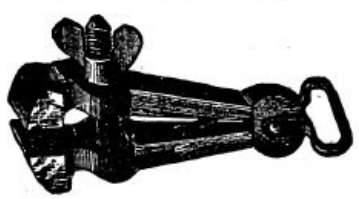
No. 55E—10 in., forged steel, full polished, four round holes, for Nos. 8, 10, 12 and 14 iron wire and Nos. 6, 8, 10 and 12 copper wire, w't 1 lb..... each 3.20

No. 57E—11 in.,forged steel, full polished, five round holes for Nos. 6, 8, 10, 12 and 14 iron wire and Nos. 4, 6, 8, 10 and 12 copper wire, w't 1 lb..... each 3.40

Combination Wire and Sleeve

No. 9E—10½ in., forged steel, full polished, five holes for Nos. 6, 8, 10, 12 and 14 iron wire, Nos. 4, 6, 8, 10 and 12 copper wire, and Nos. 8, 10, 12 and 14 sleeves, w't 1 lb..... each $3.60

LINEMEN'S VISES.



No. 375E—5½ in., with loop. ..... each $2.20
No. 376E—6 in., with loop. ..... " 2.60
No. 377E—Straps for vise..... " 1.65

HAVEN'S WIRE CLAMPS.

No. 368E—Steel, for No. 8 wire and finer, w't 2½ lbs. ..... each $3.00
No. 369E—Steel, for ½ in. wire and finer, w't 2½ lbs. ..... each 5.50

A very efficient clamp for all around work.

ECCENTRIC CLAMPS.

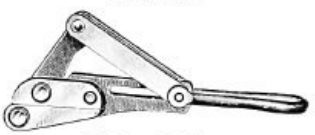
Without Straps.

No. 130E—Steel, for No. 8 wire and finer, w't 1 lb. ..... each $1.60
No. 131E—Strap for above. ..... " 1.65

COME ALONGS.

No. 126E—Malleable iron, for No. 8 wire and finer, w't 1 lb. ..... each $1.20
No. 127E—Malleable iron, for No. 6 wire and finer, w't 2 lbs. ..... each 2.00
No. 128E—Malleable iron, for No. 0 wire and finer, w't 2¼ lbs. ..... each 2.50

NEW CHICAGO WIRE GRIPS.



Without Pulleys.

No. 870E—Steel, for No. 10 wire and finer, w't 15 oz.. ..... each $3.80
No. 871E—Steel, for No. 6 wire and finer, w't 23 oz.. ..... each 4.00
No. 872E—Steel, for No. 0 wire and finer, w't 2¾ lbs. ..... each 6.60
No. 873E—Steel, for No. 0000 wire and finer, w't 7½ lbs. ..... each 10.00

It grips and holds and is most convenient to handle.

With Pulleys.

No. 874E—Steel, for No. 10 wire and finer, with pulley for ¼ in. rope, w't 1¼ lbs.. ..... each $4.80
No. 875E—Steel, for No. 6 wire and finer, with pulley for ⅜ in. rope, w't 1¾ lbs. ..... each 5.00
No. 876E—Steel, for No. 0 wire and finer, with pulley for ½ in. rope, w't 3¼ lbs. ..... each 7.60
No. 877E—Steel, for No. 0000 wire and finer, with pulley for ⅝ in. rope, w't 9 lbs.. ..... each 11.50

It can be pushed out on the wire, so as to get as much slack as necessary, and pulls straight, leaving no kinks in the wire.

Without Pulleys, for Insulated Wire.

No. 878E—Steel, for No. 18 to No. 4 wire, w't 2⅜ lbs. ..... each $6.50
No. 879E—Steel, for No. 14 to No. 00 wire, w't 3½ lbs. ..... each 8.00

With Pulleys, for Insulated Wire.

No. 881E—Steel, for No. 18 to No. 4 wire, pulleys for ½ in. rope, w't 2¾ lbs., each 7.50
No. 882E—Steel, for No. 14 to No. 00 wire, pulley for ½ in. rope, w't 4 lbs, each.. ..... 9.00

A nickel plated well proportioned, reliable tool that will do the work required on either iron or copper wire.

WIRE PEELERS

No. 1414E—Perry, plain..... each $0.60

Used for removing the insulation from wire.

LAG SCREW WRENCHES.

No. 214E—12 in., polished handle, for ½ and ⅝ in. lag screws, w't 1 lb. each.. ..... $1.60

No. 326E—Combination for ⅜, ½ and ⅝ in. lag screws and bolts, w't ¾ lbs. each.. ..... $2.50

SPLICING WRENCHES.

No. 321E—7 in., steel, full polished, for Nos. 4 and 6 iron wire or 2 and 4 copper wire. ..... each $1.70
No. 322E—7 in., steel, full polished, for Nos. 8 and 9 iron wire or 6 and 8 copper wire..... each 1.70
No. 323E—7 in., steel, full polished, for Nos. 10 and 12 iron wire or 8 and 10 copper wire..... each 1.70

GALVANIZED PULLEY BLOCKS.

No. 184E—4 in., malleable iron, galvanized, with eccentric grips, for ⅝ in. rope, *without rope*..... per pair $7.00

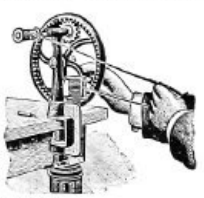
Rope extra. State kind, size and length wanted.

ANTI-HUMMS.

No. 1447E—Galvanized..... each $0.25

Will eliminate the humming noises of telephone lines.

MAGNET WINDERS.



No. 600E—Complete..... each $7.00

Handy tool in every telephone exchange for rewinding ringer and induction coils.

TELEPHONE CONSTRUCTION MATERIAL.

TOOL BAGS.

No. 310E—16 in., canvas, with leather bottom, steel frames, billets, buckle pieces and handles are of leather, riveted to frames, one inside pocket, w't 3¼ lbs. ..... each $5.00

No. 316E—20 in., otherwise same as No. 310E, w't 3½ lbs. ..... each 6.00

CARBON BAGS.

No. 325E—Leather, with shoulder straps, w't 2 lbs. ..... each $5.00

POLE CLIMBERS.

Eastern Pattern.

No. 1110E—Eastern pattern, 15 in., per pair. $3.60

No. 1111E—Eastern pattern, 15½ in., per pair. 3.60

No. 1112E—Eastern pattern, 16 in., per pair. 3.60

No. 1113E—Eastern pattern, 16½ in., per pair. 3.60

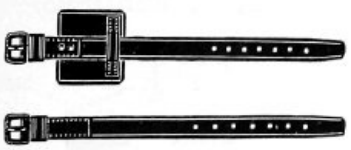
No. 1114E—Eastern pattern, 17 in., per pair. 3.60

No. 1115E—Eastern pattern, 17½ in., per pair. 3.60

No. 1116E—Eastern pattern, 18 in., per pair. 3.60

Above climbers are made of best forged steel. Prices do not include straps.

POLE CLIMBER STRAPS.



No. 111E—For Eastern climbers, w't per set 1 lb. ..... per set $1.50

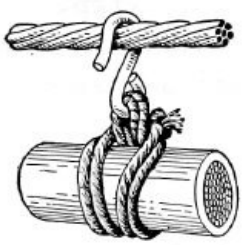
A set consists of two upper straps, with 4×4 in. plain leather pads and two lower straps without pads.

TOOL BELTS.

No. 350E—Leather, length over all 40 in., width 2¼ in., w't ½ lb. ..... each $1.50

No. 353E—Leather, length over all 40 in., width 2¼ in., with safety straps, w't 2½ lbs. ..... each $2.50

CABLE HANGERS.



No. 225E—MARLIN, 9 in. loop for 25 pair, cable. ..... per thousand $6.40

No. 250E—MARLIN, 11 in. loop for 50 pair, cable. ..... per thousand 7.00

No. 275E—MARLIN, 12 in. loop for 75 pair, cable. ..... per thousand 7.35

No. 2100E—MARLIN, 14 in. loop for 100 pair, cable. ..... per thousand 7.85

No. 2150E—MARLIN, 15 in. loop for 150 pair, cable. ..... per thousand 8.15

No. 2200E—MARLIN, 16 in. loop for 200 pair, cable. ..... per thousand 8.50

Marlin cable hangers have many advantages over the other types which render them superior for cable suspension. They are low in "first cost," are easily fastened in place, are strong and durable. There is no danger of damaging the lead sheath in their use, and the cable may be installed without grounding the sheath if this is desired.

No. 238E—BOSTON. ..... per thousand $40.00

Made of galvanized steel wire and zinc, strip adjustable to any size cable, simple and durable.

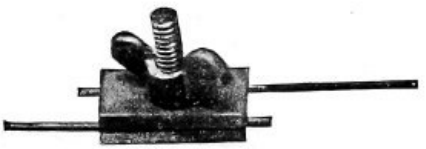
The method of using this clamp is very simple and the heavier the weight, the tighter the clamp becomes.

TEST CONNECTORS.

No. 705E—PIERCE. ..... each $0.10

Wires are held securely with solid copper connections between, no rocking motion when wires of unequal diameters are clamped as they are centered directly one above the other. Made of spring brass.

TEST CLAMPS.



No. 706E—Brass. ..... each $0.10

A very strong, durable connector easily adjusted with thumb nut and screw.

WIRE CONNECTORS.

No. 200E—For Nos. 12 and 14 wire. each $0.05

ONE HUNDRED IN A STANDARD PACKAGE.

WIRE CONNECTORS.

No. 1001E—Copper, for No. 10 wire, per hundred. $3.50

No. 1002E—Copper, for No. 12 wire, per hundred. 3.50

No. 1003E—Copper, for No. 14 wire, per hundred. 3.50

No. 1104E—Iron, for No. 10 wire, per hundred. 3.25

No. 1105E—Iron, for No. 12 wire, per hundred. 3.25

No. 1106E—Iron, for No. 14 wire, per hundred. 3.25

These are made so the strain is longitudinal and not vertical.

ELECTRIC CONSTRUCTION MATERIAL.

ELECTRIC LIGHT CROSS ARMS.

Yellow Pine.

Size 3¼×4¼ in., bored for 1½ in. pins, two ½ in. center bolts, and two ⅜ in. brace bolts, painted red.

Ten and six pin, bored for one ⅝ in. center bolt, shipped without extra charge when so ordered. Special borings to order. Special prices on arms of every description other than as above. Special cross arms of every description made to order.

WOOD PINS.

No. 1148E—Oak, telephone size, 1¼×8 in., painted.....per hundred $1.30
No. 1129E—Oak, electric light size, 1½×9 in., painted.....per hundred 1.50
No. 2148E—Locust, telephone size, 1¼×8 in., not painted.....per hundred 2.00
No. 2129E—Locust, electric light size, 1½×9 in., not painted....per hundred 2.50
No. 3148E—Krekose, telephone size, 1¼×8 in.,.....per hundred 1.60
No. 3129E—Krekose, electric light size, 1½×9 in.....per hundred 2.00

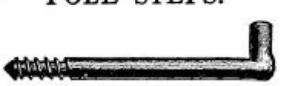
ONE HUNDRED IN A SACK.

WOOD BRACKETS.

No. 710E—Oak, pony telephone size, 1½×2×10 in., painted....per hundred $2.00
No. 712E—Oak, electric light size, 1½×2¼×12 in., painted.....per hundred 2.50

ONE HUNDRED IN A SACK.

POLE STEPS.



No. 9160E—Plain, cone pointed ⅝×9 in., per hundred..... $5.40
No. 9165E—Galvanized, cone pointed, ⅝×9 in.....per hundred 7.20

No. 1360E—Complete.....each $0.45
No. 1362E—Detachable step ..... " .40
No. 1364E—Plates..... " .05

Is the best detachable step made, because of the light weight of the step, which is made of aluminum, each step weighing only 3½ ounces, so that they can be carried in a lineman's pocket, and are strong enough to hold up the heaviest weight man.

The fitting on the pole is a simple plate, permanent—nothing to get out of order or clogged with ice. Cheaper and much handier than a ladder.

Staple.

No. 1911E—Galvanized.....each $0.25

The staple butt step is a strong, handy step to use on a pole where a great deal of climbing has to be done.

INSULATORS.

No. 9E—Glass, telephone, single groove, w't per piece 10 oz., w't per thousand 765 lbs.....per thousand $30.00
No. 99E—Porcelain, telephone, single groove, w't per piece 10 oz., w't per thousand 765 lbs.....per thousand 30.00

FOUR HUNDRED IN A BARREL.

No. 12E—Glass, telephone, double groove w't per piece 10⅔ oz., w't per thousand 770 lbs.....per thousand $30.00
No. 112E—Porcelain, telephone, double groove, w't per piece 10⅔ oz., w't per thousand 770 lbs.....per thousand 30.00

FOUR HUNDRED IN A BARREL.

No. 1E—Standard, deep groove, w't per piece 17 oz., w't per thousand 1200 lbs.....per thousand $67.00

TWO HUNDRED AND FIFTY IN A BARREL.

No. 3E—Deep groove, double petticoat, w't per piece 20 oz., w't per thousand 1120 lbs.....per thousand $60.00

TWO HUNDRED AND FIFTY IN A BARREL.

CROSS ARM BRACES.

Regular Standard.

No. 520E—Plain, 20×1×$\frac{3}{16}$ in., per hundred..... $ 6.50
No. 522E—Plain, 22×1×$\frac{3}{16}$ in., per hundred..... 8.60

No. 1026E—Galvanized, 26×1$\frac{7}{32}$×$\frac{7}{32}$ in., per hundred..... 15.00

TELEPHONE CONSTRUCTION MATERIAL.

POST HOLE SHOVELS.

No. 113E—7 ft. handle, 9½ in. strap, 9 in. blade, w't per doz. 92 lbs., per dozen $20.50
No. 112E—7 ft. handle, 28 in. strap, 9 in. blade, w't per doz. 97 lbs., per dozen 22.50
No. 115E—8 ft. handle, 9½ in. strap, 9 in. blade, w't per doz. 95 lbs., per dozen 22.50
No. 114E—8 ft. handle, 28 in. strap, 9 in. blade, w't per doz. 100 lbs., per dozen 24.50

POST HOLE SPOONS.

No. 116E—7 ft. handle, 28 in. strap, 9 in. blade, w't per doz. 93 lbs., per dozen $24.00
No. 118E—8 ft. handle, 28 in. strap, 9 in. blade, w't per doz. 96 lbs., per dozen 26.00

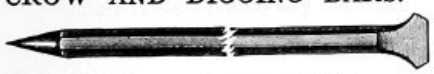
SLICK DIGGERS.

No. 125E—8 ft., steel blade, w't per doz. 204 lbs.....per dozen $45.00

DIGGING BARS.

No. 120E—Round, steel, 1⅛ in. × 8 ft., w't per doz. 312 lbs.....per dozen $42.00
No. 122E—Octagon, steel, 1⅛ in. × 8 ft., w't per doz. 336 lbs.....per dozen 50.00
Will cut roots and break rocks.

CROW AND DIGGING BARS.



No. 144E—Octagon, steel, 1 in. × 7 ft., w't per doz. 216 lbs.....per dozen $36.00
No. 145E—Octagon, steel, 1⅛ in. × 8 ft., w't per doz. 336 lbs.....per dozen 52.00

TAMPING AND DIGGING BARS.

No. 140E—Octagon, steel, 1 in. × 7 ft., w't per doz. 228 lbs.....per dozen $40.00
No. 141E—Octagon, steel, 1⅛ in. × 8 ft., w't per doz. 360 lbs.....per dozen 56.00

TAMPING BARS.

No. 124E—8 ft., hardwood handle, iron shoe, w't per doz. 120 lbs., per dozen..... $25.00

PIKE POLES.

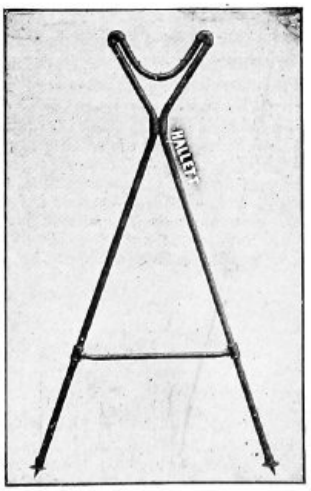
No. 212E—12 ft. × 1¾ in., steel point and ferrule, w't per doz. 114 lbs...per dozen $24.00
No. 214E—14 ft. × 1¾ in., steel point and ferrule, w't per doz. 126 lbs...per dozen 26.00
No. 216E—16 ft. × 1¾ in. steel point and ferrule, w't per doz. 132 lbs...per dozen 28.00
No. 218E—18 ft. × 1¾ in. steel point and ferrule, w't per doz. 138 lbs...per dozen 30.00

POLE SUPPORTS.

Mule. Jenny.

No. 1175E—4½ ft. mule, selected hickory, heavily ironed and braced, w't 34 lbs., each..... $5.00
No. 1176E—6 ft. mule, selected hickory, heavily ironed and braced, w't 40 lbs., each..... 6.00
No. 1177E—7½ ft. mule, selected hickory, heavily ironed and braced, w't 47 lbs., each..... 7.00
No. 1178E—6 ft. jenny, selected hickory, heavily ironed and braced, w't 33 lbs., each..... 8.00
No. 1179E—7½ ft., jenny, selected hickory, heavily ironed and braced, w't 43 lbs.....each 9.00

POLE CRUTCHES.



No. 315E—Extreme height 8 feet, outside width of base 5 ft., distance across supporting curve 1 ft. 6 in., wrought iron pipe in frame, inside diameter 1¼ in., outside diameter 1⅝ in. Brace rod of solid wrought iron, w't 50 lbs., each..... $15.00

The washers at the feet readily adjust themselves to irregularities of ground, an important feature.

RAISING FORKS.

No. 172E—12 ft. × 1¾ in. handle, wrought steel fork and ferrule, w't per doz. 120 lbs.....per dozen $30.00
No. 173E—14 ft. × 1¾ in handle, wrought steel fork and ferrule, w't per doz. 156 lbs.....per dozen 32.00
No. 174E—16 ft. × 1¾ in. handle, wrought steel fork and ferrule, w't per doz. 190 lbs.....per dozen 34.00

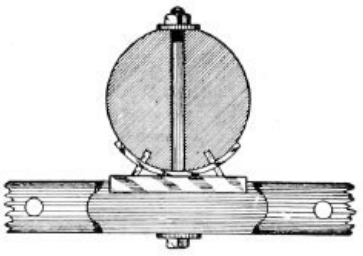
CANT HOOKS.

No. 196E—4½ ft. × 2½ in. rock maple handle, malleable iron clasp and improved extension toe ring, duck bill hook, w't per doz. 96 lbs....per dozen $21.93

CARRYING HOOKS.

No. 194E—2½ × 44 in. selected rock maple handle, malleable iron clamp, ¾ × ⅜ in. crucible steel hook, hung with swivel hinge, w't per doz. 102 lbs. per dozen..... $30.00

BULL DOG STEEL GAINS.



Cut showing how Cross Arm is Connected to Pole by use of Steel Gain.

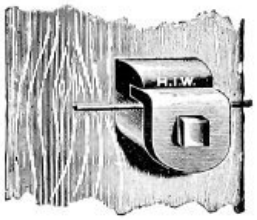
Made for Either Telephone or Electric Light Size Arms and for ⅝ in. Bolts.

No. 404E—For electric light arms, plain, each..... $0.24
No. 405E—For electric light arms, galvanized.....each .28
No. 406E—For telephone arms, plain " .24
No. 407E—For telephone arms, galvanized, each..... .28

A comparatively new device although the demand for something of this kind has been felt for many years. The advantages of a steel support for a cross arm are obvious to every one familiar with telephone or electric light construction. It is an acknowledged fact that a gain cut in a pole is a detriment to the pole as it not only weakens the pole but by exposing the end grain it is more liable to rot.

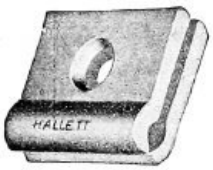
TELEPHONE CONSTRUCTION MATERIAL.

MESSENGER POLE SUPPORTS.



No. 118E—Plain, for ¼ in. strand...each $0.20
No. 119E—Galvanized, for ¼ in. strand, each..... .26

MESSENGER SUPPORTS.



No. 1120E—2×2 in., Plain.....each $0.14
No. 1121E—2×2 in., Galvanized... " .17

This support will carry as high as ½ in. strand.

MESSENGER CLAMPS.

No. 60E—Plain, for ¼ in. strand....each $0.16
No. 61E—Galv., for ¼ in. strand.... " .22
No. 62E—Plain, for ⅜ in. strand.... " .20
No. 63E—Galv., for ⅜ in. strand.... " .26
No. 64E—Plain, for ½ in. strand.... " .26
No. 65E—Galv., for ½ in. strand.... " .32

The upright leg is bored to take ½ in. bolts. For supporting galvanized strand.

BRIDLE RINGS.

No. 1330E—5/16 in., enameled steel, 1⅝ in. eye, ¼ in. opening, 1¼ in. shank, per hundred.....$16.00
No. 1331E—5/16 in., enameled steel, 1⅝ in. eye, ¼ in. opening, ⅞ in. shank, per hundred..... 16.00
No. 1332E—5/16 in., enameled steel, 1¼ in. eye, ¼ in. opening, 1¼ in. shank, per hundred..... 16.00
No. 1333E—7/32 in., enameled steel, ⅝ in. eye, ¼ in. opening, ⅞ in. shank, per hundred..... 16.00
No. 1334E—5/16 in., enameled steel, 3 in. eye, ¼ in. opening, 1¾ in. shank, per hundred..... 16.00

No. 1334E is especially adapted for carrying wires at the side of terminal poles from the cable boxes to the cross arm.

SQUARE WASHERS.

No. 519E—Plain iron, 2×2×⅛ in., w't per thousand 125 lbs....per thousand $50.00
No. 520E—Plain iron, 2¼×2¼×5/16 in., w't per thousand 260 lbs..per thousand 70.00
No. 521E—Galv. iron, 2×2×⅛ in., w't per thousand 130 lbs.....per thousand 80.00
No. 522E—Galv. iron, 2¼×2¼×5/16 in., w't per thousand 280 lbs...per thousand 100.00

For ⅝ in. cross arm bolt.

ONE HUNDRED IN A BUNDLE.

ROUND WASHERS.

No. 514E—Plain iron, ½ in., for ⅜ in. bolt, w't per thousand 15 lbs....per thousand $12.50
No. 516E—Plain iron, 9/16 in., for ½ in. bolt, w't per thousand 35 lbs...per thousand 15.00
No. 515E—Galv. iron, ½ in., for ⅜ in. bolt, w't per thousand 15 lbs...per thousand 20.00
No. 518E—Galv. iron, 9/16 in., for ½ in. bolt, w't per thousand 40 lbs...per thousand 30.00

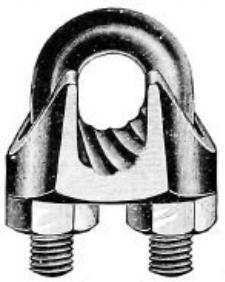
ONE HUNDRED IN A BUNDLE.

TURNBUCKLES.

No. 9100E—Plain, ½ in. bolt, length between heads 8 in.....each $1.10
No. 9102E—Plain, ⅝ in. bolt, length between heads 10 in.....each 2.00
No. 9104E—Plain, ¾ in. bolt, length between heads 12 in.....each 2.75
No. 9106E—Plain, ⅞ in. bolt, length between heads 13 in.....each 3.50
No. 9108E—Plain, 1 in. bolt, length between heads 14 in.....each 4.25
No. 9101E—Galv., ½ in. bolt, length between heads 8 in.....each 1.30
No. 9103E—Galv., ⅝ in. bolt, length between heads 10 in.....each 2.40
No. 9105E—Galv., ¾ in. bolt, length between heads 12 in.....each 3.50
No. 9107E—Galv., ⅞ in. bolt, length between heads 13 in.....each 4.25
No. 9109E—Galv., 1 in. bolt, length between heads 14 in.....each 5.50

Prices furnished on application for welded eye bolt, or with swivel eye and eye bolt.

WIRE ROPE CLIPS.



No. 770E—Japanned, for ¼ in. rope, w't per hundred 17 lbs....per hundred $11.00
No. 771E—Japanned, for 5/16 in. rope, w't per hundred 18 lbs....per hundred 11.00
No. 772E—Japanned, for ⅜ in. rope, w't per hundred 26 lbs....per hundred 12.00
No. 773E—Japanned, for ½ in. rope, w't per hundred 40 lbs....per hundred 15.00
No. 774E—Galv., for ¼ in. rope, w't per hundred 19 lbs.....per hundred 15.00
No. 775E—Galv., for 5/16 in. rope, w't per hundred 20 lbs.....per hundred 15.00
No. 776E—Galv., for ⅜ in. rope, w't per hundred 28 lbs.....per hundred 16.00
No. 777E—Galv., for ½ in. rope, w't per hundred 44 lbs.....per hundred 19.00
No. 780E—Galv., for ⅝ in. rope, w't per hundred 87 lbs.....per hundred 35.00
No. 781E—Galv., for ¾ in. rope, w't per hundred 128 lbs.....per hundred 40.00

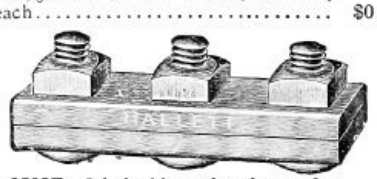
These are drop forged and cannot be broken and are the strongest and most effective U bolts on the market.

THIMBLES.

No. 405E—Diam. ¼ in., galv., w't per hundred 5 lbs.....per hundred $8.00
No. 406E—Diam. 5/16 in., galv., w't per hundred 6½ lbs.....per hundred 8.00
No. 407E—Diam. ⅜ in., galv., w't per hundred 10 lbs.....per hundred 9.00
No. 408E—Diam. ½ in., galv., w't per hundred 11½ lbs.....per hundred 11.00

GUY CLAMPS.

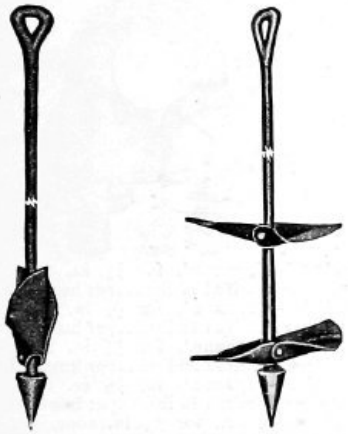
No. 2516E—2 bolt, 3 in. galv. clamps, for ⅜ in. or smaller strand, w't 1 lb., each..... $0.13



No. 3538E—3 bolt, 4 in. galv. clamps, for ⅜ in. or smaller strand, w't 1½ lb., each..... $0.17
No. 3512E—3 bolt, 5 in. galv. clamps, for 7/16 in. or ½ in. strand, w't 2 lbs., each..... .18

TELEPHONE CONSTRUCTION MATERIAL.

D. & T. GUY ANCHORS.



Nos. 1E and 3E, Closed Nos. 2E and 4E open

No. 1E—One 8×2½ in. blade, ⅝ in. × 5 ft. shaft, w't 6 lbs. ..... each $2.00

No. 2E—Two 8×2½ in. blades, ⅝ in. × 5 ft. shaft, w't 7 lbs. ..... each 2.50

No. 3E—One 12×3½ in. blade, ⅞ in. × 6 ft. shaft, w't 15 lbs. ..... each 3.20

No. 4E—Two 12×3½ in. blades, ⅞ in. × 6 ft. shaft, w't 16 lbs. ..... each 4.00

Nos. 2E and 4E have two pairs of blades at right angles to each other.

The anchor is driven into the ground the desired depth with sledge or maul. The blades are set by twisting to the right three revolutions. The design of the blades, like those of a screw propeller, causes them to spread when the anchor is twisted. The pitch is such that they spread to an angle of ninety degrees with the rod in three revolutions.

The spreading of the blades sinks the anchor about one inch, so that there is absolutely no lost motion in the ground. The pull is on solid earth that has not been disturbed.

The anchor can be set by one man in sixty seconds and will hold more than any other anchor manufactured.

ANCHOR OR GUY RODS.

No. 1885E—Plain, ½×14 in., w't per hundred 152 lbs. ..... per hundred 12.44

No. 1887E—Plain, ½×15 in., w't per hundred 158 lbs. ..... per hundred 12.66

No. 1889E—Plain, ½×16 in., w't per hundred 164 lbs. ..... per hundred 12.86

No. 1891E—Plain, ½×17 in., w't per hundred 170 lbs. ..... per hundred 13.08

No. 1893E—Plain, ½×18 in., w't per hundred 176 lbs. ..... per hundred 13.25

No. 1880E—Galv., ½×12 in., w't per hundred 142 lbs. ..... per hundred 15.18

No. 1882E—Galv., ½×13 in., w't per hundred 146 lbs. ..... per hundred 15.50

No. 1884E—Galv., ½×14 in., w't per hundred 152 lbs. ..... per hundred 15.82

No. 1886E—Galv., ½×15 in., w't per hundred 158 lbs. ..... per hundred 16.22

No. 1888E—Galv., ½×16 in., w't per hundred 164 lbs. ..... per hundred 16.60

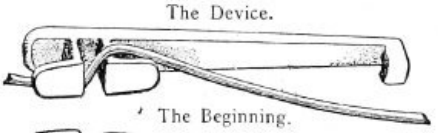
No. 1890E—Galv., ½×17 in., w't per hundred 170 lbs. ..... per hundred 17.00

No. 1892E—Galv., ½×18 in., w't per hundred 176 lbs. ..... per hundred 17.32

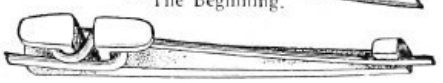
Furnished without washers if so desired.

PENN WIRE TIGHTENERS.

The Device.



The Beginning.



The Finish.

No. 888E—Plain, 3½ in. long, w't per hundred 6 lbs. ..... per hundred $6.00

The above cut explains itself. Takes up 10 in. slack and does not crack or injure the wire. To be left on wire.

TREE TRIMMERS.

No. 394E—18 in. over all, w't 2¾ lbs., each. $3.60

No. 395E—21 in. over all, w't 3¼ lbs., each. 4.40

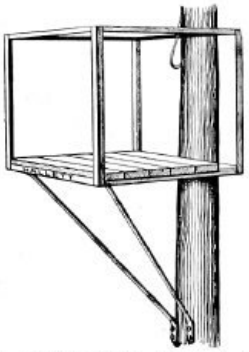
Any length handle can be used.

No. 396E—18 in., detachable saw, w't 3 lbs. ..... each $4.60

Any length handle can be used.

TELEPHONE CONSTRUCTION MATERIAL.

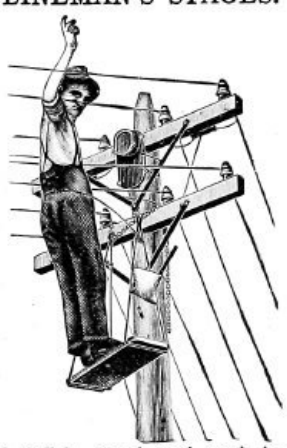
POLE PLATFORMS.



No. 1430E—3×2 ft. 6 in., painted, w't 70 lbs ..... each $10.00
No. 1431E—3×2 ft. 6 in., galvanized, w't 70 lbs ..... each 16.00
No. 1432E—3×3 ft. 6 in., painted, w't 76 lbs ..... each 12.00
No. 1433E—3×3 ft. 6 in., galvanized, w't 76 lbs ..... each 18.00

This platform has two strong angle rails, an oak floor on an iron frame and two round rod braces. Recommended on important terminal poles, where a good deal of work is done.

LINEMAN'S STAGES.



No. 161E—With guard and tool bag, w't 15 lbs ..... each $6.00

This stage is safe, strong and portable, folds and packs in a small space, and gives lineman an opportunity to work with both hands.

MESSENGER CARS.

No. 1603E—Iron frame, wooden wheels and seat, w't 30 lbs ..... each $10.00

These cars are used for riding messenger strands.

BUTT GUARDS AND POLE PROTECTORS.

Butt Guards.

No. 515E—Plain, $\frac{7}{16}$×18× 24 in., w't 23 lbs ..... each $1.56
No. 516E—Galv., $\frac{7}{16}$×18× 24 in., w't 23 lbs ..... each 2.02
No. 517E—Plain, $\frac{7}{16}$×15× 18 in., w't 14½ lbs .... each 1.23
No. 518E—Galv., $\frac{7}{16}$×15× 18 in., w't 14½ lbs .... each 1.54

A steel plate bent into a half circle, which makes a substantial guard, strong enough to stand hard knocks, yet elastic enough so that it can be bent into place on any size pole.

Pole Protectors.

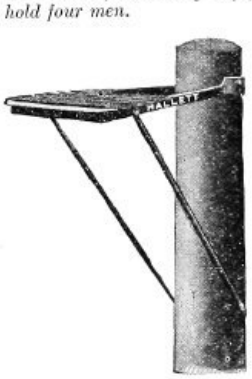
No. 510E—Galv., 2 in. wide by 4 ft. long, w't per hundred, 90 lbs. . . per hundred $12.00

Made of No. 22 sheet iron strips, clipped to point at both ends.

POLE SEATS.

No. 1425E—Plain, 8×24 in., wood seat, w't 20 lbs ..... each $1.00
No. 1426E—Galv., 8×24 in., wood seat, w't 20 lbs ..... each 1.25

This seat consists of an angle iron frame, with two angle iron braces, absolutely safe, sufficient strength to hold four men.



No. 1427E—Plain, steel seat, w't 21 lbs., each $4.00
No. 1428E—Galvanized, steel seat, w't 21 lbs. ..... each 5.00

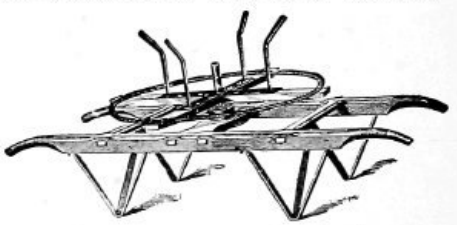
Made of angle iron with flat bars riveted to the ring for the seat, two braces running from both sides of the pole prevent tipping.

CABLE TROLLEYS.

No. 1870E—Arrow. ..... each $2.50

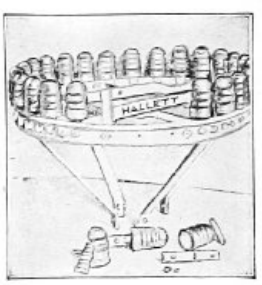
Used for installing heavy telephone cable and will carry any size cable up to four hundred pair.

COMBINATION PAY-OUT REELS



No. 136E—Oak, ironed and bolted, w't 80 lbs. ..... each $16.00

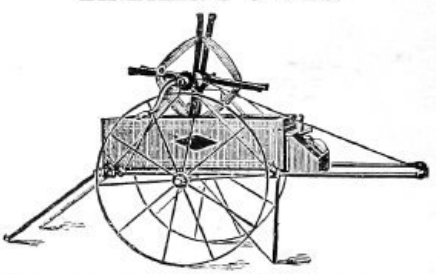
DISTRIBUTING RINGS.



No. 125E—Plain, 25 wire frames, with braces, w't 70 lbs. ..... each $8.40
No. 225E—Galv., 25 wire frames, with braces, w't 70 lbs. ..... each 9.00
No. 150E—Plain, 50 wire frames, with braces, w't 90 lbs. ..... each 14.50
No. 250E—Galv., 50 wire frames, with braces, w't 90 lbs. ..... each 16.00

Frames can be put up after the poles are set and metallic pins added as occasion requires. Insulators not included with rings.

LINEMEN'S CARTS.



No. 3811E—Complete with reel, w't 140 lbs. each $27.00
No. 3812E—Without reel, w't 100 lbs. each 20.00

A convenient cart for handling telephone wire.

Approximate Price List

APPLYING TO LOOSE LEAF CATALOGUE

CORRECTED TO DATE OF ISSUE AND SUBJECT TO CHANGE WITHOUT NOTICE

Carefully Read the Following:

☛ This list is furnished to assist Merchants having a copy of our Loose Leaf Catalogue to secure extra business by taking orders for goods not regularly carried in stock.

☛ The Approximate figures are higher than our prices ruling March 1, 1910.

☛ Sales should be made at an advance over our Approximate prices.

☛ **All prices are subject to change without notice with market fluctuations.**

HIBBARD, SPENCER, BARTLETT & CO.,

STATE STREET BRIDGE

CHICAGO

THE GREAT VALUE OF OUR APPROXIMATE PRICE LIST

TO MERCHANTS

Our Loose Leaf Catalogue solved the problem of supplying the trade with up to date information. Our Approximate Price List affords an idea of value on every article illustrated and described. With these two great factors merchants are enabled to add largely to their sales, at the same time prevent their customers ordering goods elsewhere which they do not carry or could not profitably stock.

If the merchant of today wishes to hold and increase his trade he must be able to furnish goods his customers want. You cannot stock everything, nor is it profitable to carry articles for which there is only an occasional demand. You are as near to us as the farmer is to the largest mail order houses. Our Approximate Price List supplies a means always at hand of taking care of this business.

THE APPROXIMATE PRICE LIST

A COMPLETE CHECK ON OUR LOOSE-LEAF CATALOGUE

Few of our customers realize the amount of information contained in our Approximate Price List. Every change in list, all new goods and variation in prices are herein noted. But more important is the assurance that the catalogue is up to date.

In taking orders it is important to know whether you have the latest page issued. This is invariably given thus—"New page dated——." If your catalogue agrees with the Approximate Price List you may be sure you have the latest information. If no date is given, the original page without date is still good. It should be another incentive to keep your book up to date by promptly inserting new leaves as soon as received. It affords a complete check on the book, enabling you to know its condition at all times.

At the back of this list is printed a list of the different lots of Extra Pages issued since the book was printed and the means of easily determining if any have been missed. The merchant who keeps our catalogue up-to-date not only proves his right to deserve success, but is bound to gain largely by the accurate, convenient and useful information always at hand.

APPROXIMATE VALUES

HIGHER THAN OUR PRICES RULING MARCH 1, 1910. SALES SHOULD BE MADE AT AN ADVANCE OVER THESE PRICES.
